1.8 Digital Private Line Service (T)

This service is no longer available to new Customers. (L)

Rates for Digital Private Line Service are based on mileage between Carrier's Points-of-Presence (POPs) and on bandwidth. Mileage calculation follows the formula in Section 2 above. A complete private line circuit includes the following elements.

Inter Office Channel - POP to POP transport.
Local Access Facilities - access line on both the originating and terminating ends of the circuit.
Central Office Connection - on both the originating and terminating ends of the circuit.
Access Coordination Fee - on both the originating and terminating ends of the circuit. (L)

1.8.1 Inter Office Channel (T)

Charges include a Nonrecurring Charge (NRC), a Monthly Recurring Charge (MRC), and a monthly per-mile rate. (L)

Service Type	NRC	MRC	Per Mile Rate
DS-0	$ 100.00	$ 305.00	$ .26
DS-1	500.00	2,900.00	3.60
DS-3	1,000.00	16,500.00	45.00

(L)

1.8.2 Local Access Facilities (T)

Carrier will coordinate access arrangements for Customer. Access facilities arranged by Carrier will be billed to Customer at the rates found by referring to Carrier's Federal Rate Schedule 3. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. (L)

1.8.3 Central Office Connection (T)

Central office connection charges apply on both the originating and terminating ends of a circuit, and are determined based on the type of access interconnected. The central office connection charge includes both a NRC and a MRC. (L)

Service Type	NRC (per end)	MRC (per end)
DS-0	$200.00	$ 20.00

1.8.5 Discount Plans (T)

Carrier offers discounts based on the term of Customer's commitment to Carrier's service and based on Customer's total MRC volume of services ordered. To determine the applicable discount, add the MRCs (both fixed and mileage sensitive) for all four elements of all circuits ordered by Customer. Then, see the following tables to determine the minimum monthly revenue commitment level for Customer. Depending on the length of the term Customer has selected, the percentage discount will be applied to the inter office channel charges, by circuit type. For example, if Customer orders a DS-1 and a DS-3, totaling $19,000 in MRCs, for a one-year term, the discount on the inter office channel portion of the DS-1 circuit will be 34%, and the discount on the inter office channel portion of the DS-3 will be 13%. SECTION 1 - RATES AND CHARGES (Continued)

1.12 Digital Private Line Service (T)

This service is no longer available to new Customers.

Rates for Digital Private Line Service are based on mileage between Carrier's Points-of-Presence (T)
(POPs) and on bandwidth. Mileage calculation follows the formula in Section 2 above. A (T)
complete private line circuit includes the following elements.

Inter Office Channel - POP to POP transport.
Local Access Facilities - access line on both the originating and terminating ends of the circuit.
Central Office Connection - on both the originating and terminating ends of the circuit.
Access Coordination Fee - on both the originating and terminating ends of the circuit.

1.12.1 Inter Office Channel

Charges include a Nonrecurring Charge (NRC), a Monthly Recurring Charge (MRC), and a monthly per-mile rate.

Service Type	NRC	MRC	Per Mile Rate
DS-0	$ 100.00	$ 305.00	$ .26
DS-1	500.00	2,900.00	3.60
DS-3	1,000.00	16,500.00	45.00

1.12.2 Local Access Facilities

Carrier will coordinate access arrangements for Customer. Access facilities arranged by Carrier will be billed to Customer at the rates found by referring to Carrier's Federal (T)
Rate Schedule 3. Any special construction or non-standard charges assessed by the (T)
company supplying the local access will also be the responsibility of Customer.

1.12.3 Central Office Connection

Central office connection charges apply on both the originating and terminating ends of a circuit, and are determined based on the type of access interconnected. The central office connection charge includes both a NRC and a MRC.

Service Type	NRC (per end)	MRC (per end)
DS-0	$200.00	$ 20.00
DS-1	300.00	200.00
DS-3	500.00	490.00

1.12.4 Access Coordination Fee

Access coordination charges apply on both the originating and terminating ends of the circuit. The access coordination charge includes both a NRC and MRC. (T)

Service Type	NRC (per end)	MRC (per end)
DS-0	$ 200.00	$ 29.00
DS-1	205.00	75.00
DS-3	2,200.00	120.00

1.12.5 Discount Plans

Carrier offers discounts based on the term of Customer's commitment to Carrier's service and based on Customer's total MRC volume of services ordered. To determine the applicable discount, add the monthly recurring charges (both fixed and mileage sensitive) for all four elements of all circuits ordered by Customer. Then, see (T)
the following tables to determine the minimum monthly revenue commitment level for Customer. Depending on the length of the term Customer has selected, the (T)
percentage discount will be applied to the inter-office channel charges, by circuit type. For example, if Customer orders a DS-1 and a DS-3, totaling $19,000 in monthly (T)
recurring charges, for a one-year term, the discount on the interoffice channel portion of the DS-1 circuit will be 34%, and the discount on the interoffice channel portion of the DS-3 will be 13%.

This service is no longer available to new Customers. (L)

All rates and charges associated with local Frame Relay Service (A thru D) in addition to the (L)
Statewide Committed Information Rate/Permanent Virtual Circuit (CIR/PVC) rates (E) will apply to (T)
Statewide Frame Relay Service. (L)

Customer may purchase service as a combined local access and port element, plus the Data Link (T)
Connection Identifier (DLCI) element from Carrier. Alternatively, Customer may purchase only (T)
the port and DLCI elements from Carrier under the applicable Rates Section of the California CLC (L)
No. 2 Tariff or purchase local access from Carrier under the applicable Private Line Section of the
California CLC No. 2 Tariff. The latter option applies when Customer's serving wire center is not
frame relay capable.

Rate Components:

A. Local Access Facility (dedicated)
B. Frame Relay Port
C. Data Link Connection Identifier (DLCI)
D. Miscellaneous Charges (L)

Rates and charges for the above are found in the California CLC No. 2 Tariff, Section Nos.19.1 or (T)
20.5 contingent on Customer's underlying LEC provider. (L)

SECTION 1 - RATES AND CHARGES (Continued) (T)

1.17 Direct Line Service (Continued) (T)

A. Inter Office Transport (Continued) (L)

- The pricing in the above table is representative of dollar per DS-0 mile rates.
- The number of DS-0 channels in any given circuit determines DS-0 mileage.
- There is a minimum inter office transport mileage requirement of 200 miles per circuit. Any circuit with mileage under 200 miles will be raised to meet the 200 mile minimum.
- For pricing purposes, three DS-3 circuits will equate to 155 Mbps (OC-3).
- For pricing purposes, four DS-3 circuits will equate to 200 Mbps (155 Mbps + 45 Mbps).
- For pricing purposes, pricing will be based on an aggregate bandwidth.
- Bandwidth can only be aggregated through Tier 6. Example: 20 OC-12 circuits would be priced in Tier 6.
- OC-48 pricing is stand-alone and cannot be comprised of aggregated bandwidth. OC-48 pricing is not eligible for the multi-circuit/multi-term volume discount and does not count towards the Minimum Monthly Recurring Charge (MMRC.)

Example: Customer purchases three DS-3 circuits and one OC-3 circuit. The aggregate bandwidth for the DS-3s would be 155 Mbps (per note above) plus the OC-3 bandwidth of 155 Mbps for a total bandwidth of 310 Mbps. This configuration would fall into the Tier 3 pricing structure.

B. Local Access Charges

Carrier will set up local access arrangements on behalf of Customer as requested for the Direct Line Service purchased. Any charges associated with the provisioning of the access circuits, including but not limited to, local access charges, coordination charges, access service order charges, or any other charge associated with gaining access from Customer premise to the Point-of-Presence (POP) will be considered access charges. This includes any NRC incurred in association with obtaining access regardless of contract term. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. Any such access charge as described above will be the responsibility of Customer.

C. Additional Facility Charges

Back-haul charges and tail circuit charges may also apply when Customer requests service to any location where the direct line POP cannot support the requested type of service. Any charges associated with provisions of such additional facilities, including but not limited to back-haul, tail circuits, or any other charges associated with transition to/from non-listed cities will be considered additional facilities charges. This includes any NRC incurred regardless of contract terms. Any special construction or non-standard charges assessed by the company supplying additional facilities will also be the responsibility of Customer. Any such charge as described above will be the responsibility of Customer. (L)

SECTION 1 - RATES AND CHARGES (Continued) (T)

1.17 Direct Line Service (Continued) (T)

D. Multi-Circuit/Multi-Term Discount Plan (L)

Carrier offers discounts based on the term of Customer's commitment to Carrier's service, quantity of Direct Line Service circuits purchased by Customer on a given contract, and on (L)
Customer's total inter office transport MRC for Direct Line services. (T)

The Multi-Circuit/Multi-Term Discount Plan will be applied only to the monthly recurring inter (L)
office transport charge for Direct Line Service circuits as described above. It does not apply to any other rate elements. Further, this discount only applies to the current contract and does not apply to any existing circuits purchased on prior contracts or any proposed future circuits not ordered at the time of contract signing. Discounts apply per contract and are not cumulative.

Eligibility for this discount plan requires all of the following conditions: contract term must be three or five years and must include three or more Direct Line Service circuits as described above. In addition, the Minimum Monthly Recurring Charge for the inter office transport must be $60,000 or greater, comprised of DS-3 through OC-12 Direct Line Service circuits.

Customer contracts meeting all of the above requirements are entitled to a discount of 10% on five-year contracts and five percent on three-year contracts. (L)

No other promotions or discounts apply to Direct Line Service with the exception of the (T)
Competitive Response Promotion found in Carrier's Federal Rate Schedule 3. (L)

E. Expedite Fees

Carrier will charge Customer an expedite fee on a per-order basis.

1.18 One Wide Area Network (One WAN) Service

One WAN Service includes the following rate elements. The pricing elements for Options 1 and 2 outlined in this Tariff are mutually exclusive. Customer must price their entire network via Option 1, Option 2 or a combination of Options 3 and 4. (C) | (C)

A. Option 1

1. Access (C)

For UNI ports, Carrier will set up access arrangements on behalf of Customer for the One WAN Service purchased. Any charges associated with the provisioning of the access circuits including, but not limited to, local access charges, coordination charges, access service order charges, or any other charge associated with gaining access from Customer premise to the Point of Presence (POP) will be considered "Access Charges". This includes any Nonrecurring Charges (NRC) incurred in association with obtaining access regardless of contract term. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. Any such access charge as described above will be billed directly to Customer. (C)

2. UNI Port (C)

UNI port charges are subject to the speed of the port selected. A NRC and a Monthly Recurring Charge (MRC), based on the speed of the port connection, apply per port for each access circuit connection to the network supporting this service. Each port can accommodate multiple Permanent Virtual Connections (PVCs). (C) (C)

Rate Element	NRC ($/port)		MRC ($/port)	
DS-3	$ 3,000		$ 5,000	
OC-3c	4,000	(C)(R)	14,000	
OC-12c	5,000	(C)(R)	42,000

1.18 One Wide Area Network (One WAN) Service

One WAN Service includes the following rate elements. The pricing options outlined in this Tariff are mutually exclusive. Customer must price their entire network via Option 1, Option 2 or Option 3. (T) (T)

A. Option 1

1. Local Access

Carrier will set up access arrangements on behalf of Customer as requested for One WAN Service purchased. Any charges associated with the provisioning of the access circuits, including but not limited to, local access charges, coordination charges, access service order charges, or any other charge associated with gaining access from Customer premise to the Point of Presence (POP) will be considered "Access Charges". This includes any Nonrecurring Charges (NRC) incurred in association with obtaining access regardless of contract term. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. Any such access charge as described above will be passed through to Customer in accordance with this Tariff.

2. Port

Port charges are subject to the speed of the port selected. A NRC and a Monthly Recurring Charge (MRC), based on the speed of the port connection, apply per port for each access circuit connection to the network supporting this service. Each port can accommodate multiple Permanent Virtual Connections (PVCs). Port nonrecurring fees apply for month-to-month contracts. The NRCs will be waived for two years or more contracts. (T) (T)

The Permanent Virtual Channel Connection (PVCC) and the Permanent Virtual Path Connection (PVPC) monthly charges are subject to the selected class of service parameters and the transmission speed selected. The transmission speed selected for Constant Bit Rate (CBR) is defined by Peak Cell Rate (PCR). The transmission speed selected for Variable Bit Rate-Real Time (VBR-rt) and Variable Bit Rate-Non Real Time (VBR-nrt) is Sustained Cell Rate (SCR). The monthly flat rate charge for Unspecified Bit Rate (UBR) class of service parameters is the maximum charge; no transmission speed can be designated for UBR PVCs. (T) (T) (L) (T) (T) (L)

The transmission speed charges as outlined in the Price Matrix are $/Mbps for these classes of service: CBR, VBR-rt and VBR-nrt. UBR is a fixed flat rate regardless of the speed utilized. The virtual connection MRC is a function of the class of service and transmission speed selected. The transmission speeds may range from 1-622Mbps, subject to the port speed. NRCs for PVCs will be waived for two years or more contracts. (L)

1. Local Access

Carrier will setup access arrangements on behalf of Customer when full service One WAN Service is purchased. Access facilities arranged by Carrier will be billed to Customer at the rates of the underlying carrier, (excluding any discounts and promotions run by carrier). Carrier will add a discount of 31% on DS-1 access only for MRCs. This discount will apply for each DS-1 access required. Any special construction or non-standard charges assessed by the company supplying the local access, or by the underlying provider connecting to the access provider, will also be the responsibility of Customer. Furthermore, if NxDS-1 access is required, Carrier will supply the necessary equipment at a charge to be determined on a case by case basis and subject to Customer's specific network configuration. The PVCC and PVPC monthly charges are subject to the selected class of service parameters and the transmission speed selected. The transmission speed selected for CBR is defined by PCR. The transmission speed selected for VBR-nrt is SCR. The monthly flat rate charge for UBR class of service parameters is the maximum charge regardless of the speed of transmission.

The transmission speed charges as outlined in the Price Matrix are $/Mbps or $/Kbps for these classes of service: CBR and VBR-nrt. UBR is a fixed flat rate regardless of the speed utilized. UBR price is a monthly flat rate and subject to the lower of the originating or terminating port. The transmission speeds are subject to the port speed. NRCs for PVCs will be waived for two years or more contracts.

SECTION 1 - RATES AND CHARGES (Continued)

1.32 Frame Relay Service - This service is no longer available to new Customers.

All rates and charges associated with Local Frame Relay Service (A thru D) in addition to the Statewide CIR/PVC rates (E) will apply to Statewide Frame Relay Service.

Customer may purchase service as a combined local access and port element, plus the DLCI element from Carrier. Alternatively, Customer may purchase only the port and DLCI elements from Carrier under the applicable Rates Section of the California CLC No. 2 Tariff or purchase local access from Carrier under the applicable Private Line Section of the California CLC No. 2 Tariff. The latter option applies when Customer's serving wire center is not Frame Relay capable.

Rate Components:

A. Local Access Facility (dedicated)
B. Frame Relay Port
C. Data Link Connection Identifier(DLCI)
D. Miscellaneous Charges

Rates and charges for the above are found in the California CLC No. 2 Tariff, Section Nos.19.1 or 20.5 contingent on the Customer's underlying LEC provider.

E. Statewide CIR/PVC

Statewide CIR-based PVC charges will apply to this service, in addition to local Frame Relay components (Intrastate/Intralata) on each network arrangement. Based on the CIR selected, charges for each PVC will include a NRC and a MRC. PVCs added to the network after initial installation will be considered new elements and the nonrecurring and monthly charges will apply. (T)

B. Local Access Facilities Charges

- Access Coordination Fee (ACF) - Amount assessed per access circuit when Customer appoints Carrier as the single point of contact for their access. The ACF permits Carrier to recoup costs of designing and testing a circuit, generating and issuing Access Service Requests (ASRs), coordinating any other activity required to ensure timely installation. Additionally, the ACF assures Customer that Carrier will provide ongoing maintenance and trouble resolution for the life of the access arrangement.

- Central Office Connection Fee (COC) - Designed to recover Carrier's investment in the digital cross-connect equipment necessary to provide service, to recover costs associated with the management and maintenance of equipment and Carrier's testing, wiring, and cross-connecting of the circuit. COC fee is accessed per access circuit.

(D)

- Local Access Facilities - Carrier will setup access arrangements on behalf of Customer when full-service Digital Private Line II Service is purchased. Access facilities arranged by Carrier will be billed to Customer at Carrier's costs. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer.

  Carrier must also set up access arrangements on behalf of Customer as requested for services purchased. Any charges associated with provisioning of the access service, including but not limited to, local access charges, coordination charges, access service order charges, or any other charges associated with gaining access from Customer premise to the POP will be considered "Access Charges". This includes any NRCs incurred in association with obtaining access regardless of contract term. Any such charges as described above will be passed through to Customer in accordance with this Tariff.

COC fee is accessed per access circuit.

- Entrance Facility Charge (EFC) - An access circuit that carries traffic from the Serving Wire Center (SWC) to Carrier's POP. Carrier does not own these facilities, but rather leases facilities from an access provider. Carrier charges EFC to recover costs when utilizing these facilities for a Customer Provided Access (CPA) service with an access provider. This charge is included in the full service circuit price. SECTION 1 - RATES AND CHARGES (Continued)

1.33 Direct Line Service - Rate Elements (Continued)

A. Inter Office Transport (Continued)

- The pricing in the above table is representative of dollar per DS-0 mile rates.
- The number of DS-0 channels in any given circuit determines DS-0 mileage.
- There is a minimum inter office transport mileage requirement of 200 miles per circuit. Any circuit with mileage under 200 miles will be raised to meet the 200 mile minimum.
- For pricing purposes three DS-3 circuits will equate to 155 Mbps (OC-3).
- For pricing purposes four DS-3 circuits will equate to 200 Mbps (155 Mbps + 45 Mbps).
- For pricing purposes pricing will be based on an aggregate bandwidth.
- Bandwidth can only be aggregated through Tier 6. Example: 20 OC-12 circuits would be priced in Tier 6.
- OC-48 pricing is stand-alone and cannot be comprised of aggregated bandwidth. OC-48 pricing is not eligible for the multi-circuit/multi-term volume discount and does not count towards the Minimum Monthly Recurring Charge (MMRC.)

Example: Customer purchases three DS-3 circuits and one OC-3 circuit. The aggregate bandwidth for the DS-3s would be 155 Mbps (per note above) plus the OC-3 bandwidth of 155 Mbps for a total bandwidth of 310 Mbps. This configuration would fall into the Tier 3 pricing structure.

B. Local Access Charges

Carrier will set up local access arrangements on behalf of Customer as requested for the Direct Line Service purchased. Any charges associated with the provisioning of the access circuits, including but not limited to, local access charges, coordination charges, access service order charges, or any other charge associated with gaining access from Customer premise to the Point-of-Presence (POP) will be considered access charges. This includes any NRC incurred in association with obtaining access regardless of contract term. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. Any such access charge as described above will be the responsibility of Customer. (T)

C. Additional Facility Charges

Back-haul charges and tail circuit charges may also apply when Customer requests service to any location where the direct line POP cannot support the requested type of service. Any charges associated with provisions of such additional facilities, including but not limited to back-haul, tail circuits, or any other charges associated with transition to/from non-listed cities will be considered additional facilities charges. This includes any NRC incurred regardless of contract terms. Any special construction or non-standard charges assessed by the company supplying additional facilities will also be the responsibility of Customer. Any such charge as described above will be the responsibility of Customer. (T)

SECTION 1 - RATES AND CHARGES (Continued)

1.19 Digital Private Line II Service

Unless otherwise noted, the following rates and charges will remain in effect for the term of Customer's contract.

Rates for Digital Private Line II Service are based on mileage between Carrier's Points-of-Presence (POPs) and bandwidth. Mileage calculations are in Rule 24. A "full service" private line circuit includes the following elements: (T)

Transport - interexchange carrier POP to interexchange carrier POP. (C)
Local Access Facilities - access line on both the originating and terminating ends of the circuit.

A. Transport (C)

Charges include a Nonrecurring Charge (NRC), a Monthly Recurring Charge (MRC) that is either a minimum charge or a per-mile rate, whichever is greater. Rates for mileage bands are based on a per-circuit basis.

Service Type	NRC	MRC	Mileage Band	Per Mile Rate
DDS 56 Kbps (T)	$100.00	$185.00	1 - 500 Miles	$ .67

1.19 Digital Private Line II Service (T)

Unless otherwise noted, the following rates and charges will remain in effect for the term of Customer's contract. (L)

Rates for Digital Private Line II Service are based on mileage between Carrier's Points-of-Presence (POPs) and on bandwidth. Mileage calculations are in Rule 24. A "full service" private line circuit includes the following elements:

Inter Office Channel - POP to POP transport.
Local Access Facilities - access line on both the originating and terminating ends of the circuit.

Inter Office Channel (IOC)

Charges include a Nonrecurring Charge (NRC), a Monthly Recurring Charge (MRC) that is either a minimum charge or a per-mile rate, whichever is greater. Rates for mileage bands are based on a per-circuit basis.

1.20.2 Port (T)

Charges include a Nonrecurring Charge (NRC) and a Monthly Recurring Charge (MRC) based on the speed of the port connection (i.e., 56 Kbps to 1.544 Mbps). Charges apply per port for each frame relay access facility to the network supporting Frame Relay II Service. Each port can accommodate multiple Permanent Virtual Circuits (PVCs). A port added to the network after initial installation will be considered a new element and the NRCs and MRCs will both apply. (L)

SECTION 1 - RATES AND CHARGES (Continued)

1.33 Direct Line Service - Rate Elements (Continued)

D. Multi-Circuit/Multi-Term Discount Plan

Carrier offers discounts based on the term of Customer's commitment to Carrier's service, quantity of Direct Line Service circuits purchased by Customer on a given contract, and on Customer's total inter office transport Monthly Recurring Charge (MRC) for Direct Line services. (T)

The Multi-Circuit/Multi-Term Discount Plan will be applied only to the monthly recurring inter office transport charge for Direct Line Service circuits as described above. It does not apply to any other rate elements. Further, this discount only applies to the current contract and does not apply to any existing circuits purchased on prior contracts or any proposed future circuits not ordered at the time of contract signing. Discounts apply per contract and are not cumulative.

Eligibility for this discount plan requires all of the following conditions: Contract term must be three or five years and must include three or more Direct Line Service circuits as described above. In addition, the Minimum Monthly Recurring Charge (MMRC) for the inter office transport must be $60,000 or greater, comprised of DS-3 through OC-12 Direct Line Service circuits. (T)

Customer contracts meeting all of the above requirements are entitled to a discount of 10% on five-year contracts and five percent on three-year contracts.

No other promotions or discounts apply to Direct Line Service with the exception of Competitive Response Promotion found in Carrier's Federal Rate Schedule 3. (T)

E. Expedite Fees

Carrier will charge Customer an expedite fee on a per-order basis.

Bandwidth	New Orders	Change Orders
DS3	$1,500	$1,000
OC3	2,000	1,250

1.34 One Wide Area Network (One WAN) Service - Rate Elements

One WAN Service includes the following rate elements. The pricing options outlined in this Tariff are mutually exclusive. Customer must price their entire network via Option 1 or Option 2.

A. Option 1

1. Local Access

Carrier will set up access arrangements on behalf of Customer as requested for One WAN Service purchased. Any charges associated with the provisioning of the access circuits, including but not limited to, local access charges, coordination charges, access service order charges, or any other charge associated with gaining access from Customer premise to the POP will be considered "Access Charges". This includes any Nonrecurring Charges (NRC) incurred in association with obtaining access regardless of contract term. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. Any such access charge as described above will be passed through to Customer in accordance with this Tariff.

2. Port

Port charges are subject to the speed of the port selected. A NRC and a Monthly Recurring Charge (MRC), based on the speed of the port connection, apply per port for each access circuit connection to the network supporting this service. Each port can accommodate multiple Permanent Virtual Connections (PVCs). The NRCs will be waived for two years or more contracts.

Rate Element	Nonrecurring Charge ($/port)	Monthly Recurring Charge ($/port)
DS-3	$ 3,000	$ 5,000
OC-3c	7,500	14,000
OC-12c	15,000	42,000

1.20.5 Discount Plans (T)

Carrier offers discounts based on the term of Customer's commitment to Carrier's service. Customers may subscribe to Frame Relay Service for term plans for one, two or three years. Discounts apply to and are calculated using MRCs for ports, UNI PVCs, NNI PVCs, management PVCs and NNI connection rates. Discounts do not apply to local access facilities, or NRCs. (C)

For any term plan, the rates and term plan discounts will be fixed for the term at the discounts listed in the Rates and Charges Section, applicable when Customer subscribes to the service. The term will begin on the first day of the month following the date the service is installed and available. Upon expiration, the term will be automatically extended at the one year term plan rates and discounts, unless 30 days prior to the end of the term written notice is given to Carrier that Customer does not want an extension, or Customer subscribes to another term plan and the rates of the new term apply.

If additional sites are added to Customer's Frame Relay Service after the initial subscription to a term plan, such sites will be incorporated in to Customer's term plan and will have the same termination date as Customer's original term plan.

1.20.6 Discount Plans (T)

Carrier offers discounts based on the term of Customer's commitment to Carrier's service. Customers may subscribe to Frame Relay Service for term plans for one, two or three years. Discounts apply to and are calculated using MRCs for ports, UNI PVCs, NNI PVCs, management PVCs, disaster recovery PVCs and NNI connection rates. Discounts do not apply to local access facilities, or NRCs. (L)

For any term plan, the rates and term plan discounts will be fixed for the term at the discounts listed in the Rates and Charges Section, applicable when Customer subscribes to the service. The term will begin on the first day of the month following the date the service is installed and available. Upon expiration, the term will be automatically extended at the one year term plan rates and discounts, unless 30 days prior to the end of the term written notice is given to Carrier that Customer does not want an extension, or Customer subscribes to another term plan and the rates of the new term apply.

If additional sites are added to Customer's Frame Relay Service after the initial subscription to a term plan, such sites will be incorporated in to Customer's term plan and will have the same termination date as Customer's original term plan.

3. Permanent Virtual Connections

The PVCC and PVPC monthly charges are subject to the selected class of service parameters and the transmission speed selected. The transmission speed selected for CBR is defined by PCR. The transmission speed selected for VBR-rt and VBR-nrt is SCR. The monthly flat rate charge for UBR class of service parameters is the maximum charge; no transmission speed can be designated for UBR PVCs.

The transmission speed charges as outlined in the Price Matrix are $/Mbps for these classes of service: CBR, VBR-rt and VBR-nrt. UBR is a fixed flat rate regardless of the speed utilized. The virtual connection MRC is a function of the class of service and transmission speed selected. The transmission speeds may range from 1-622Mbps, subject to the port speed. NRCs for PVCs will be waived for two years or more contracts.

1.21 Frame Relay III Service

This service is no longer available to new Customers. (C)

Unless otherwise noted, the following rates and charges will remain in effect for the full term of Customer's contract.

A. Local Access Facilities

Carrier will setup access arrangements on behalf of Customer when full service Frame Relay III Service is purchased.

Access facilities arranged by Carrier will be billed to Customer at Carrier's costs. Any special construction or non-standard charges assessed by the company supplying the local access, or by the underlying provider connecting to the access provider, will also be the responsibility of Customer.

B. Port

Charges include a Nonrecurring Charge (NRC) and a Monthly Recurring Charge (MRC) based on the speed of the port connection (i.e., 56 Kbps to 1.544 Mbps). Charges apply per port for each frame relay access facility to the network supporting Frame Relay Service. Each port can accommodate multiple Permanent Virtual Circuits (PVCs). A port added to the network after initial installation will be considered a new element and the nonrecurring and monthly charges will both apply.

D. Virtual Network-to-Network Interface (NNI) Port (L)

For each Virtual NNI port, a NRC and a MRC are applied per LATA, based on the Virtual NNI port speed required. The Virtual NNI port must be large enough to accommodate the cumulative egress of all PVCs connected to the NNI. It will be at least as large as the sum of the CIRs for all PVCs connected to it and at least as large as the largest User to Network Interface (UNI) port connected to it. The Virtual NNI port should be approximately equal to or less than one third of the aggregate of the UNI port speeds connected to it.

3. Permanent Virtual Connections

The PVCC and PVPC monthly charges are subject to the selected class of service parameters and the transmission speed selected. The transmission speed selected for CBR is defined by PCR. The transmission speed selected for VBR-nrt is SCR. The monthly flat rate charge for UBR class of service parameters is the maximum charge regardless of the speed of transmission.

The transmission speed charges as outlined in the Price Matrix are $/Mbps or $/Kbps for these classes of service: CBR and VBR-nrt. UBR is a fixed flat rate regardless of the speed utilized. UBR price is a monthly flat rate and subject to the lower of the originating or terminating port. The transmission speeds are subject to the port speed. NRCs for PVCs will be waived for two years or more contracts.

1.38 Digital Private Line II Service

Unless otherwise noted, the following rates and charges will remain in effect for the term of Customer's contract.

Rates for Digital Private Line II Service are based on mileage between Carrier's Points-of-Presence (POPs) and on bandwidth. Mileage calculations are in Rule 24. A "full service" private line circuit includes the following elements:

Inter Office Channel - POP to POP transport.
Local Access Facilities - access line on both the originating and terminating ends of the circuit.

Inter Office Channel (IOC) (T)

Charges include a Nonrecurring Charge (NRC), a Monthly Recurring Charge (MRC) that is either a minimum charge or a per-mile rate, whichever is greater. Rates for mileage bands are based on a per-circuit basis. (C) (C)

Service Type	NRC	MRC	Mileage Band	Per Mile Rate	(C)

Local Access Facilities (M)

Carrier will setup access arrangements on behalf of Customer when full-service Digital Private Line II Service is purchased. Access facilities arranged by Carrier will be billed to Customer at Carrier's costs. Any special construction or non-standard charges assessed by the company supplying the local access will also be the responsibility of Customer. (M) (C) (M)

Carrier must also set up access arrangements on behalf of Customer as requested for services purchased. Any charges associated with provisioning of the access service, including but not limited to, local access charges, coordination charges, access service order charges, or any other charges associated with gaining access from Customer premise to the POP will be considered "Access Charges". This includes any NRCs incurred in association with obtaining access regardless of contract term. Any such charges as described above will be passed through to Customer in accordance with this Tariff. (N) (N)

Term Discount Plan

Carrier will discount all MRCs for Digital Private Line II Service. This discount will be based on Customer's contract term. The following discounts will apply for IOC only. (C)

Term Commitment	Discount Applied	(D)
2-Year	10%	(C)
3-Year	15%	(C)

NRC Waiver

Carrier will waive all NRCs for inter office channel and local access rates. To qualify for the NRC waiver, Customer must agree to a minimum term of two years or greater.

(D)

Expedite Charge

If Customer requests that an order for DS-0 and DS-1 service be expedited, a charge of $750.00 will apply.

1.25 Frame Relay IV Service (T)

Unless otherwise noted, the following rates and charges will remain in effect for the full term of Customer's contract. (N)

A. Local Access Facilities

Carrier will establish access arrangements on behalf of Customer when Full Service Frame Relay IV Service is purchased.

Under the terms of the Full Service Agreement, Carrier will order access facilities. Coordination of installation, maintenance, repair, test and turn-up will be coordinated by Carrier with the company(ies) supplying the access services. Customer will be billed for the access at Carrier's costs. Any special construction or non-standard charges assessed by the company supplying the local access, or by the underlying provider connecting to the access provider, will also be the responsibility of Customer.

1. Local Access Coordination Charges

- Access Coordination Charges are applied on a per-access line basis.
- Access Coordination Charges are waived for contract terms greater than one year.

Nonrecurring Local Access Coordination Charges

DS-0	$ 25
DS-1	50
DS-3	100

B. Low Speed Frame Relay Rate Schedules (DS-1 speed and below)

1. Low Speed National UNI Port

Charges include a Monthly Recurring Charge (MRC) based on the speed of the port connection (i.e., 56 Kbps to 1.536 Mbps). Charges apply per UNI port for each Frame Relay access facility to the network supporting Frame Relay IV Service. Each port can accommodate multiple PVCs. A port added to the network after initial installation will be considered a new element and the total network MRC will be adjusted incrementally for that port. This interface transports data traffic to and from Customer's facilities to Carrier's network for transport to, for example, other Customer facility locations. (N)

2. Low Speed National NNI Port

Charges include a MRC based on the speed of the port connection (i.e., 56 Kbps to 1.536 Mbps). Charges apply per port for each NNI Frame Relay internetwork connection supporting Frame Relay IV Service. This interface transports data traffic to and from Customer's LAN/WAN facilities or local Frame Relay network service to Carrier's interLATA interstate network for transport to, for example, other Customer facility locations.

4. National Low Speed PVC - NNI-NNI PVC, NNI-UNI PVC, and UNI-UNI PVC

Charges for each PVC are based upon the CIR. A PVC added to the network after initial installation will be considered a new element and the total network MRC will be adjusted incrementally for that PVC.

5. Allowable CIR

The allowable CIR for any PVC is based on the lower speed of the two Frame Relay ports at either end of the PVC. This speed is termed the Line Speed. The allowable CIR for Low Speed Frame Relay is 75% of the Line Speed. For example, on a PVC with a 384 Kbps port and a 256 Kbps port, the Line Speed for determining the allowable CIR would be 256 Kbps. For this PVC, the highest allowable PVC/CIR would be 192 Kbps.

6. Maximum Burst

The Maximum Burst is the highest allowable bandwidth available on a PVC. The Maximum Burst available on a Low Speed PVC will be to the Line Speed, which is the lowest speed of the ports at either end of the PVC.

1.43 Frame Relay II Service

This service is no longer available to new Customers. (C)

Unless otherwise noted, the following rates and charges will remain in effect for the full term of Customer's contract.

1.43.1 Local Access Facilities

Carrier will setup access arrangements on behalf of Customer when full service Frame Relay II Service is purchased.

Access facilities arranged by Carrier will be billed to Customer at the rates of the underlying carrier. Any special construction or non-standard charges assessed by the company supplying the local access, or by the underlying provider connecting to the access provider, will also be the responsibility of Customer.

1.43.2 Port

Charges include a Nonrecurring Charge (NRC) and a Monthly Recurring Charge (MRC) based on the speed of the port connection (i.e., 56 Kbps to 1.544 Mbps). Charges apply per port for each frame relay access facility to the network supporting Frame Relay Service II. Each port can accommodate multiple Permanent Virtual Circuits (PVCs). A port added to the network after initial installation will be considered a new element and the NRCs and MRCs will both apply.

SECTION 1 - RATES AND CHARGES (Continued)

1.25 Frame Relay IV Service (Continued)

B. Low Speed Frame Relay Rate Schedules (DS-1 speed and below) (Continued)

7. Oversubscription (Booking Factor)

Oversubscription occurs when the bandwidth of multiple PVCs are provisioned to a single port and the total of their CIR values exceeds the transmission speed for the port. The allowable Oversubscription is 300%. For example, a 64 Kbps port may have as much as 192 Kbps of PVC/CIR provisioned to that port.

For UNI ports provisioned with Oversubscription, the total available bandwidth for all PVCs is limited to the transmission speed of the port. During any given one-second interval, the total bandwidth available for CIR and Burst performance across all PVCs provisioned to a single port is limited to the capacity of the port, the port speed. Oversubscription should only be used in cases where the bursty nature of Customer's applications and simultaneous bandwidth demand permits such practice.

C. High Speed Frame Relay IV Service

1. National High Speed Frame Relay UNI Port

Charges include a MRC based on the speed of the port connection (i.e., 4 Mbps to 44.736 Mbps). Charges apply per port for each Frame Relay access facility to the network supporting Frame Relay IV Service. Each UNI port can accommodate multiple PVCs. A port added to the network after initial installation will be considered a new element and the total network MRC will be adjusted incrementally for that port.

2. National High Speed Frame Relay NNI Port

The NNI port provided herein is not available where Customer LAN connectivity is required. When such LAN connectivity is required and facilities are available, Carrier will enter negotiations with Customer to provide an NNI port through an ICB arrangement.

3. Rate Schedule

1.43.6 Discount Plans

Carrier offers discounts based on the term of Customer's commitment to Carrier's service. Customers may subscribe to Frame Relay Service for term plans for one, two or three years. Discounts apply to and are calculated using MRCs for ports, UNI PVCs, NNI PVCs, management PVCs, disaster recovery PVCs and NNI connection rates. Discounts do not apply to local access facilities, or NRCs.

For any term plan, the rates and term plan discounts will be fixed for the term at the discounts listed in the Rates and Charges Section, applicable when Customer subscribes to the service. The term will begin on the first day of the month following the date the service is installed and available. Upon expiration, the term will be automatically extended at the one year term plan rates and discounts, unless 30 days prior to the end of the term written notice is given to Carrier that Customer does not want an extension, or Customer subscribes to another term plan and the rates of the new term apply.

If additional sites are added to Customer's Frame Relay Service after the initial subscription to a term plan, such sites will be incorporated in to Customer's term plan and will have the same termination date as Customer's original term plan.

A. Term Plan

Min. Monthly Revenue	Term		
Commitment	1 Year	2 Years	3 Years
$1,000	4.0%	6.0%	9.0%

SECTION 1 - RATES AND CHARGES (Continued)

1.25 Frame Relay IV Service (Continued) (T)

C. High Speed Frame Relay IV Service (Continued) (N)

3. Allowable CIR

The allowable CIR for High Speed Frame Relay IV is 50% of the Line Speed. For example, on a PVC with a 6 Mbps port and a 10 Mbps port, the Line Speed for determining the allowable CIR would be 6 Mbps. For this PVC, the highest allowable PVC/CIR would be 3 Mbps.

4. Maximum Burst

For PVCs from 2 Mbps to 22 Mbps, which will always be provisioned between two High Speed Frame Relay (HSFR) ports, the Maximum Burst is 2 x CIR. For this parameter, the B_c, Committed rate, and the B_e, Excess rate, will be configured as equal variables (CIR = B_c = B_e, equal parameters). For example, a 4 Mbps PVC can burst to 8 Mbps and a 12 Mbps PVC can burst to 24 Mbps.

For circuits between two High Speed Frame Relay ports with Low Speed PVCs, the following burst rules apply:

- For PVCs with CIR of 1.152 Mbps or less, the Maximum Burst is 1.536 Mbps.
- For PVCs with CIR equal to 1.536 Mbps, the Maximum Burst is 2 times 1.536 Mbps.

5. Oversubscription (Booking Factor)

Oversubscription occurs when the bandwidth of multiple PVCs are provisioned to a single port and the total of their CIR values exceeds the transmission speed for the port. The allowable Oversubscription is 300%. For example, a 6 Mbps port may have as much as 18 Mbps of PVC/CIR provisioned to that port.

For UNI ports provisioned with Oversubscription, the total available bandwidth for all PVCs is limited to the transmission speed of the port. During any given one-second interval, the total bandwidth available for CIR and Burst performance across all PVCs provisioned to a single port is limited to the capacity of the port, the port speed. Oversubscription should only be used in cases where the bursty nature of Customer's applications and simultaneous bandwidth demand permits such practice. (N)

1.43.8 Other Discounts

NRC Waiver

For new Customers ordering Frame Relay II Service, or for Customers who commit to a two or more year term, Carrier may waive NRCs for the ports, UNI PVCs, NNI PVCs, management PVCs, disaster recovery PVCs, NNI and/or standard local access facilities elements. If Customer terminates a term agreement within two years after installation of service, Customer will be assessed the full amount of the credit for waived charges as well as any early termination charges per the Tariff for the applicable service.

D. Additional Charges (N)

1. Expedite Fee

Carrier may offer expedites for Frame Relay IV Service. Carrier does not guarantee a shortened installation interval will be achieved for every accepted expedite request. The expedite charge will be $425.00 per node and will be applied to the first bill rendered for the circuit even if a shortened installation interval was not achieved.

2. Ancillary Charges

Ancillary Charge Schedule

Description	Charge	Notes
Date Change	$ 100.00	Per Order
Non-Administrative Order Change	250.00	Per Order
Port Speed Change	100.00	Per Port
Port Order Cancellation	250.00	Per Port - T-1 and Below
Port Order Cancellation	1,000.00	Per Port - 4 Meg and Above

E. Discount Plans

Carrier offers discounts based on the term of Customer's commitment to Carrier's service. Customers may subscribe to Frame Relay IV Service for term plans of one, two, three, and five years. The Monthly Revenue Commitment together with the term of the contract will determine the amount of the discount. The sum of the UNI and NNI ports, PVCs, and Access MRCs and the Expedite fees before discounts is the Monthly Revenue Commitment. Discounts do not apply to local access facilities, NRCs, or expedite fees.

For any term plan, the rates and term plan discounts will be fixed for the term of the contract at the discounts listed in the table below, applicable when Customer subscribes to the service. The term will begin on the in-service date of the first circuit in the network.

SECTION 1 - RATES AND CHARGES (Continued)

1.44 Frame Relay III Service (T)

Unless otherwise noted, the following rates and charges will remain in effect for the full term of Customer's contract. (N)

A. Local Access Facilities

Carrier will setup access arrangements on behalf of Customer when full service Frame Relay III Service is purchased.

Access facilities arranged by Carrier will be billed to Customer at Carrier's costs. Any special construction or non-standard charges assessed by the company supplying the local access, or by the underlying provider connecting to the access provider, will also be the responsibility of Customer.

B. Port

Charges include a Nonrecurring Charge (NRC) and a Monthly Recurring Charge (MRC) based on the speed of the port connection (i.e., 56 Kbps to 1.544 Mbps). Charges apply per port for each frame relay access facility to the network supporting Frame Relay Service. Each port can accommodate multiple Permanent Virtual Circuits (PVCs). A port added to the network after initial installation will be considered a new element and the nonrecurring and monthly charges will both apply.

Speed (Kbps)	NRC	MRC	
56/64 Kbps	$300.00	$ 133.75	(D)
128 Kbps	300.00	278.20	(D)

F. Other Discounts (N)

1. NRC Waivers

NRCs will be waived for all standard term contracts equal to or greater than one year for Ports and PVCs. NRCs are waived for Access Coordination charges for contract terms greater than one year. NRCs for Access Coordination on a one-year contract are specified in Section 1.25 A. 1.

NRC charges may be applied for Moves, Adds, and Changes (MAC) within one year of the normal termination of a contract. Additional circuits added during the contract will be incorporated into Customer's term plan and will have the same termination date as Customer's original plan, provided they are installed prior to the last 12 months of the contract.

G. Contract Expiration

Upon contract expiration, Carrier may continue service with charges at the expired contract rates or may apply tariff rates on a month-to-month basis until a new contract agreement is executed. Should Customer choose to terminate service, Customer must provide a written "Termination of Service" notification to Carrier 30 days prior to discontinuation of the service. Should Customer choose to commit to another term plan, the rates of that plan will then apply. (N)

2. If Customer chooses to purchase a management PVC which will be utilized as part of a network service, the management PVC must originate at Customer's premises and terminate at the associated Carrier Center. For management PVC rate, please refer to zero CIR MRC and NRC in C.1.

3. If Customer chooses to purchase an international management PVC, which will be utilized as part of a network service, the international management PVC must originate at Customer's international premises and terminate at the associated Carrier Center. International Frame Relay Service is offered on an individual case basis. (N)

D. Virtual Network-to-Network Interface (NNI) Port

For each Virtual NNI port, a NRC and a MRC are applied per LATA, based on the Virtual NNI port speed required. The Virtual NNI port must be large enough to accommodate the cumulative egress of all PVCs connected to the NNI. It will be at least as large as the sum of the CIRs for all PVCs connected to it and at least as large as the largest User to Network Interface (UNI) port connected to it. The Virtual NNI port should be approximately equal to or less than one third of the aggregate of the UNI port speeds connected to it.

I. Other Discounts

NRC Waiver

For Customers who commit to a two or more year term, Carrier may waive NRCs for the ports, PVCs (UNI, NNI, management, disaster recovery), Virtual NNI ports, and/or standard local access facilities elements. The expedite fee will not be subject to the NRC waiver. If Customer terminates a term agreement within two years after installation of service, Customer will be assessed a pro rata amount of the credit for waived charges as well as any early termination charges per the Tariff for the applicable service.

J. Contract Expiration

Upon contract expiration, the term will be automatically extended at the one-year term plan rates and discounts, unless 30 days prior to the end of the term, written notice is given to Carrier that Customer does not want an extension, or Customer subscribes to another term plan and the rates of the new term apply.

K. Additional Features

Expedite Fee

If Customer requests that an order for Frame Relay III Service be expedited, a charge of $750.00 will apply per node. (N)

10) International Dial-In Access – The Service offers two methods for international participants to connect to Carrier's U.S. based conferencing services: International Toll-Free Numbers (ITFN) and Direct Dial Access.

ITFNs are available in selected countries. The participant dialing the IFTN will not be charged. The Customer will be charged a per-minute fee for the IFTN usage. This charge is in addition to the applicable per minute Toll Direct Dial rate specified in Section 1.27.A. above and varies by country. Customers and participants using the Direct Dial Access number may access the Service using a carrier of their choice and shall be responsible for any rates billed by their selected carrier in addition to the rates for use of the Service as set forth in this Schedule.

10) International Dial-In Access – The Service offers two methods for international participants to connect to Carrier's U.S. based conferencing services: International Toll-Free Numbers (ITFN) and Direct Dial Access.

ITFNs are available in more than 50 countries and are local toll-free numbers. The participant dialing into the conference from another country is making a free call (the equivalent of a 1-800 call in the US) and will not be charged. The Customer will be charged a per-minute fee to cover both the call within the foreign country and the international connection to the US as depicted below. This charge is in addition to the applicable per minute Toll Direct Dial rate specified in Section 1.27.A. above and varies by country. Customers and participants using the Direct Dial Access number may access the Service using a carrier of their choice and shall be responsible for any rates billed by their selected carrier in addition to the rates for use of the Service as set forth in this Schedule.
