Durham, North Carolina

Fifth Revised Page 1

EFFECTIVE: July 6, 1993

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.1 IntraLATA Private Line Services

S20.1.1 General

- a. This communication service is furnished through facilities provided wholly by GTE South Incorporated or jointly with another company for the provision of a transmission path between two or more customer designated locations. Customers will be allowed to order intraLATA private line services from Interexchange Carriers utilizing Telephone Company Special Access. The carrier will be allowed to offer only intraLATA interexchange customer connections ordered to the carrier's CDL (customer designated location). (N)
|
(N)
- b. This service will be provided according to the rates and regulations set forth in the FACILITIES FOR INTRASTATE ACCESS, TARIFF A, for Special Access excluding the exceptions as outlined in S20.1.2 below.
- c. Where the service is provided jointly with another telephone company, GTE South Incorporated will bill the customer for the portion of service it provides according to the rules and regulations set forth in 2.7 of the FACILITIES FOR INTRASTATE ACCESS, TARIFF A.
- d. Miscellaneous Services available to the customer from Section S6 of the FACILITIES FOR INTRASTATE ACCESS TARIFF A include the following:
 - Additional Labor
 - Maintenance of Service Charge
 - Telecommunications Service Priority (TSP) System
 - Additional Testing

S20.1.2 Exceptions

- a. The rates, charges and contract terms for the following items have been established to meet the particular requirements of certain customers. Inclusion of the rates and codes herein in no way constitutes authorization for any customer other than those specified.

a. (Continued)

(1) Wachovia Operational Services, Corporation
d/b/a South Carolina National Bank

(a) CSD No. SC92004 (03-06-92)

This service arrangement provides for digital data circuits at speeds of 2.4, 4.8, 9.6 and/or 56 kbps. Rates are stabilized for an additional three years (March 6, 1995 - March 6, 1998) (C) with a thirty-six month service period. If service is terminated prior to the minimum service (C) period, the customer will be responsible for all termination charges. The termination charges will be the monthly rate times the number of months between the time of disconnection and the end of the thirty-six month period.

	<u>Nonrecurring Charge</u>	<u>36 Months Monthly Rate</u>	<u>GSEC</u>	
Special Access Line, per circuit	-	\$ 70.00	PLSASCSCNB	(U)
Interoffice Transport, per circuit, per airline mile	-	4.50	PLSASCSCNB-1	(U)

These rates and charges are in addition to any other applicable rates covered in the Company's tariffs.

Durham, North Carolina

Second Revised Page 1.2

EFFECTIVE: January 1, 1992

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service

S20.2.1 Voiceband Service

a. Regulations

(1) Scope of Service

- (a) Voiceband lines connect two or more points within the same exchange service area for telephone communication, but are not connected to general telephone facilities for either exchange or toll service. All station equipment and channels for voiceband telephone service shall be provided by the Company.

- (b) Both two-point and multi-point service ordinarily contemplates communication between two stations only at the same time.

In connection with multi-point service, arrangements may be made to permit communication between three or more stations at the same time. Special equipment and arrangements which may be required to furnish such service are furnished at rates and charges based upon estimated costs.

Order No. 91-412 in Docket No. 90-698-C

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.1 Voiceband Service (Continued)

(T)

a. Regulations (Continued)

(1) Scope of Service (Continued)

(c) The minimum contract period for voiceband telephone service is one month.

(T)

(2) Allowance for Interruptions

No allowance is made for interruptions of less than twenty-four hours. For interruptions of twenty-four hours or more, credit is allowed for the proportionate part of the monthly charge in multiples of one day for each twenty-four hours or major fraction thereof, of interruption for the portion of the facilities rendered inoperative by reasons of the interruption.

(3) It is expressly declared that fully metallic facilities are in continually decreasing supply, and the Company is not obligated to continue to make such facilities available or to furnish to existing customers fully metallic facilities.

b. Nonrecurring Charges

(C)

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation of service or change to an existing service). The types of nonrecurring charges that apply are those listed below.

(1) Service Ordering Charges

Service Ordering Charges are associated with the work performed by the Telephone Company in connection with the receiving, recording and processing of customer service requests. There are two types of service ordering charges.

(a) Initial Ordering Charge - This charge applies on a per service order request basis, including those requests to add additional terminations to an existing service.

(C)

S20.2 Intraexchange Private Line Service (Continued)

S20.2.1 Voiceband Service (Continued)

(T)

b. Nonrecurring Charges (Continued)

(1) Service Ordering Charges (Continued)

(C)

- (b) Subsequent Ordering Charge - This charge applies on a per service order basis for modifications to an existing service. This would include activities such as:

Additions of supplemental features and multiplexing arrangements.

(2) Service Installation Charge

The Service Installation Charge is associated with the work performed by the Telephone Company in connection with the physical installation activities involving central office and/or outside plant facilities. This charge applies on a per Special Access Line basis for the installation of service, and for additional terminations to existing service.

This charge does not apply to installations involving DS1 Special Access Line service. The installation charge for this service is set forth in S20.2.6.d.

(3) Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to a pending service order which requires engineering review. Design changes include such things as the addition or deletion of supplemental features or changes in the terminating options.

The Telephone Company will review the requested change, notify the customer whether the change can be accommodated and specify if a new service date is required. If the customer authorizes the Telephone Company to proceed with the design change, a Design Change Charge will apply.

The Design Change Charge will apply on a per service order, per occurrence basis, for each service order requiring a design change.

Order No. 91-412 in Docket No. 90-698-C

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.1 Voiceband Service (Continued)

- c. The Special Transport rate element provides for the transmission facilities between the serving central offices. This rate element is distance sensitive based on airline miles between the serving central offices. (T)
- d. This Special Access Line rate element provides for the transmission facilities between the customer's premises and the serving central office. One Special Access Line charge applies per customer premises at which the facility is terminated. (C)
- e. Conditioning Arrangements

Data conditioning, when utilized in conjunction with effective four-wire Voiceband transmission facilities, improves the characteristics of these facilities. These improved characteristics are not represented to apply to the entire end to end facility of the customer, but only to that portion of the facility provided by the Telephone Company.

There are three types of data conditioning: Type C, Type C-Improved and Type DA. Type C and Type C-Improved conditioning control attenuation distortion and envelope delay distortion. Type DA controls the signal to C-notched noise ratio and intermodulation distortion. Type C and Type DA conditioning may be combined on the same circuit. Type C-Improved and Type DA conditioning may be combined on the same circuit.

Data conditioning is charged for on a per Special Access Line basis.

(1) Type C

Type C conditioning of Voiceband facilities provides a facility with the following transmission parameters enhanced to meet the values specified for Type C conditioning in Section 7000 of the GTE Technical Interface Reference Manual in addition to the standard parameters for Voiceband circuits.

- (1) Attenuation distortion with reference to 1004 Hz.
- (2) Envelope delay distortion.

S20.2.1 Voiceband Service (Continued)

(T)

e. Conditioning Arrangements (Continued)

(C)

(2) Type C-Improved

Type C-Improved conditioning of Voiceband facilities provides a facility with the following transmission parameters enhanced to meet the values specified for Type C conditioning in Section 7000 of the GTE Technical Reference Manual in addition to the standard parameters for Voiceband circuits.

(1) Improved attenuation distortion with reference to 1004 Hz.

(2) Improved envelope delay distortion.

The customer may choose to order Improved Attenuation Distortion or Improved Envelope Delay Distortion or both configurations. The rates specified for Type C-Improved conditioning will apply regardless of the configuration specified.

(3) Type DA

Type DA conditioning of Voiceband facilities provides a facility with the following transmission parameter enhanced to meet the values specified for Type DA conditioning in Section 7000 of the GTE Technical Interface Reference Manual in addition to the standard parameters for voiceband circuits.

(1) Signal to C-notched noise ratio.

(2) Nonlinear signal to second order distortion.

(3) Nonlinear signal to third order distortion.

f. Automatic Ringdown Signaling (ARD)

Automatic Ringdown Signaling (ARD) is a signaling arrangement on a two-point circuit which converts loop seizure at one end of the facility into ringing signal at the opposite end.

(D)

(D)

S20.2.5 Channels for Program Transmission

a. General

- (1) The service and channels provided under this section are not furnished for the commercial transmission of communications between exchanges nor for the use in competition with any service by the Telephone Company or its connecting companies.
- (2) Provision of all service described herein is subject to the availability of facilities and limitation in operating characteristics of the equipment.

b. Rates

These services are furnished in accordance with the rates and regulations set forth in TARIFF F.C.C. NO. 260 of the AT&T Company in which GTE South Incorporated (South Carolina) is listed as a Concurring Carrier.

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1

a. General

- (1) This tariff contains the regulations and rates applicable to High Capacity Digital DS1 Service (1.544 Mbps) furnished for private line intraexchange communications.
- (2) High Capacity Digital DS1 Service provides for the simultaneous transmission of bipolar data signals at the rate of 1.544 Mbps over network facilities between customer locations within an exchange.
- (3) The rates specified for High Capacity Digital DS1 Service contemplate the provision of a digital quality facility over existing exchange facilities compatible with this service. If such facilities or changes to existing facilities are required to provide High Capacity Digital DS1 Service, a charge based on the cost incurred will apply in addition to the rates for the service.
- (4) Fractional T1 (FT1) facilities are furnished for the transmission of isochronous bipolar serial data and are available at transmission rate groupings of N x 56 Kbps or N x 64 Kbps where N equals 2, 4, or 6. FT1 channels are contiguous within the network and can be used to create a wideband circuit using customer provided equipment. When N x 64 FT1 is ordered in conjunction with DS1 service for multiplexing purposes, the DS1 must have Clear Channel Capability as described in Section S20.2.11 of this tariff. FT1 service at a rate of N x 64 Kbps will only be provided where Clear Channel Capability is available in the network. Where Clear Channel Capability is not available, N x 56 Kbps service can be provided in lieu of N x 64 Kbps.

b. Regulations

(M)

(1) Description of Service

Service is furnished for the simultaneous transmission of bipolar data signals at the rate of 1.544 Mbps over network facilities between customer locations within an exchange.

(2) Definitions

Special Access Line - A Special Access Line provides the transmission facilities between a customer designated premises and the serving wire center of that premises. One Special Access Line charge applies per customer designated premises at which the facility is terminated.

Special Transport - The Special Transport rate element provides for the transmission facilities between the serving wire centers associated with customer designated premises.

S20.2.6 High Capacity Digital DS1 (Continued)

b. Regulations (Continued)

(2) Definitions (Continued)

Special Transport Termination - The Special Transport Termination rate element provides the equipment and arrangements necessary to terminate the Special Transport facility at a serving wire center. One Special Transport Termination charge applies for the termination of each end of a Special Transport facility for DS1 service.

Automatic Protection Switch - Consists of special switching equipment placed at both ends of a duplicate DS1 facility (i.e., DS1, High Capacity Circuit) for automatic switching to the duplicate (standby) facility in the event the active facility is inoperative.

The duplicate facilities are not a part of this supplemental feature.

Fractional T1 (FT1) Service - Provides a DS1 interface for use in providing simultaneous two-way transmission of isochronous bipolar serial data signals and is limited to groupings of $N \times 56$ Kbps or $N \times 64$ Kbps where N equals 2, 4, or 6. (N)

(3) Connections

(a) Responsibility of the Customer

Where a customer elects to connect a communications system to DS1 Service the customer shall be responsible for:

- i. Compatibility of the connected communications system and the DS1 Service.
- ii. Testing and clearance of trouble conditions or service difficulties on any communications system which is connected to the DS1 Service.

(b) Responsibility of the Company

- i. The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by a customer.
- ii. The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of the DS1 Service render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
- iii. The Company undertakes to maintain and repair the facilities which it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any facilities installed by the Company.

(4) Shared use of Fractional T1 (FT1) service is not available.

c. Optional Payment Plan (OPP)

(1) Description

A customer may elect to participate in an Optional Payment Plan (OPP) for DS1 Service and Fractional T1 (FT1) Service. The OPP allows a customer to order the "First System" DS1 Special Access Line (SAL) rate element over a one, three or five year payment period at rates set forth below. The OPP applies to the "First System" DS1 SAL rate element ordered.

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

(N)

c. Optional Payment Plan (OPP) (Continued)

(1) Description (Continued)

During an OPP, when the same customer orders "Additional System" DS1 SALs, the standard non-recurring and monthly rates, as set forth below apply.

When the customer orders a "First System" OPP SAL at a location, the same customer can then order "Additional System" DS1 SALs at the same location at any time and without regard to the opposing end of the circuit. The customer will be rated a "First System" OPP DS1 SAL at a location and the same customer will be rated an "Additional System" DS1 SAL rate for any subsequent SAL at the same location even if the terminating points of the DS1 circuits are different.

(2) OPP Payment Periods

- (a) The one-year payment period provides a customer with a monthly "First System" DS1 SAL tariff rate.
- (b) The three-year payment period provides a customer with a discounted tariff rate at ten percent (10%) below the standard monthly "First System" DS1 SAL tariff rate.
- (c) The five-year payment period provides a customer with a discounted tariff rate at twenty percent (20%) below the standard monthly "First System" DS1 SAL tariff rate.
- (d) The customer must specify the payment period at the time the service is ordered.

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

c. Optional Payment Plan (OPP) (Continued)

(2) OPP Payment Periods (Continued)

- (e) During the payment period, any decrease in the standard monthly recurring "First System" DS1 SAL tariff rate will automatically be discounted by the appropriate percentage and flowed through to the OPP recurring rates as specified below.
- (f) When the customer orders a move the customer will be able to keep the same OPP payment period in force.

(3) Conversions

- (a) For the conversion of an existing standard DS1 service to an OPP of choice and no other changes to the service are ordered, only the Initial Ordering Charge will apply for the conversion.
- (b) During an OPP period, the customer may elect to convert to a new OPP period of the same or different length. Conversion to a new OPP period will be allowed without penalty or application of nonrecurring charges if the expiration date of the new OPP period is greater than the remainder of the original OPP period.
- (c) When a customer converts to an OPP, the monthly rates will be as set forth below.

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

c. Optional Payment Plan (OPP) (Continued)

(3) Conversions (Continued)

(d) Should the customer convert an "Additional System" DS1 SAL existing under an OPP arrangement, to a "First System" OPP DS1 SAL to meet the requirements specified in c.(1), the following ordering requirements will apply:

- The Subsequent Ordering Charge will apply only if the conversion is to the same OPP payment period and remains connected at the same location as the previous OPP DS1 SAL. A new payment period will commence with the conversion.
- A discontinuance of service order and establishment of new service order will be required for the conversion should the customer choose a different OPP payment period at the same location as the previous OPP DS1 SAL. A new payment period will commence with the conversion.

(4) Expiration of OPP

At the expiration of an OPP payment period, the Telephone Company will automatically renew the customer at the same OPP payment period unless the customer chooses to discontinue, converts to a different OPP or converts to month-to-month standard tariff rates.

Should the customer choose to convert to month-to-month standard tariff rates, existing "Additional System" DS1 SALs under the OPP must also be converted to comply with the standard arrangements rules and regulations. If no other changes are ordered, only the Initial Ordering Charge will apply. The ordering and installation of further "Additional System" DS1 SALs will also convert to the standard arrangements.

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

c. Optional Payment Plan (OPP) (Continued)

(5) Early Termination Liability

When a "First System" DS1 SAL is discontinued prior to the end of the payment period, two levels of termination liability may apply based on the remainder of the OPP payment period in effect at the time if disconnect as indicated below.

One Year OPP - 100% of any remaining portion of the first year's recurring charges.

Three Year OPP - 100% of the remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second and third year, the customer will be liable for 10% of the total monthly charges in that time period.

Five Year OPP - 100% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second through fifth year, the customer will be liable for 20% of the total monthly charges in that time period.

(6) Early Termination Without Liability

During the OPP payment period, should the recurring charge for a customer's "First System" DS1 SAL increase in excess of ten percent (10%) from the original recurring charge of the customer's current OPP, the customer may, at their option, terminate the service without penalty or liability.

(C)

(7) Notification of Discontinuance

Notice of discontinuance must be given by the customer at least thirty (30) days prior to actual discontinuance. Monthly charges will apply for a period of thirty (30) days from the date the Telephone Company receives discontinuance notification or until the requested discontinuance date, whichever period is longer.

(8) OPP for Fractional T1 (FT1) Service

(N)

A customer may change from DS1 OPP service to an FT1 OPP service subject to the following rate applications. Also, a customer may change the number of channels of an N x 56 Kbps or N x 64 Kbps service to another higher value of N (where N = 2, 4 or 6), subject to the following rate applications:

- The changed service will be subject to all appropriate nonrecurring charges.
- Termination liability charges will not apply as long as the changed service remains connected at the same point of termination(s) when the customer orders a move to a different CDL within the same serving wire center, the customer will be able to keep the same OPP payment period in force. Any other move will be treated as a disconnect of the OPP.
- If the change involves establishing a multiplexing arrangement, termination liability charges will not apply if the hub wire center is the same one associated with the customer designated location.

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

d. Rates and Charges (Continued)

(6) Installation of Special Access Lines

(a) High Capacity Digital DS1 (N)

Standard Arrangements: There are two levels of nonrecurring and monthly charges for the installation of a DS1 SAL as set forth above. The "First System" charge is assessed per SAL for the first DS1 service ordered by a customer. When the same customer requests additional DS1 service on the same order, to be installed at the same time and between the same locations as the "First System" DS1 SAL, the lesser charge under "Additional System" will apply. (T)

Fractional T1 Standard Arrangements: Customers subscribing to Fractional T1 month-to-month service, at rates set forth in S20.2.6d. will be assessed a nonrecurring charge. The NRC is assessed per Special Access Line for Fractional T1 service ordered by a customer between the customer's designated premises or a hub wire center. (N)

(b) Optional Payment Plan (OPP) Arrangements

Customers subscribing to the OPP arrangements at rates set forth above will not be assessed the nonrecurring charge (NRC) for installation of the "First System" DS1 SAL. For each "Additional System" DS1 SAL, the NRC as set forth above will apply. In addition, under an OPP, the "Additional System" DS1 SAL may be ordered at any time by the same customer between the same locations as the "First System" DS1 SAL.

(c) Fractional T1 Optional Payment Plan (OPP) Arrangements: Customers subscribing to the Fractional T1 OPP arrangements, at rates set forth in S20.2.6d. will not be assessed a nonrecurring charge (NRC) for initial installation of a Fractional T1 Special Access Line. (N)

S20.2 Intraexchange Private Line Service (Continued)

S20.2.6 High Capacity Digital DS1 (Continued)

d. Rates and Charges (Continued)

- (7) For Fractional T1 (FT1) service, Special Transport must be ordered as Fractional T1 (FT1) Special Transport in the same grouping (N x 56 Kbps or N x 64 Kbps where N = 2, 4, or 6) as the associated FT1 Special Access Lines. For Fractional T1 Service, Special Transport Termination must be ordered as Fractional T1 (FT1) Special Transport Termination in the same grouping (N x 56 Kbps or N x 64 Kbps where N = 2, 4, or 6) as associated FT1 Special Access Lines. (N)
- (8) FT1 can be used in conjunction with DS1 to Voice Multiplexing in groupings of N x 56 Kbps or N x 64 Kbps where N = 2, 4 or 6, to a single DS1 digital circuit at a rate of 1.544 Mbps. (N)

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.7 Channel Modification Charge

a. General

- (1) Channels requiring unloaded cable facilities will be furnished only where operating and facility conditions exist. In the event that only loaded facilities are available, the Company will, at the customer's request, unload the facilities at the charges shown in S20.2.7.b. (T)
- (2) Channel modifications (deloading) will only be made where the customer locations are within one central office serving area, and where the total route mileage of the channel does not exceed six miles.
- (3) When the Company is required to make changes in any of the channels, operations or procedures of the Company, the Company does not guarantee the continued availability of unloaded channels furnished. The Company reserves the right, after thirty days' written notice to the customer, to discontinue the provision of such channels.

b. Rates and Charges*

(1) Channel Modification Charge (Deloading Cable)

	<u>Nonrecurring Charge</u>	<u>GSEC</u>
Removal of load coils in underground cable, each location	\$ 1,372.00	PLLDNMNRCU
Removal of load coils in aerial or buried cable, each location	822.00	PLLDNMNRCAB
Each additional pair Modified at the same point and the same time as the first pair (under- ground, aerial or buried), per point unloaded	11.00	PLLDNMNRCADD

* The rates and charges for the Private Line Channel apply as specified in S20.2.1.b., in addition to the Channel Modification Charge. (C)

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.8 Digital Data Service

a. General

- (1) This tariff contains the regulations and rates applicable to Digital Data Service furnished for private line intraexchange communications.
- (2) This service provides access interface for use in providing simultaneous two-way transmission of sequential bipolar data signals at transmission speeds of 2.4 Kbps, 4.8 Kbps, 9.6 Kbps, 19.2 Kbps, 56 Kbps over four-wire facilities. (C)
- (3) The rates specified for Digital Data Service contemplate the provision of a digital quality facility over existing exchange cable facilities compatible with this service. If such facilities or changes to existing facilities are required to provide Digital Data Service, a charge based on the cost incurred will apply in addition to the rates for the service.

b. Regulations

- (1) Facilities for Digital Data Service are furnished for the simultaneous two-way transmission of synchronous data and are available at transmission speeds of: 2.4 kbps, 4.8 kbps, 9.6 kbps, 19.2 Kbps, or 56 kbps. Digital Data facilities may be provided on a two point or multi-point basis. (C)
- (2) Definitions

Bridging - Bridging is the function of connecting three or more locations in a multi-point arrangement. Digital Data Service bridging provides for a multi-junction unit (MJU) arrangement to bridge 2.4 kbps, 4.8 kbps, 9.6 kbps, 19.2 Kbps, or 56 kbps DDS facilities. Different speeds cannot be mixed on the same bridge. This function is provided on a per port basis. (C)

S20.2.8 Digital Data Service (Continued)

(T)

b. Regulations (Continued)

(2) Definitions (Continued)

Secondary Channel - This feature is offered on an optional basis to customers of Digital Data Service. It is a separate, slower speed digital channel that operates in parallel with the companion Digital Data Service primary channel. The secondary channel allows for remote control and testing of the network and peripheral devices without taking the network out of service and without lowering the speed of the primary Digital Data Service channel.

(N)

Rates and charges as set forth following will apply on a per Digital Data Service Special Access Line basis (each end of a two-point circuit and all ends of a multi-point circuit).

The provisioning of this option to existing Digital Data Service requires the discontinuance of the existing Digital Data Service and the establishment of new Digital Data Service for both ends of a two-point circuit and all ends of a multi-point circuit. The Initial Ordering Charge plus the Service Installation Charge, as specified in S20.2.1.g. will apply. These charges are in addition to the nonrecurring charges associated with the installation of Digital Data Service.

This feature is available for all speeds of Digital Data Service, however, due to technical limitations, it cannot operate and therefore, is not available on 56 Kbps digital data service that requires the installation of loop repeater equipment.

b. Regulations (Continued)

(2) Definitions (Continued)

Special Access Line - A Special Access Line rate element provides the transmission facilities between a customer designated premises and the serving wire center at that premises. One Special Access Line charge applies per customer designated premises at which the facility is terminated.

(T)(X)

(T)

Special Transport - The Special Transport rate element provides for the transmission facilities between the serving wire centers associated with the customer designated premises.

(T)

(3) Connections

(a) Responsibility of the Customer

Where a customer connects a communications system to a Special Access Line, the customer shall be responsible for:

(T)(X)

i. Compatibility of the connected communications system and the Digital Data Service.

(T)(X)1

ii. Testing and clearance of trouble conditions or service difficulties on any communications system which is connected to the Digital Data Service.

(T)

(b) Responsibility of the Company

i. The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of Digital Data Service render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.

S20. PRIVATE LINE SERVICE AND CHANNELS

S20.2 Intraexchange Private Line Service (Continued)

S20.2.10 Multiplexing Arrangements

(N)

a. General

Multiplexing Arrangements where facilities permit provide the function to convert to single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Cascading multiplexing occurs when a high capacity analog or digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed.

When cascading multiplexing is performed in the same or different Wire Center, a charge for the additional multiplexing unit will also apply. When cascading multiplexing is performed at a different Wire Center, Special Transport will also apply between the involved Wire Centers.

Listed below are the multiplexing arrangements offered under this tariff.

(1) Voice to Narrowband

An arrangement that multiplexes sixteen 0 to 75 baud narrowband circuits to a single voice grade circuit, or a single voice grade circuit to sixteen 0 to 75 baud narrowband circuits.

(2) DS1 to Voice

An arrangement that multiplexes twenty-four voice grade circuits to a single DS1 digital circuit at a rate of 1.544 Mbps, or multiplexes a single DS1 digital circuit at a rate of 1.544 Mbps to twenty-four voice grade circuits.

Up to 16 channels of this DS1 can be used for Direct Digital Service (DDS-like service) with the assurance that circuit performance parameters will be met. If more than 16 channels are used for DDS-like service, the performance parameters for the DS1 and all circuits riding the DS1 will not be guaranteed.

S20.2.10 Multiplexing Arrangements (Continued)

(N)

a. General (Continued)

(3) Digital Data Carrier Multiplexer

An arrangement that multiplexes a single DS1 1.544 Mbps digital circuit to twenty-three DSO digital ports for connection to either a subrate data multiplexer as described below or 56 Kbps digital circuits.

(4) Digital Data Subrate Multiplexer

Used with cascading multiplexing, the Digital Data Subrate Multiplexer is an arrangement that multi-plexes the following quantities of subrate digital data circuits into a single DSO port: 1) twenty 2.4 kbps, 2) ten 4.8 kbps or 3) five 9.6 kbps. In turn, the DSO digital port then multiplexes to a single DS1 digital circuit using the Digital Data Carrier Multiplexer described above.

S20.2.11 Clear Channel Capability

(N)

a. Description of Service

An arrangement that allows the customer to transport 1.536 Mbps of information through a DS1 with no constraint on the quantity or sequence of one (mark) and zero (space) bits utilizing the Bipolar with Eight Zero Substitution (B8ZS) method of providing bit sequence independence. This arrangement is capable of transporting DS1 signals which utilize Superframe or Extended Superframe Format (ESF) as defined by the American National Standards Institute (ANSI) T1.107-1988 standard. The installation interval for Clear Channel Capability may exceed standard intervals where equipment in the central office is not readily available. The charges apply on a per SAL basis.

This arrangement requires the customer signal at the channel interface to conform to the B8ZS method of providing bit sequence independence, as described in ANSI T1.102-1987 and Section 6103 of the GTE Technical Interface Reference Manual.
