

North and South System Availability Forecast Info
Year-at-a-Glance: September 2021 through September 2022

The system availability forecast published herein is a forecast of exceptions to the published regular system availability information, and is subject to change. The exceptions that are published are those that are known at the time of publication. The current internal Verizon change management policy is based on a 30-day notification of change activity; as such, outward of 30 days may be incomplete.

All of the published information is subject to change based on the needs of the business. Changes to this information will be distributed to the industry in accordance with current Change Management procedures for availability notification.
