

UCCaaS for Government: State Local and Education (SLED) Edition.

Help improve the efficiency of your operations with Verizon's enhanced collaboration solution.

Technology is transforming the workplace and yours is no exception. Empower your people with the tools to connect with constituents, colleagues and partners.

Verizon Unified Communications and Collaboration as a Service (UCCaaS) for Government: State Local and Education (SLED) Edition allows you to integrate your communications tools into a single platform. Your team can access enhanced collaboration services.

UCCaaS for Government: SLED Edition is cloud-based, and that means it's easily scalable – no need for big capital expenditures to get started or expand services. You can add the services you want, enabling you to control costs and simplify management. You get all the benefits of ownership without the hassle or additional costs of maintenance or upgrades.

Our solution is built with layered security, multiple points of redundancy and native integration; and performance is backed by Verizon Service-Level Agreements (SLAs). We can provide a fully-hosted service and support you in integrating with your required third-party applications.

Make communications work for you.

By moving your communications system to UCCaaS for Government: SLED Edition, you can transform how you operate. Give your employees the communications and collaboration tools they need to design and build new services quickly, and to provide more responsive services to citizens.

UCCaaS also allows your IT team to focus on core, strategic projects that advance your agency's objectives, rather than having to focus on maintaining your communications tools.

Our solution can help you:

- Boost productivity, efficiency and teamwork
- Streamline supply chain logistics
- Improve responsiveness and time to delivery.
- Reduce travel-related expenses

Deployment expertise.

Leverage Verizon's implementation expertise to help you build a custom communications solution from scratch or integrate tools from multiple vendors. Verizon has a dedicated Program Management Office to provide oversight of our US-based implementation teams. Our UCCaaS designs leverage our networking and VoIP/SIP experience to provide a high quality operating communication environment. To support your end-user experience, Verizon provides adoption services to bridge the transition between pre and post implementation support. Our proven engineering teams can assist to integrate your third party applications for a seamless design. A successful implementation enables UCCaaS users to confidently adopt the technology to enhance interactions and decision making among constituents, colleagues, and partners.

Cost control.

With a predictable monthly subscription, you can better manage operational expenses. UCCaaS provides you with greater control of your total cost of ownership while allowing you to enhance continuity, flexibility and security.

Reliability.

UCCaaS is an end-to-end workforce communications and collaboration solution, providing access to flexible bundles of Cisco services that natively integrate into Verizon network services. Our SLAs back our commitment to high-quality services. Verizon's UCCaaS for Government: SLED Edition is built on Cisco's FedRAMP-authorized Hosted Collaboration Solution for Government (HCS-G).

Build a FedRAMP-authorized* cloud collaboration system that meets the needs of all workers.

Verizon UCCaaS for Government: FedRAMP-authorized*

Gain a FedRAMP-authorized* cost-effective, secure approach for the adoption and use of cloud collaboration services. By standardizing security controls and processes, FedRAMP authorization helps deliver a cost effective solution with an accelerated implementation. You can be confident in the security of the cloud technologies your're using.
