 - 12.3 Bullet Proof Guarantee. This feature is available only for circuits installed prior to October 1, 1998 at [MCI Legacy Company](#)-designated locations, and only for T-1 circuits enrolled prior to the 10th day in the month prior to the outage. Customers subscribing to this feature are guaranteed service restoral, within one minute, in the event of MCI Legacy Company-provided T-1 Digital Access circuit failure. If this timeframe cannot be met, the MCI Legacy Company will provide a credit to the Customer equal to one month's Local Loop charges, after any discounts and taxes, for the affected circuit. The credit will not include Central Office Connection (COC), Access Coordination (AC), ISDN PRI, and associated equipment charges. The monthly credit shall not exceed the discounted monthly recurring charges for the local access circuit. No credits will be provided for non-recurring charges. The credits will only apply when the Customer has reported the outage or interruption to the MCI Legacy Company, and the MCI Legacy Company, in its sole discretion, has verified that the Customer is eligible for the Guarantee.

This guarantee does not apply to the following:

- interruptions or outages caused by the Customer;
- in cases where Customer premises equipment is provided by the Customer or any third party;
- during the period of time that the Customer has released the circuit to the MCI Legacy Company for maintenance purposes, rearrangements or other order changes; or,
- when the Customer elects not to release the circuit for testing or repair and continues to use it on an impaired basis. This guarantee

does not apply during busy conditions or MCI Legacy Company Network failures.

- 12.4 Integrated Services Digital Network (ISDN) Service. ISDN integrates voice, data, and video communications services via standard interfaces.
- 12.5 Primary Rate Interface (PRI). Through PRI, a Customer can share access facilities among [MCI 800 Service](#) and [Vnet](#), and MCI 800 Service and [MCI Prism 1](#), and [MCI Vision](#). Each time a change in the number of Private Line DS0s is required, a PRI reconfiguration charge will be assessed.

After initial installation of the PRI trunk group, a Customer may choose to add or delete groups of B channels in DS1 blocks. Each time the trunk group size is changed, a trunk group rearrangement charge will be assessed.

Customers who elect PRI will be assessed the following charges, except that installation charges will be waived until further notice.

<u>Feature</u>	Monthly Installation	
Per D Channel:	\$120.00	\$500.00
Rearrange trunk group B channels per occurrence:	200.00	N/A

- 12.6 Call-by-Call Service Configuration. Allows the B channels within a PRI to be shared between services subscribed to on the PRI. Call-by-Call Service Configuration can be used in the following combinations: [Vnet](#) /MCI 800 Service and [MCI Prism 1/MCI 800 Service](#). If the PRI is initially dedicated to a single service, it can be reconfigured to support Call-by-Call Service Configuration, and the rearrangement charge specified below will apply. Each time a service is added or deleted from an existing PRI trunk group, a service rearrangement charge will be assessed.

Customers who elect Call-by-Call Service Configuration will be assessed the following charge charges, except that installation charges will be waived until further notice:

<u>Feature</u>	Monthly Installation	
Call-by-Call:	\$ 0.00	\$250.00
Trunk group rearrangement per-occurrence:	200.00	N/A

- 12.7 MCI Sentry. This feature is available only for circuits installed prior to October 1, 1998. The installation and monthly recurring per-circuit charges for MCI Sentry are as follows:

Charges	Per-Circuit
---------	-------------

	<u>First 10 Circuits</u>	Additional Circuits	Installation
