
A more collaborative, mobile workforce experience

Fact sheet

Virtual Communications Express Unified Communications (UC)

A modern business needs a modern communication solution; one that controls costs, enables mobility and helps increase productivity to drive a competitive edge.

Virtual Communications Express Unified Communications helps your organization address its business challenges with a full suite of collaboration and conferencing tools.

Cost-effective tools to boost collaboration.

If you have a PBX, or a network of PBXs, you will appreciate the simplicity of Virtual Communications Express UC. Our system brings you all of the features you'd expect from a PBX, but it comes with powerful applications that easily integrate into your business, including:

- Instant messaging with presence
- Audio & video conferencing
 - Screen sharing
 - File sharing
- Single-number reach

These advanced communication tools were once only affordable to large enterprises with sizeable IT budgets. Now, our low-cost options make it easy for businesses of all sizes to encourage productivity and collaboration, while helping improve client relationships.

Conferencing made simple.

Virtual Communications Express UC offers 24x7 virtual meeting rooms for interactive video, chat, and screen sharing. Users can access a conference from our web-based client right from their browser or smartphone. This makes it easy to connect with anyone, from employees to customers, partners, constituents, or anyone you need to conference with.

Stay connected and productive virtually anywhere.

Whether you're in the office, or on the way to your next off-site client meeting, you don't miss important calls. We'll help you communicate and collaborate from where you work. For multi-site, multi-tenant workplaces, Virtual Communications Express UC applications keep you connected on all kinds of devices and networks.

With our simple to use client, you can easily transfer active calls between your office phone and compatible mobile or softphone devices. Our "pull" and "push" capabilities allow you to make an uninterrupted transition from your desk to other locations. And, you can conduct impromptu conference calls with up to 30 parties.

Take your office with you, using compatible laptops, PCs, smartphones, and tablets.

Whether your business objective is to better manage in-house IT expense, support a more connected mobile workforce, or leverage communication tools as a competitive advantage, Verizon's Virtual Communications Express with UC capabilities is focused on helping you achieve your desired business outcome.
