The security landscape is an intensifying battlefield across digital ecosystems with continually shifting adversaries and attack vectors. Verizon’s cybersecurity solutions help you better protect your business from the threats most likely to impact it. We tap into our vast global network and decades of security experience to analyze attack trends and activity, helping enterprises make more informed, data-driven decisions through solutions that protect, detect, and respond to cyber threats.

Protect.

Security Gateway Solutions
Helping protect traffic flow, reduce complexity, control costs and harden infrastructure.

Network Defense
Stopping malware outside your network, detecting anomalies in internet traffic and helping mitigate large DDoS attacks.

Identity and Access Management Services
Managing user identities comprehensively, including access to resources, automated user account provisioning and workflow.

Mobile Security
Protecting your network from many of the risks that mobile and IoT devices can offer.

Detect & respond.

Advanced Threat Detection
Delivering actionable information through our advanced detection services and experienced security analysts.

Network Threat Monitoring and Analytics
Detecting NetFlow anomalies and catching advanced threats before they disrupt your network.

Breach Investigations & Response
Preparing for, investigating, or responding to a breach? Our experienced experts are available to help you contain and remediate cyber threats.

A risk-based approach to security.

The Verizon Risk Report.
Strong security starts with a comprehensive understanding of your cyber risk. Attain visibility through a 360-degree view of your security posture and threat level with the Verizon Risk Report. A single report for everyone from the Board to security operations.

VerizonEnterprise.com/products/security
Global situational awareness, helping us see the lifespan of cyber attacks and develop actionable threat intelligence and industry-leading research.

Cyber intelligence.
The Verizon Threat Research Advisory Center draws from Verizon's global public IP backbone to fuel applied intelligence solutions that improve cyber attack detection and recovery.

Integrated across our solution suite, customers harness the power of this intelligence platform to recognize and react to today's more sophisticated cyber threats.

Advise.

**Security Assessment and Strategy**
Providing insight into your infrastructure with our team of proven security experts, offering assessments, testing and risk analysis to help boost cyber resiliency.

**Governance, Risk and Compliance**
Helping you improve your security posture based upon industry standards and reasonable best practices.

**Incident Response Planning**
Demonstrating the strengths and vulnerabilities of your security program to help you better understand what threats you may face.

Thought Leader.

**Data Breach Investigations Report**
Analyzing breach data so practitioners can better understand today's threats.

**Data Breach Digest**
Take a look at some of our most interesting cyber crime cases.

**Payment Security Report**
The details of payment security and PCI DSS compliance.

**Protected Health Information**
Informing practitioners in the healthcare industry about the threats they face.

**Mobile Security Index**
An in-depth look at the scale of threats to mobile security.

The Verizon difference.

We have over 25 years of industry experience, nine Security Operations Centers, six forensics labs and one of the largest IP networks in the world. We monitor 61 billion security events (on average) each year to improve our threat library and inform our teams. Our world-class services and security professionals, including one of the largest teams of PCI Qualified Security Assessors anywhere, are always ready to help you meet your security challenges.

Actionable intelligence and risk ratings help allocate the right resources against the most dangerous threats. Consistent policy management and incident handling provide a unified view of your security posture across your serviced devices. Our experienced consultants have the knowledge to help you design and roll out your security strategy on a global scale.

Don't just take our word for it. Verizon has been positioned as a Leader in the 2018 Gartner Magic Quadrant for Managed Security Services, Worldwide* six years in a row.
