GENERAL CUSTOMER SERVICES TARIFF

GTE SOUTH INCORPORATED
SOUTH CAROLINA

ISSUED: March 27, 1985
BY: Vice President
Durham, North Carolina

Original Page 1

EFFECTIVE: March 27, 1985
In Compliance with the Commission's
Order No. 85-200 in Docket No. 84-390-C

S5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

S5.1 Construction Charges

S5.1.1 General

- a. Construction charges are applicable to customers under certain conditions for the establishment or rearrangement of telephone service when suitable plant facilities are not available or when the construction of the necessary facilities involves excessive costs.
- b. Construction charges apply in addition to the rate for the class of service furnished and any service connection charge, service change charge, installation charges, nonrecurring charge, mileage charge or other similar charges that may apply.
- c. Title to all construction, provided wholly or partly at a customer's expense, is vested in the Company
- d. The word "cost", when used in this Section, means the inplant cost consisting of labor, engineering, materials, supervision, and other overhead expenses associated with the construction. Estimated cost will be used; however, where the customer requests, actual cost will be used where practicable.
- e. When attachments are made to poles of other companies in lieu of providing new pole line construction for which construction charges would be applicable under the provisions of this Section, the attachment rental charges to the Company for such attachments may be assessed to the applicant(s) in whole or in part as the particular circumstances may warrant.
- f. Except as otherwise provided herein, the regulations in this tariff contemplate that the type of construction required to provide the quantity and class of service involved will be determined by the Company. The applicant may be required to pay the additional costs involved where a different type of construction than that proposed by the Company is desired.
- g. When an applicant is so located that it is necessary to use private right-of-way to furnish service and the Company is unable to obtain the required right-of-way without cost, the applicant may be required to pay the costs incurred in securing, clearing, and retaining such right-of-way.

S5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

S5.1 Construction Charges (Continued)

S5.1.1 General (Continued)

- h. Where a customer elects to provide and install underground conduit, dig and backfill trenches, and provide and erect poles, it must be in accordance with the specification of the Company.

S5.1.2 Construction on Public Highways or Other Easements

- a. No construction charge is applicable for the general provision of service along public highways or other public easements, except as follows:

Where an applicant desires service in an area not presently served and where there is no foreseeable potential growth, the Company will provide 2500 feet of new construction at no charge, and all other construction charges will be borne by the applicant.

S5.1.3 Construction on Private Property

- a. Distribution Facilities

- (1) No charge is made for construction of distribution facilities on private property, when such construction conforms to Company construction practices and is to be used in serving customers in general. Where an applicant desires any type of construction other than that determined to be appropriate by the Company, the applicant may be required to bear the increases costs incurred by the Company. (T)
(T)

- (2) Where construction of distribution facilities is provided on private property and is not to be used in serving customers in general, the applicant may be required to bear all costs incurred by the Company for construction in excess of 500 feet. (T)

- b. Drop Wire Facilities (C)

- (1) (D)
(D)
(C)
Where an applicant desires any type of construction other than that determined to be appropriate by the Company, the applicant may be required to bear the increased cost incurred by the Company. Construction charges will not apply to the drop facility that extends from the distribution facility to the general location of the station instrument when such construction conforms to Company construction practices and the drop facility is not in excess of 1,000 feet. The applicant may be required to bear all costs incurred by the Company for a drop in excess of 1,000 feet. (T)

S5.1.3 Construction on Private Property (Continued)

b. Service Entrance Facilities (Continued)

(D)

|

(D)

(2) Where armored cable is laid in a trench, the trench shall be constructed and backfilled by or at the expense of the customer. In addition, the customer shall pay the cost of the cable - including the cost of installing - less the estimated cost to the Company of installing such aerial drop as would be (or is) required to furnish the same service. (T)

(3) Where facilities are changed from aerial to underground in addition to the above, the customer may be charged the cost of dismantling and removing the aerial facilities. (T)

c. Supporting Structures for Plant Facilities for Extension Lines

Where for the purpose of furnishing extension lines, it is necessary to lay underground conduit, to trench, or to set poles on the customer's premises, the customer is required to provide and install such underground conduit, to dig and backfill trenches and to provide and erect such poles or the Company will perform the work at the customer's expense.

S5.1.4 Rearrangement of Existing Plant

When the Company is requested to move or change existing plant for which no specific charge is quoted in this Tariff, the person at whose request such move or change is made may be required to bear the costs incurred.

S5.1 Construction Charges (Continued)

S5.1.3 Construction on Private Property (Continued)

b. Service Entrance Facilities (Continued)

- (2) Cable or wire installed in conduit will be maintained and replaced at the expense of the Company where the conduit has been inspected in place by the Company and approved, but repairs or replacements of cable or wire in conduit not so inspected and approved, or repairs or replacements of cable or wire in conduit or trench made necessary by damages caused by the customer or his representative will be made only at the customer's expense.
- (3) Where armored cable is laid in a trench, the trench shall be constructed and backfilled by or at the expense of the customer. In addition, the customer shall pay the cost of the cable - including the cost of installing - less the estimated cost to the Company of installing such aerial drop as would be (or is) required to furnish the same service.
- (4) Where facilities are changed from aerial to underground in addition to the above, the customer may be charged the cost of dismantling and removing the aerial facilities.

c. Supporting Structures for Plant Facilities for Extension Lines

Where for the purpose of furnishing extension lines, it is necessary to lay underground conduit, to trench, or to set poles on the customer's premises, the customer is required to provide and install such underground conduit, to dig and backfill trenches and to provide and erect such poles or the Company will perform the work at the customer's expense.

S5.1.4 Rearrangement of Existing Plant

When the Company is requested to move or change existing plant for which no specific charge is quoted in this Tariff, the person at whose request such move or change is made may be required to bear the costs incurred.

S5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

S5.1 Construction Charges (Continued)

S5.1.5 Construction Required for Temporary Service

When construction is required for temporary service and there is no immediate prospect of reusing the plant provided, the customer may be required to bear all or a portion of the cost of such construction, plus the estimated cost of removal of the plant minus net salvage.

S5.1.6 Special Types of Construction

When a special type of construction other than those covered preceding is desired by a customer or where the individual requirements of a particular situation make the construction unusually expensive, the customer is required to pay the additional expense incurred by the Telephone Company, determined as follows: the difference between the expense incurred by the Telephone Company for such construction, facilities or installation and the expense which would otherwise be incurred for a normal type of construction or facilities for a normal installation.

Special Service Arrangements

- a. Where practicable, special equipment and arrangements, not otherwise provided for in this tariff, are furnished if they are in accord with authorized service offerings and if they are to be used in connection with and not detrimental to any of the services furnished by the Company. Charges for such special service arrangements will be based on the estimated costs of furnishing them, such costs to consist of the following items to the extent they are applicable:

GENERAL CUSTOMER SERVICES TARIFF

GTE SOUTH INCORPORATED
SOUTH CAROLINA

ISSUED: July 2, 1993
BY: Vice President
Durham, North Carolina

First Revised Page 6

EFFECTIVE: July 20, 1993

S5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

S5.3 Special Service Arrangements (Continued)

a. (Continued)

- (1) Cost of maintenance.
- (2) Cost of operation.
- (3) Depreciation on the estimated cost installed of the facilities provided, based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage.
- (4) Administration and taxes on the basis of reasonable average charges for these items.
- (5) Any other specific items of expense associated with the particular situation.
- (6) A reasonable amount, computed on the estimated cost installed of the facilities provided, for return and contingencies.

b. Estimated cost installed as mentioned in (3) and (6) above includes cost of equipment and material specifically provided or used plus the estimated cost of installing, including engineering, labor, supervision, transportation, right-of-way, and any other investment items.

c. Rates

The rates, charges and contract terms for the following items have been established as specified in S5.3.a. above to meet the particular requirements of certain customers at the locations indicated.

S5.3.1 Shaw Air Force Base, South Carolina

(C)

a. General

- (1) This service is furnished by means of the serving method selected by the Telephone Company to effect the most appropriate use of available facilities. Where the customer insists upon other than the normal serving method, as determined by the Telephone Company, additional charges will apply based upon the estimated excess costs involved.

S5.3 Special Service Arrangements (Continued)

S5.3.1 Shaw Air Force Base, South Carolina (Continued)

(C)

a. General (Continued)

- (2) All operating at the customer's premises is performed at the expense of the customer and must conform with the operating practice and procedures of the Telephone Company to maintain a proper standard of service.
- (3) Where quantities of switching equipment, central office lines or other facilities in excess of those needed to meet the standard service objectives of the Telephone Company are requested by the customer, such additional facilities will be furnished at regular rates and charges for the individual items as set forth in other sections of this tariff.
- (4) Tie lines for direct connections between this system and other systems are provided primarily for communication between stations of the two systems. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing exchange and toll calls through this system to or from another system, provided such connections to the exchange or toll network are only made at one system at a time.
- (5)
- (6) The provision of this special service arrangement at the rates and charges herein specified is contingent upon the continuance, under separate contract between the customer and the Telephone Company, of the on-base administrative telephone distribution plant. The premises of the customer is defined as any point falling within the geographical area known as Shaw Air Force Base, South Carolina.

S5.3.5 CentraNet[®] Service for Horry County Government

(N)

a. General

- (1) This CentraNet[®] Service will be furnished at the rates, rules, and regulations specified herein for Horry County Government.
- (2) CentraNet[®] Service is an electronic switching system provided from a central office which offers premium, versatile, and advanced communication features and service. The customer purchases his access line (local loop) separately from his flat usage component (blocks of busy hour capacity minutes-of-use (MOUS). The flat usage component is commonly referred to as a Network Access Register (NAR).
- (3) CentraNet[®] service will be furnished at applicable rates and charges in serving areas where facilities permit.
- (4) Customer premises equipment associated with this service is provided by the customer.
- (5) Directory listings of CentraNet[®] Service will be provided in accordance with the regulations and rates as specified in Section S6 of this tariff.
- (6) The rates and charges for Main Stations are applicable to each Main Station location to which a customer-provided instrument can be connected.
- (7) Service Charges as specified in Section S4 of this Tariff apply to all customer-requested moves and changes performed by the Company on the customer's premises.
- (8) Exchange Access
 - (a) Exchange Access is provided by means of Network Access Registers.
 - (b) Presubscription of a Carrier of Preference is specified in Section 6 of the FCC GTOC #1 Tariff and Section S6.5 of the Intrastate Access Services Tariff.

a. General (Continued)

(9) Main Station Line Terminated as an Automatic Access Line

- (a) Where a CentraNet[®] Main Station Line is terminated as an Automatic Access Line in customer provided equipment, an appropriate recurring charge as specified in Section S12.1.6b.(6) will apply in addition to the appropriate Main Station and NAR rate.

- (10) Where the CentraNet[®] station being provided involves a location in a different central office area of an exchange, the mileage charge and measurement as specified in Section S9.2.2 for foreign central office mileage is applicable for each interoffice channel required.

- (11) Where CentraNet[®] stations of the same system are located in different exchanges, a foreign exchange mileage charge applies for each interexchange channel involved as specified in Section S9.1.3.

End User charges as specified in Section 13 of the GTE Telephone Operating Companies Tariff F.C.C. No. 1 will apply to each CentraNet[®] Main Station Line.

b. CentraNet[®] Features

- (1) CentraNet[®] features provided to Horry County Government are:

Automatic Identification of Outward Dial (AIOD), Call Alternation, Call Forward (All, Busy, Busy Line (T)
Don't Answer, Fixed), Call Hold, Call Pick-Up (Extended, Direct and Group), Call Transfer (all (T)
types), Call Waiting Dial, Call Waiting Originating, Call Waiting Terminating/Cancel, Common
Recorded Announcement on Intercept, Consultation

(9) Main Station Line Terminated as an Automatic Access Line

- (a) Where a CentraNet[®] Main Station Line is terminated as an Automatic Access Line in customer provided equipment, an appropriate recurring charge as specified in Section S12.1.6b.(6) will apply in addition to the appropriate Main Station and NAR rate.

- (10) Where the CentraNet[®] station being provided involves a location in a different central office area of an exchange, the mileage charge and measurement as specified in Section S9.2.2 for foreign central office mileage is applicable for each interoffice channel required.

- (11) Where CentraNet[®] stations of the same system are located in different exchanges, a foreign exchange mileage charge applies for each interexchange channel involved as specified in Section S9.1.3.

End User charges as specified in Section 13 of the GTE Telephone Operating Companies Tariff F.C.C. No. 1 will apply to each CentraNet[®] Main Station Line.

b. CentraNet[®] Features

- (1) CentraNet[®] features provided to Horry County Government are:

Automatic Identification of Outward Dial (AIOD), Call Alternation, Call Forward (All, Busy, No Answer-Fixed/Variable), Call Hold, Call Pick-Up (Extended, Direct and Group), Call Transfer (all types), Call Waiting Dial, Call Waiting Originating, Call Waiting Terminating/Cancel, Common Recorded Announcement on Intercept, Consultation

Hold, Direct Inward Dialing/Direct Outward Dialing (DID/DOD), Distinctive Ringing, Hunting (Pilot Number, Directory Number and Secretarial), Last Number Redial, Speed Dial Short List (Individual), Station-to-Station Calling, Station Restriction, Three-Way Calling, Toll/Code Restriction, and Touch Call. (T)

c. Definition of Features

Automatic Identification of Outward Dial:

This feature identifies all calls leaving the customer group by the station number from which calls are placed.

Call Alternation:

This feature allows a station user to hold one call, make another call then talk alternately between the two parties.

Call Forwarding:

This feature provides the option of fixed and/or variable forwarding of a station's incoming calls to a predetermined number. Includes all calls or only calls reaching a busy or no answer condition (Fixed Forwarding is established and changed by the Telephone Company, whereas variable forwarding is established and changed by the station user).

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

(N)

c. Definition of Features (Continued)

Call Hold:

Allows a Main Station user to place any call involving their Main Station on hold by flashing and dialing a special code. The Main Station is then free to originate another call. The call is then retrieved by dialing the hold code a second time or by hanging up the phone.

Call Pick-Up Direct:

This feature permits a station user to pick up any ringing station in the business group by dialing a feature code plus the ringing station's intercom number. The ringing station is not required to be in the same pick-up group.

Call Pick-Up-Extended:

This feature permits a station user to dial a code to apply call pick up to groups other than its own.

Call Pick-Up-Group:

This feature permits a station user to dial a code to answer a call which is ringing at another station within the call pick-up group.

Call Transfer:

Call Transfer provides for the transfer, by a CentraNet[®] station, of calls within or outside the business group. The Three-Way Calling feature is needed in addition to Call Transfer for this feature to work.

Call Waiting Cancel:

Call Waiting Cancel allows the customer with Call Waiting Service to inhibit the operation of Call Waiting for one call.

S5.3 Special Services Arrangements (Continued)

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

(N)

c. Definition of Features (Continued)

Call Waiting Dial:

This feature provides the ability for originating Main Stations to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the called station. This differs from Call Waiting Originating in that the call wait tone activation is selective, rather than automatic, on all calls.

Call Waiting Originating:

This feature allows the party making the call to activate Call Waiting on a busy line at completion of dialing on a per call basis.

Call Waiting Terminating:

Informs a busy Main Station Line, when the Main Station Line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the connection while answering the new call and return to the original connection. This can be on all calls or inter-business group calls only.

Common Recorded Announcement on Intercept:

This provides a standard recording for intercept of calls to unassigned numbers.

Consultation Hold:

This feature allows the initiator of a three-way call or transfer to speak privately with the third party before completing the connection.

S5.3 Special Services Arrangements (Continued)

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

(N)

c. Definition of Features (Continued)

Direct Inward Dialing:

This feature allows incoming calls from the exchange network to reach a specific station without attendant assistance.

Direct Outward Dialing:

This feature allows station users to place external calls to the exchange network without attendant assistance.

Distinctive Ringing:

This feature permits a station user to determine by the cadence of the ringing, whether a call is internal or external.

Directory Number Hunting:

This feature activates hunting when any of the directory numbers of the individual lines in the hunt group are called. If that line is busy, hunting will start with that line and continue to the end of the list.

Hunting (Distributed):

Only a pilot DN is associated with this hunt group. Hunting starts after the first idle line found by the previous hunt and continues until the starting point of the hunt is reached.

Hunting (Pilot Number):

This feature provides for an incoming call to a fictitious pilot number to hunt through a rotary group of main station lines to the end of that group.

Hunting (Secretarial):

This feature provides hunting within a department to hunt to the secretary last.

S5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

S5.3 Special Services Arrangements (Continued)

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

c. Definition of Features (Continued)

Last Number Redial:

This feature allows a station user to redial the last number dialed by utilizing an access code.

Speed Dialing Short List (Individual):

(T)

Lets the Main Station user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number. Where technology exists, up to 24 dialed digits can be stored.

Station-to-Station Calling:

This feature allows station users to call each other using abbreviated dialing.

Station Restriction:

Semi-restricted permits the customer to have selected Main Stations restricted from receiving any calls from outside the business customer group or from making any calls outside the business customer group. Intercom calling and private facilities are accessible. Fully restricted blocks calls to and from the attendant in addition to those from/to outside the customer business group.

Three-Way Calling:

This feature permits a station user using the Consultation Hold feature to put one party on hold, reach a third party, and bring all three parties together in a three-way connection.

(N)

c. Definition of Features (Continued)

Toll-Code Restriction:

This feature prevents customer designated stations from placing any chargeable calls. Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for as specified in other sections of this tariff. Nonrecurring charges will be waived for customers subscribing to the 900/976 Toll Restriction Only Option.

Touch Call

This feature equips all station lines for touch call dialing.

d. Liability of the Telephone Company

- (1) The Telephone Company makes no guarantee and assumes no liability for the accuracy, performance or non-performance of the CentraNet[®] Service Features except as shown in Section S2.5 of this tariff.

e. Conditions

- (1) The rates and charges for CentraNet[®] Service apply to establishment of CentraNet[®] Service only. Other services as provided for in other sections of the Tariff may be furnished in connection with this service at rates and charges specified for such services.
- (2) CentraNet[®] Service is offered on a contractual basis commencing on the date the service is established.
 - (a) The rate per CentraNet[®] Line applies each month from the time the System is placed in service until the CentraNet[®] Service is discontinued.

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

(N)

e. Conditions (Continued)

- (3) In the event that the CentraNet[®] Service is terminated by the customer prior to completion of the initial contract period, the Company will develop the applicable contract termination charge using the formula described below and levy it for payment by the customer.
 - (a) In the event of termination of CentraNet[®] Service during the contract period, the customer will remain liable for the balance of contract period rates adjusted to their then present worth equivalent, based upon a 12% discount rate, which shall upon any such termination immediately become due and payable in their entirety.
 - (b) In the event the customer reduces the number of CentraNet[®] lines initially contracted, by 20% or more, the termination liability as specified in (a) above is applicable and will be based upon the initial number of lines under contract, as set forth following.
- (4) Expiration of Contract Period:
 - (a) The CentraNet[®] customer must upon the expiration of his contract select a new contract period.
 - (b) The CentraNet[®] customer may at any time during his selected payment period resubscribe for an equal or longer payment period at the current tariff rates subject to the following conditions.
 - i. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - ii. The new payment period begins with the billing date following the date the new payment period is requested.

(4) Expiration of Contract Period: (Continued)

(b) (Continued)

iii. No termination charge applies for the former payment period.

iv. A Network Access Change charge as specified in Section S4 of this Tariff will apply.

(c) The CentraNet[®] customer may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions:

i. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.

ii. The new payment period begins with the date requested.

iii. A termination charge applies to the former payment period.

iv. A Network Access Change charge as specified in Section S4 of this Tariff will apply.

S5.3.5 CentraNet[®] Service for Horry County Government (Continued)

(N)

e. Conditions (Continued)

- (5) Suitable and sufficient space for any remote units required shall be leased by the Company from the customer.
 - (a) Suitable space includes provisions for atmospheric control, which encompasses the following environmental requirements: (1) dust free, (2) controlled temperatures ranging from 50° to 85° Fahrenheit, with consideration given to heat loss and/or gain of the equipment, and (3) relative humidity of 20% minimum and 55% maximum.
 - (b) Commercial power necessary to operate the remote units, if required, located on the customer's premises shall be provided by the customer.
- (6) Rotary dial stations may not be capable of accessing all CentraNet[®] Service features.
- (7) CentraNet[®] Service system lines are not subject to Business Exchange Service Rates set forth in Section S3 of this Tariff. However, Call Connection and Minutes of Use Rates set forth in Section S3 of the Tariff apply to exchange calls (if appropriate) originating from a CentraNet[®] Service system.
- (8) This Tariff contemplates the use of central office equipment selected by the Company. When special central office equipment or features are provided at the request of the customer, special assembly rates and charges may be applied in addition to the applicable rates for CentraNet[®] Service.
- (9) This Tariff (including the rates and charges) for CentraNet[®] Service is subject to such changes or modifications as the Commission may from time to time direct or allow in the exercise of its jurisdiction.

(N)

e. Conditions (Continued)

- (10) If the customer chooses to combine CentraNet[®] Service stations terminating at different locations into a single CentraNet[®] Service system, then all stations must be served by the same central office switching equipment.
- (11) Private line arrangements connected with CentraNet[®] Service are subject to applicable rates and charges shown in Section S20 of this Company's Tariff.
- (12) In addition, the customer may subscribe to Optional Features as shown in Section S12.1.6.b.(5) of this Tariff at the rates specified in Section S12. Certain Optional Feature capabilities may not be compatible with other features.

f. Rates and Charges

- (1) Nonrecurring
 - (a) Nonrecurring charges for service are in addition to any applicable service connection, move, change, and installation charges provided for in Section S4 of this Tariff.
 - (b) The Network Access Change charge as specified in Section 4 is applicable when a NAR is added subsequent to the initial installation of the CentraNet[®] service. No Central Office Line Connection Work charge is applicable.
 - (c) Data Base Change features, rules, regulations, and rates are as specified in Section S12 of this Tariff.
 - (d) Optional features, rules, regulations, and rates are as specified in Section S12 of this Tariff.

S5.3.6 Switched Multi-Megabit Data Service (SMDS) for Georgetown County Schools - SC 9501006

(N)

a. General

- (1) This tariff provides Switched Multi-Megabit Data Service (SMDS) for Georgetown County Schools.
- (2) SMDS is a high-speed, connectionless, packet-switched data service that transports communications on an intraLATA basis between end-users via switched network facilities using common end-to-end protocols.

b. Regulations

- (1) The Company's responsibility will be limited to the furnishing of data communications facilities suitable for the SMDS Connection. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
- (2) The customer shall provide compatible equipment (e.g., routes, Data Service Units, Channel Service Units, etc.) for connection with SMDS.
- (3) SMDS will only be offered where Company facilities and equipment permit.
- (4) SMDS is only available under this Tariff on an intraLATA basis. The features of the service may vary by customer demand for data transfer speed.

c. Rates and Charges

- (1) The following rates are stabilized for five years with a sixty-month service period.

	60 Months Monthly Rate	GSEC
SMDS Service		
- 56 Kbps, each	\$ 85.00	SMDSSC9501006
- 256 Kbps, each	250.00	SMDSSC9501006-1
- 1.544 Mbps, each	340.00	SMDSSC9501006-2

S5.3.9 Multi-Media Data Service (MMDS) for AVX Corporation (SC9601044)

a. General

- (1) This tariff provides Multi-Media Data Service (MMDS) for AVX Corporation.
- (2) Multi-Media Data Service (MMDS) is a fiber optic based group of high speed data and video services for intraexchange and interexchange use within a LATA.

b. Regulations

- (1) The Company's responsibility will be limited to the furnishing of data communications facilities suitable for the MMDS Connection. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
- (2) MMDS service will only be used to interconnect customer locations within the same LATA.
- (3) MMDS will only be offered where Company facilities and equipment permit.
- (4) The network demarcation point for MMDS is on the electrical side of the Company provided network interface on the customer premises. The customer is responsible for providing all facilities and cabling necessary to connect customer equipment to the network interface.

S5.3.11 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for Plantation Resorts (SC9601021) (N)

a. General

- (1) This tariff provides Integrated Services Digital Network-Primary Rate Service (ISDN-PRI) for Plantation Resorts.
- (2) ISDN-PRI Service provides intraexchange access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services.

b. Regulations

- (1) ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- (2) ISDN-PRI Service is typically divided in capacities in twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- (3) The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- (4) The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- (5) The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.

S5.3.12 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for NTRNET Systems (SC9601040) (N) (Continued)

b. Regulations (Continued)

- (6) Where a customer's ISDN-PRI Service interconnects with an Interexchange Carrier (IC) or other service provider, PRI Access is only permitted within a single customer's ISDN-PRI Service Arrangement. Access to the Telephone Company's network exchange or switched services are not permitted.
- (7) When a customer's serving office is not suitably equipped and the customer chooses to subscribe to ISDN-PRI Service from another Telephone Company designated ISDN-PRI central office, the customer will utilize the dialing plan associated with the designated ISDN-PRI central office. In this instance, the applicable NAR rate as specified in S3 will apply.

c. Rates and Charges

The following rates are stabilized for 12 months.

		<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	<u>IOSC</u>
(1)	ISDN-PRI Access, each	\$ -	\$420.00	16804
(2)	ISDN-PRI CSD Channels, (per channel)	-	6.00	16806
(3)	ISDN-PRI	500.00	-	16805

S5.3.13 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for UUNET Technologies, Incorporated (SC9601016)

(N)

a. General

- (1) This tariff provides Integrated Services Digital Network-Primary Rate Service (ISDN-PRI) for UUNET Technologies, Incorporated.
- (2) ISDN-PRI Service provides intraexchange access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services.

b. Regulations

- (1) ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- (2) ISDN-PRI Service is typically divided in capacities in twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- (3) The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- (4) The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- (5) The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.

S5.3.15 Call Forwarding Busy on Pilot Number of Hunt Groups for CompuServe (SC9601034)

(N)

a. General

(1) This tariff provides call forwarding busy on pilot number of hunt groups for CompuServe.

b. Regulations

(1) CompuServe can only forward to an 800 number. Their 800 numbers are AT&T numbers which are served by the central office which also supports CompuServe's hunt groups.

(2) With this arrangement, there are no trunking requirements and no toll bypass.

c. Rates and Charges

(1) The following rate is effective for one-year from the effective date of this Tariff. The rate will automatically be extended on a month-to-month basis at the end of the one-year period unless the customer or GTE South Incorporated provides written notice no less than ninety (90) days prior to the expiration of the then current term.

(2) All other applicable tariffed rates apply in addition to this rate.

(3) Termination liability is as specified in the signed contract.

S5.3.18 Fractional T1 (FT1) Service for Johnsonville High School (SC 9601041)

(N)

a. General

- (1) This tariff provides Fractional T1 (FT1) Service for Johnsonville High School.
- (2) Fractional T1 (FT1) Service provides a DS1 interface for use in providing simultaneous two-way transmission of isochronous bipolar serial data signals and is limited to a grouping of $N \times 64$ Kbps where N equals 6.

b. Regulations

- (1) Fractional T1 (FT1) facilities are furnished for the transmission of isochronous bipolar serial data and are available at a transmission rate grouping of $N \times 64$ Kbps where N equals 6. FT1 channels are contiguous within the network and can be used to create a wideband circuit using customer provided equipment.
- (2) Fractional T1 (FT1) Service will only be offered where Company facilities and equipment permit.
- (3) The customer shall provide compatible equipment for connection with FT1 Service.
- (4) The Company's responsibility will be limited to the furnishing of facilities suitable for Fractional T1 Service. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.

S5.3.21 Switched Multi-Megabit Data Service (SMDS) for Johnsonville District Schools (SC9601046)

(N)

a. General

- (1) This tariff provides Switched Multi-Megabit Data Service (SMDS) for Johnsonville District Schools.
- (2) SMDS is a high-speed, connectionless, packet-switched data service that transports communications on an intraLATA basis between end-users via switched network facilities using common end-to-end protocols.

b. Regulations

- (1) The Company's responsibility will be limited to the furnishing of data communications facilities suitable for the SMDS Connection. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
- (2) The customer shall provide compatible equipment (e.g., routes, Data Service Units, Channel Service Units, etc.) for connection with SMDS.
- (3) SMDS will only be offered where Company facilities and equipment permit.
- (4) SMDS is only available under this Tariff on an intraLATA basis. The features of the service may vary by customer demand for data transfer speed.

c. Rates and Charges

- (1) The following rates are stabilized for sixty (60) months.

S5.3.22 Fractional T1 (FT1) Service for Bishopville High School (SC 9701072)

(N)

a. General

- (1) This tariff provides Fractional T1 (FT1) Service for Bishopville High School.
- (2) Fractional T1 (FT1) Service provides a DS1 interface for use in providing simultaneous two-way transmission of isochronous bipolar serial data signals and is limited to a grouping of $N \times 64$ Kbps where N equals 6.

b. Regulations

- (1) Fractional T1 (FT1) facilities are furnished for the transmission of isochronous bipolar serial data and are available at a transmission rate grouping of $N \times 64$ Kbps where N equals 6. FT1 channels are contiguous within the network and can be used to create a wideband circuit using customer provided equipment.
- (2) Fractional T1 (FT1) Service will only be offered where Company facilities and equipment permit.
- (3) The customer shall provide compatible equipment for connection with FT1 Service.
- (4) The Company's responsibility will be limited to the furnishing of facilities suitable for Fractional T1 Service. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.

S5.3.23 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for Burroughs and Chapin Company (SC9701069) (N)

a. General

- (1) This tariff provides Integrated Services Digital Network-Primary Rate Interface Service (ISDN-PRI) for the Burroughs and Chapin Company.
- (2) ISDN-PRI Service provides intraexchange access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services.

b. Regulations

- (1) ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- (2) ISDN-PRI Service is typically divided in capacities in twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- (3) The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- (4) The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- (5) The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.

S5.3.23 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for Burroughs and Chapin Company (SC9701069) (Continued) (N)

b. Regulations (Continued)

- (6) Where a customer's ISDN-PRI Service interconnects with an Interexchange Carrier (IC) or other service provider, PRI Access is only permitted within a single customer's ISDN-PRI Service Arrangement. Access to the Telephone Company's network exchange or switched services are not permitted.
- (7) When a customer's serving office is not suitably equipped and the customer chooses to subscribe to ISDN-PRI Service from another Telephone Company designated ISDN-PRI central office, the customer will utilize the dialing plan associated with the designated ISDN-PRI central office. In this instance, the applicable NAR rate as specified in S3 will apply.

c. Rates and Charges

- (1) The following rates are stabilized for 36 months.

		<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	<u>IOSC</u>
(a)	ISDN-PRI Access, each	\$ -	\$380.00	17171
(b)	ISDN-PRI Voice Channels, (per channel)	-	20.00	17174
(c)	ISDN-PRI, per PRI Access	500.00	-	17173

- (2) These rates are in addition to any applicable tariffed rates found elsewhere in this tariff.
- (3) Should the customer disconnect his ISDN-PRI service before the expiration of the contract period, an early termination liability charge equal to the monthly rate times the number of months remaining in the contract shall apply. (N)

S5.3.24 Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) for Sprint Communications Company, aka, SprintNet (SC9601050, SC9701065) (N)

a. General

- (1) This tariff provides Integrated Services Digital Network-Primary Rate Service (ISDN-PRI) for Sprint Communications Company, aka, SprintNet.
- (2) ISDN-PRI Service provides intraexchange access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services.
- (3) This ISDN-PRI special service arrangement provides Caller ID-Number only and is restricted to traffic that is outbound from GTE South Incorporated's serving wire center (DID). The ability to originate traffic to the serving switch is disabled. This DID trunking arrangement is provided with one pilot number only.

b. Regulations

- (1) ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- (2) ISDN-PRI Service is typically divided in capacities in twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- (3) The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- (4) The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- (5) The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.

S5.3.33 Switched Multi-Megabit Data Service (SMDS) for Horry County State Bank (SC9701086)

(N)

a. General

- (1) This tariff provides Switched Multi-Megabit Data Service (SMDS) for Horry County State Bank.
- (2) SMDS is a high-speed, connectionless, packet-switched data service that transports communications on an intraLATA basis between end-users via switched network facilities using common end-to-end protocols.

b. Regulations

- (1) The Company's responsibility will be limited to the furnishing of data communications facilities suitable for the SMDS Connection. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
- (2) The customer shall provide compatible equipment (e.g., routes, Data Service Units, Channel Service Units, etc.) for connection with SMDS.
- (3) SMDS will only be offered where Company facilities and equipment permit.
- (4) SMDS is only available under this Tariff on an intraLATA basis. The features of the service may vary by customer demand for data transfer speed.

c. Rates and Charges

- (1) The following rates are stabilized for twelve (12) months.

S5.3.36 **CentraNet® Service for American Fiber Network (AFN) (SC9801103 and SC9801095)**

(N)

a. General

- (1) This tariff provides a CentraNet® Customized Feature Package as well as Resort CentraNet® Instant Call Accounting (ICA) for American Fiber Network (AFN) as a special service arrangement.
- (2) The CentraNet® Customized Feature Package includes the following features: Authorization Codes, Group Speed Dial, Toll Block (to eliminate 1+ calling), Call Forward (to voice mail) and Bill Number Screening.
- (3) Resort CentraNet® ICA is Dial-Up Instant Call Accounting. The customer, using CPE, initiates a download request to the central office processor in order to retrieve the call records. The records are transmitted immediately back to the customer's premises equipment upon completion of the request.

b. Regulations

- (1) A dial up modem is required. The modem will be provided by the customer. The Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
- (2) The service(s) will only be offered where Company facilities and equipment permit.
- (3) Each call record will contain the date, time, duration of the call, the calling station number, facility used, and the number that was called. The records produced by this service are not represented to be a provision of billing detail.
- (4) GTE South Incorporated makes no guarantee and assumes no liability associated with the customer's receipt of the call detail records if the customer-provided CPE does not meet GTE South Incorporated's compatibility requirements.

S5.3.37 Remote Call Forwarding Service for GTE Directories Corporation (SC9901110)

(N)

a. General

- (1) This tariff provides measured usage based Remote Call Forwarding (RCF) Service to GTE Directories Corporation as a special service arrangement.
- (2) Remote Call Forwarding (RCF) is a service whereby a call placed from a station (the originating station) to a customer's (the RCF customer) telephone number in one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another station designated by the RCF customer (the terminating station) which is located in a different or same exchange.

b. Regulations

- (1) RCF will not be offered as a means to allow toll bypass.
- (2) RCF international is not allowed.
- (3) The Limitations and Directory Listings regulations as specified in Section A13.7.2 and A13.7.3 of this Tariff are also applicable to this special service arrangement.

c. Rates and Charges

- (1) The following rates are stabilized for twelve (12) months.

	<u>Rate</u>
(a) Remote Call Forwarding Usage, per minute or fraction thereof	\$.025
(b) Detail Billing	
Per customer bill, per month	1.75

S5.4 Contract Service Arrangements

S5.4.1 General

- a. When economically practicable, customer specific contract service arrangements may be furnished in lieu of existing tariff offerings provided there is reasonable potential for uneconomic bypass of the Company's services. Uneconomic bypass occurs when an alternative service arrangement is utilized, in lieu of Company services, at prices below the Company's rates but above the Company's incremental costs. This Tariff will remain in effect until modified or removed by authorization of the Public Service Commission.
- b. Rates, Charges, Terms and additional regulations, if applicable, for the contract service arrangements will be developed on an individual case basis, and will include all relevant costs, plus an appropriate level of contribution.
- c. Unless otherwise specified, the regulations for contract service arrangements are in addition to the applicable regulations and rates specified in other sections of this Tariff.

S5.4.2 SprintNet - SC95013E

- a. This Contract Service Arrangement provides the CentraNet® Main Station Line, Feature Series 1000 Package, and CALC to SprintNet at the following rate. This rate does not include NARs, optional features, and/or service ordering charges.

This rate is stabilized for three years with a thirty-six month service period. If service is terminated prior to the minimum service period, the customer will be responsible for all termination charges. The termination charges will be the monthly rate times the number of months between the time of disconnection and the end of the thirty-six month period.

	36 Months Monthly Rate	GSEC
CentraNet® Main Station Line, Feature Series 1000 Package, and CALC, per line	\$ 21.45	CENSA95013E

This rate is in addition to any other applicable rates covered in the Company's tariffs.
