OVERVIEW
Your new Motorola DRC800 universal 4-in-1 remote operates your Motorola or other manufacturer's cable set top box and up to three other devices.
In addition, the DRC800 provides advanced features such as Digital Video Recording (DVR) control and Parental-on-Demand (P0D) support. You can lock volume control to any of these devices, to make adjusting your home entertainment easier. See "Setting Volume Lock". The DRC800 always remembers the volume locked to any specific device.
You can also change the type of device any device key controls. See "Reassigning Device Keys".

Operating Range
Your remote-controlled devices from up to 50 (15 m) away if you are directly in front of them, or from up to 20 ft (6 m) away if you are off to the side.

INSTALLING BATTERIES
The Motorola DRC800 requires two AAA batteries. The first set of batteries is included, and should last up to 6 months under normal usage.
1. Remove the battery case cover and the old batteries (if necessary).

2. Follow the diagram inside the battery case to insert the new batteries:
   - Note: Always use new, high-quality replacement batteries. Ensure that the batteries are not damaged before inserting them into the remote.
   - You have two minutes to replace the batteries before your remote loses its memory.

USING YOUR REMOTE
To select a device to control, simply press one of the device mode keys (TV, AUDIO, DVR/ VCR, CABLE) at the top of your remote. After you set the remote to control that device, you may begin using the device.

See "Programming Device Control" for more information on identifying a specific device to a key.

N O T E
If you use only one device (for example, your TV), you may not need to program the device. See "Using Your Remote" to make setting your device features easier. Making your remote easier to use.

DIRECT ACCESS TO VIDEO PROGRAMMING
This device key allows access to your cable service's electronic program guide (EPG) and next day's cable guide for viewing (only available with DVR programming (only available with DVR models)).

The device key's LED blinks three times, indicating that it has selected the volume control for all devices.

REASSIGNING DEVICE KEYS
Each device key accesses a specific type of device (for example, TV AUDIO, DVR/ VCR, CABLE) in the menu it controls. See "Using Your Remote" for more information on changing a device to control.

Make sure your batteries are good. If battery power is low, your remote enters a "Low Battery Condition" to conserve battery power for resetting your settings. See "Installing Batteries" for more information on changing the batteries.

Reset all settings:
1. Press and hold a device mode key (TV, AUDIO, DVR/ VCR, CABLE) corresponding to the device you want to reset. Then press the TV key for at least six seconds. The LED for each device key lights up, then the key for the device you selected remains on.
2. Enter 9 9 1. The LED blinks twice to indicate that your remote is returned to its factory settings. You will need to remap all device code settings. See "Programming Device Control".

ADDITIONAL INFORMATION
The Motorola DRC800 does not have any user-serviceable parts. Opening the case, except for the battery cover, may cause damage to your Motorola remote control.
