Configuring your NIC Connection in Windows XP

1. Click **Start** in the left Taskbar.
2. Right click **My Network Places** and select **Properties**.
3. Right click the network connection for your Network Interface Card (NIC) and select **Properties**.
4. Select Internet Protocol (TCP/IP) and click Properties.

5. Select Obtain an IP address automatically if it isn't already checked.
6. Click **OK**.

7. Click **OK** again.
