- Button

ON STB

ON TV

ON STB

1. Make sure the remote control is working correctly, please refer to the Key Fix Feature.
2. If you think a mistake with programming your remote, you can always press the OK button and start over. The RED LED will blink twice and then stop.
3. Press and hold the OK and buttons together, then release both.
4. The LED will blink twice and then stop.
5. The Remote Control will try a new TV code every second, and the LED will blink each time a new code is tried. When the TV responds, stop pressing the button right away. If you press the button more than 5 times rapidly, the RED LED will blink and the remote will exit the programming mode.
6. If you press all the buttons, the LED will turn off and the remote will exit the programming mode.
7. If you have still problems programming the remote, please refer to our website at www.verizon.com/fiostvhelp

Key Fix: If your remote control is programming your TV, but the , , or buttons do not work correctly, then you can try using the Key Fix Feature to fix the problem.

1. Turn on your TV and STB.
2. Make sure that the remote control will turn off or back one TV code at a time.
3. Press the TV code key on your remote, then select the Main Menu. From the Main Menu, you can access all the features of your FIOS TV Menu and Guide. To select any item, press button to move to the selected item.
4. Press button to return to the list of your previous settings.

Reset the Remote Control

1. Turn on your TV and the FIOS TV STB.
2. Make sure that the remote control will turn on or off your TV.
3. Press button to turn on or off your TV.
4. Press button to return to the list of your previous settings.
