S112. DISCONTINUED SERVICE OFFERINGS -
CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERING

(N)

S112.1 CentraNet[®] Service

Obsolete. The provision of CentraNet[®] Service will be continued for existing customers only under the following tariff. The service allows for normal station activity including moves, changes, deletions, and station additions to existing systems subject to the availability of existing outside plant facilities and CentraNet[®] Service serving capacity of the central office from which the service is furnished.

(N)

S112.1.1 General

(N)¹

- a. CentraNet[®] Service is an electronic switching system provided from a central office which offers premium, versatile, and advanced communication features and service. The customer purchases his access line (local loop) separately from his flat usage component (blocks of busy hour capacity minutes-of-use (MOUS). The flat usage component is commonly referred to as a Network Access Register (NAR).
- b. A CentraNet[®] System may be comprised of the following components:
 - Network Access¹
 - Main Station¹
 - Terminating Arrangements
 - Features
- c. Service Features will be grouped as follows:
 - Series 1000 - Section S112.1.2.a.(2)
 - Series 2000 - Section S112.1.2.a.(3)
 - Series 3000 - Section S112.1.2.a.(4)

A CentraNet[®] customer must subscribe to at least one of the above feature packages.
- d. CentraNet[®] service will be furnished at applicable rates and charges to customers in serving areas where facilities permit.
- e. Customer premises equipment associated with this service is provided by the customer.
- f. Directory listings of CentraNet[®] Service will be provided in accordance with the regulations and rates as specified in Section S6 of this tariff.
- g. The main station rate includes Basic Service Features.

¹ Every system will include these components.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.1 General (Continued)

- h. The rates and charges for Main Stations are applicable to each Main Station location to which a customer-provided instrument can be connected.
- i. Service Charges as specified in Section S4 of this Tariff apply to all customer-requested moves and changes performed by the Company on the customer's premises.
- j. Rates for the Main Stations of CentraNet[®] customers will be based on the following criteria:
 - (1) Main Station Group Size
 - (2) The type of payment plan selected by the customer
- k. The total Main Station size will consist of Main Station Lines and Attendant Access Lines for all locations served by the same CentraNet[®] system.
- l. Exchange Access
 - (1) Exchange Access is provided by means of Network Access Registers.
 - (2) Presubscription of a Carrier of Preference is specified in Section 6 of the FCC GTOC #1 Tariff and Section S6.5 of the Intrastate Access Services Tariff.
- m. Main Station Line Terminated as an Automatic Access Line
 - (1) Where a CentraNet[®] Main Station Line is terminated as an Automatic Access Line in customer provided equipment, an appropriate recurring charge will apply in addition to the appropriate Main Station and NAR rate.
- n. Where the CentraNet[®] station being provided involves a location in a different central office area of an exchange, the mileage charge and measurement as specified in Section S9.2.2 for foreign central office mileage is applicable for each inter-office channel required.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

- b. CentraNet[®] Service includes the following basic service features:

Automatic Identification of Outward Dial:

This feature identifies all calls leaving the customer group by the station number from which calls are placed.

Common Recorded Announcement on Intercept:

This provides a standard recording for intercept of calls to unassigned numbers.

Direct Inward Dialing:

This feature allows incoming calls from the exchange network to reach a specific station without attendant assistance.

Direct Outward Dialing:

This feature allows station users to place external calls to the exchange network without attendant assistance.

Distinctive Ringing:

This feature permits a station user to determine by the cadence of the ringing, whether a call is internal or external.

Station-to-Station Calling:

This feature allows station users to call each other using abbreviated dialing.

Touch Call:

This feature equips all station lines for touch call dialing.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

c. CentraNet[®] Series 1000

Call Alternation:

This feature allows a station user to hold one call, make another call then talk alternately between the two parties.

Call Forwarding:

This feature provides the option of fixed and/or variable forwarding of a station's incoming calls to a predetermined number. Includes all calls or only calls reaching a busy or no answer condition (Fixed Forwarding is established and changed by the Telephone Company, whereas variable forwarding is established and changed by the station user).

Call Hold:

Allows a Main Station user to place any call involving their Main Station on hold by flashing and dialing a special code. The Main Station is then free to originate another call. The call is then retrieved by dialing the hold code a second time or by hanging up the phone.

Call Pick-Up Direct:

This feature permits a station user to pick up any ringing station in the business group by dialing a feature code plus the ringing station's intercom number. The ringing station is not required to be in the same pick-up group.

Call Pick-Up-Extended:

This feature permits a station user to dial a code to apply call pick up to groups other than its own.

Call Pick-Up-Group:

This feature permits a station user to dial a code to answer a call which is ringing at another station within the call pick-up group.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

c. CentraNet[®] Series 1000 (Continued)

Call Transfer:

Call Transfer provides for the transfer, by a CentraNet[®] station, of calls within or outside the business group. The Three-Way Calling feature is needed in addition to Call Transfer for this feature to work.

Call Waiting Cancel:

Call Waiting Cancel allows the customer with Call Waiting Service to inhibit the operation of Call Waiting for one call.

Call Waiting Dial:

This feature provides the ability for originating Main Stations to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the called station. This differs from Call Waiting Originating in that the call wait tone activation is selective, rather than automatic, on all calls.

Call Waiting Originating:

This feature allows the party making the call to activate Call Waiting on a busy line at completion of dialing on a per call basis.

Call Waiting Terminating:

Informs a busy Main Station Line, when the Main Station Line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the connection while answering the new call and return to the original connection. This can be on all calls or inter-business group calls only.

Consultation Hold:

This feature allows the initiator of a three-way call or transfer to speak privately with the third party before completing the connection.

c. CentraNet[®] Series 1000 (Continued)

Directory Number Hunting:

This feature activates hunting when any of the directory numbers of the individual lines in the hunt group are called. If that line is busy, hunting will start with that line and continue to the end of the list.

Hunting (Distributed):

Only a pilot DN is associated with this hunt group. Hunting starts after the first idle line found by the previous hunt and continues until the starting point of the hunt is reached.

Hunting (Pilot Number):

This feature provides for an incoming call to a fictitious pilot number to hunt through a rotary group of main station lines to the end of that group.

Hunting (Secretarial):

This feature provides hunting within a department to hunt to the secretary last.

Last Number Redial:

This feature allows a station user to redial the last number dialed by utilizing an access code.

Speed Dialing Short List (Individual):

(T)

Lets the Main Station user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number. Where technology exists, up to 24 dialed digits can be stored.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

c. CentraNet[®] Series 1000 (Continued)

Station Restriction:

Semi-restricted permits the customer to have selected Main Stations restricted from receiving any calls from outside the business customer group or from making any calls outside the business customer group. Intercom calling and private facilities are accessible. Fully restricted blocks calls to and from the attendant in addition to those from/to outside the customer business group.

Three-Way Calling:

This feature permits a station user using the Consultation Hold feature to put one party on hold, reach a third party, and bring all three parties together in a three-way connection.

Toll-Code Restriction:

This feature prevents customer designated stations from placing any chargeable calls. Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for as specified in other sections of this tariff. Nonrecurring charges will be waived for customers subscribing to the 900/976 Toll Restriction Only Option (Series 1000).

d. CentraNet[®] Series 2000 (The features below are in addition to the CentraNet[®] Series 1000 Package features).

Automatic Callback:

Automatic Callback permits a Main Station user who attempts an intercommunication call to a busy Main Station to be automatically connected to that line when both called and calling lines are subsequently idle.

Call Park-Multiple:

This feature permits a station user to place multiple calls on hold and later retrieve the held calls from his station or another station in the customer business group.

Circular Hunting:

This system tests all lines in the multiline hunt group regardless of the point of entry.

Data Line Security:

This feature prohibits interruption to a busy line by features such as Call Waiting, Executive Busy Override, etc.

Multiple Classes of Service:

This option gives each station a class of service which defines its calling privileges and any features restricted from its use.

Saved Number Redial:

This feature permits a station user to store a number in memory and then later redial the number using a code.

Speed Dial Long List (System):

(T)

This feature allows members of a customer business group to share a common speed call list of 30 members. One list is provided with Package 2000. Additional lists are available (see optional system features).

Uniform Call Distribution (UCD) Hunting:

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual Main Stations of a hunt group and includes Circular Hunt. Also may include queue Status Lamp, which will provide an indication at the customer premises of how long the first call in the incoming-call queue has been waiting.

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

- e. CentraNet[®] Series 3000 (The features below are in addition to the CentraNet[®] Series 1000 and CentraNet[®] Series 2000 Package features).

Call Forwarding/Incoming:

When activated by a Main Station user, automatically routes incoming calls from outside the CentraNet[®] System intended for his Main Station to any other Main Station selected within the same system or outside the CentraNet[®] system. The Main Station selected may also be the attendant. The attendant may also activate call forwarding for a Main Station.

Call Forwarding/Within Group:

This feature restricts a station user so that calls may only be forwarded to other stations in the business group.

Executive Busy Override:

This feature allows a station user to access a busy station after a break-in tone alerts the busy station.

Multi-Level Restriction:

This feature permits the subscriber to define those codes that stations may dial. This can be done on a three-digit office code basis (NNX) or a six-digit area code (NPA) and NNX basis.

Offhook Queuing:

When used with Automatic Route Selection (ARS), queuing is available on primary (first choice) routes in ARS patterns. The text and announcement provided with the optional Recorded Announcement feature will be provided by the Company. The music or music-on-queue will be provided by the customer. This requires a voice-grade channel between the central office and the customer-provided music source, and the optional Music-On-Hold feature. This feature is only available with off-hook queuing. The customer must specify the length of time

a call is held in the queue before being routed to a reorder tone. Incoming tie lines have only Off-hook queuing. All main station lines must be equipped with the same type of queuing. Off-hook queuing must have either a recorded announcement or music.

The audio input is applied to incoming calls waiting in the attendant queue or in the UCD queue. The customer must specify the length of time (etc.).

Remote Access to Features:

This feature allows authorized users to call in from the exchange network and gain access to a business group including all features associated with that group.

Ringback Queuing:

This feature permits a station user with activated queuing to go on-hook and be called when the busy facility becomes available.

Speed Dial Long List (Individual):

(T)

This feature allows a station user to place calls to 30 commonly called destinations using two to four digits.

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERING

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

- f. Optional System Features*:
(The features below can be ordered individually at applicable rates).

Attendant Data Link Console Interface:

This interface allows the use of a proprietary data-link multiplexed console which is connected to the central office and includes the following features. (Requires three (3) additional CentraNet[®] lines at applicable rates). Provided where facilities are available.

Call Hold: This feature allows an attendant to hold a call on the loop.

Call Hold Recall: This feature is used for attendant-extended calls to stations. It also applies to calls held on the loop and calls that the attendant releases from the console after keying the station number or destination number.

Camp-On With Music: This feature will allow the connection of a customer provided music source to the calling party when the caller is camped-on the destination.

Code Call Line Termination: This feature allows attendant access to customer provided Code Calling equipment.

Console Display: This console display assists attendants in handling calls efficiently. The display unit is built into the attendant console.

- * The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

f. Optional System Features^{*}: (Continued)

Attendant Data Link Console Interface: (Continued)

Multiple Listed Directory Numbers: A customer may have many listed directory numbers. To handle this efficiently, each number has a unique Incoming Call Identification (ICI) lamp so that the attendant can answer appropriately.

The only limit to the number of listed directory numbers that can be assigned is the number of available lamps and keys on the Attendant Console.

Recorded Announcement: This feature permits the routing of either originated or extended attendant calls to an announcement.

Trouble Key on Console: This feature allows customers to define categories of trouble codes, which can be activated by the attendant during call processing.

Attendant Flexible Night Answer:

This feature permits the attendant to change the Predetermined Night Answer station number by dialing a feature code plus the new night answer station number.

Attendant Identification-Multiple Directory Numbers:

This feature enables the attendant to identify an incoming call by Directory Number using the console display. If the customer has multiple directory numbers, the attendant will know by the number appearing on the console display which department is being called.

- * The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

f. Optional System Features^{*}: (Continued)

Attendant Non-Data Link Console Interface:

This feature allows the use of a multiline attendant instrument designed specifically for console service. A physical pair is required for each loop at the applicable Main Station Line rates.

Attendant Predetermined Night Answer:

This feature, activated by the attendant, routes calls placed to the listed directory number to some predetermined station, hunt group, or station. This feature also allows transfer of calls during commercial power failure.

Attendant Universal Night Answer:

When activated by attendant, listed number calls are routed to this equipment. Calls can then be answered by individual stations by dialing the associated feature code. This feature also allows transfer of calls during commercial power failure.

Authorization Codes (AC):

The AC feature allows the customer to define a set or sets of dialing privileges, to associate an AC with each set, and to use the AC to restrict the dialing privileges to authorized personnel. The AC must be dialed before a call can be advanced. A customer cannot have authorization codes with a different amount of digits.

* The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

S112.1 CentraNet[®] Service (Continued)

S112.1.3 Definition of Features (Continued)

f. Optional System Features^{*}: (Continued)

Automatic Route Selection (ARS):

ARS provides for the origination of ten-digit, off-network calls to a public telephone number. An access code is dialed followed by the destination digits. A pattern is selected and the route list is checked for an idle route with the proper FRL (if a feature). If no idle route is available, the call is put into queue for the primary route or sent to reorder tone. Routes may include Foreign Exchange, WATS, and interexchange carrier lines. A maximum of 3 patterns will be allowed for each NPA or NPA NXX list. A maximum of 10 routes is allowed per pattern. Each WATS band is considered a separate route. A maximum of 64 NPA NXX lists will be allowed. ARS does not allow for toll restriction or toll diversion. This feature may also include:

Expensive Route Warning (ERWT): A tone will be assigned to certain routes as designated by the customer. When one of these designated routes is selected, a tone will be returned to the originating caller. The caller has a specified number of seconds to hang up or the call will be advanced on the expensive route.

Facilities Restriction Level (FRL): Each main station line is assigned an FRL as is every facility in all routes. When a call is originated, the FRL of the main station line is compared to the FRL of the facility selected for routing. If the FRL on the facility is equal to or less than the main station FRL, the call is advanced. If the FRL on the facility is greater than the FRL on the line, a tone is returned. An Authorization Code can be dialed to override the FRL. FRL's are furnished only with ARS. The

- * The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Automatic Route Selection (ARS):

Facilities Restriction Level (FRL) (Continued)

maximum number of FRL's available is 8. All main station lines and incoming tie-line terminations with ARS capability must be assigned a FRL.

Time of Day Routing - This feature provides for route selection based on the most economical path for a particular time of day.

Code Call Access:

Code Calling provides dial access to customer premises located code calling equipment by Main Station attendant access of a CentraNet[®] system. The dialed two- or three- digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any Main Station in the system. For Rates and Charges applicable for control channels when required for supervision purposes with equipment and/or apparatus located on the customer premises, refer to Section S20 of this Tariff for Private Line rates.

Conference Calling:

This feature permits a station user or attendant to form a conference with a maximum of twenty-four parties, including other stations and/or parties reached over trunks. The capability for offering the feature is provided in multiples of eight.

- * The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

S112.1.3 Definition of Features (Continued)

f. Optional System Features^{*}: (Continued)

Dictation Access and Control:

This feature provides for station access to customer provided dictation equipment. For Rates and Charges applicable for control channels when required for supervision purposes with equipment and/or apparatus located on customer premises, refer to Section S20 of this Tariff for Private Line rates.

ETS/CCSA Access:

This feature provides access to and from an ETS/CCSA network.

FX/FCO Access:

This feature provides access to and from an InterLATA or IntraLATA Foreign Exchange Circuit or Foreign Central Office Circuit.

Limited Automatic Call Distribution:

This option allows incoming trunk calls to be directed to and distributed among a select group of stations using distributive hunting.

Music-on-Hold:

This feature provides access to a common music source for use with call hold, transfer, park, and queuing features.

Paging/Public Address Access:

This feature provides a central office interface to a customer premises for paging and/or public address.

* The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

S112.1.3 Definition of Features (Continued)

f. Optional System Features^{*}: (Continued)

Preferential Hunting:

Permits a prehunt over a subset or preferential group of main stations before hunting through the entire multiline hunt group. The hunt through the group may be a regular or a circular hunt. Each main station may have its own preferential group or list.

Priority Queuing:

This feature permits a station user remaining off-hook to queue for a facility to obtain a line ahead of another station user queuing for a facility that goes on-hook.

Proprietary Set Interface:

This interface provides capability to connect business sets to CentraNet[®]. When Display sets are used, this will allow the activation, where available, of calling number display (intra-business group only), call announce, and visual message waiting indication.

Pseudo Number:

A software number that has no real switch hardware attached, but is given all the data base characteristics associated with a normal line. The pseudo number provides multi-line set capability, allows the user to originate and receive calls, and to use CentraNet features as assigned just as though the pseudo number has a real line identity. Pseudo numbers may also be assigned in a hunt group configuration.

- * The contract period for the Optional System Features is based upon the initial contract period for the CentraNet[®] System. Subsequent Optional System Feature additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract.

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERING

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.4 Liability of the Telephone Company

- a. The Telephone Company makes no guarantee and assumes no liability for the accuracy, performance or non-performance of the CentraNet[®] Service Features except as shown in Section S2.5 of this tariff.

S112.1.5 Conditions

- a. The rates and charges for CentraNet[®] Service apply to establishment of CentraNet[®] Service only. Other services as provided for in other sections of the Tariff may be furnished in connection with this service at rates and charges specified for such services.
- b. CentraNet[®] Service is offered on a contractual basis commencing on the date the service is established.
 - (1) The rates per CentraNet[®] Line, plus the selected Feature Series rate per line, apply each month from the time the System is placed in service until the CentraNet[®] Service is discontinued.
- c. In the event that the CentraNet[®] Service is terminated by the customer prior to completion of the initial contract period, the Company will develop the applicable contract termination charge using the formula described below and levy it for payment by the customer.
 - (1) In the event of termination of CentraNet[®] Service during the contract period, the customer will remain liable for the balance of contract period rates adjusted to their then present worth equivalent, based upon a 12% discount rate, which shall upon any such termination immediately become due and payable in their entirety.
 - (2) In the event the customer reduces the number of CentraNet[®] lines initially contracted, by 20% or more, the termination liability as specified in (1) above is applicable and will be based upon the initial number of lines under contract, as set forth following.

c. (Continued)

(3) Expiration of Contract Period:

- (a) CentraNet[®] customers must upon the expiration of their contract select a new contract period as offered in the current tariff.
- (b) A CentraNet[®] customer may at any time during his selected payment period resubscribe for an equal or longer payment period at the current tariff rates subject to the following conditions.
 - i. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - ii. The new payment period begins with the billing date following the date the new payment period is requested.
 - iii. No termination charge applies for the former payment period.
 - iv. A Network Access Change charge as specified in Section S4 of this Tariff will apply.
- (c) A CentraNet[®] customer may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions:
 - i. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - ii. The new payment period begins with the date requested.

- c. (Continued)
 - (3) Expiration of Contract Period: (Continued)
 - (c) (Continued)
 - iii. A termination charge applies to the former payment period.
 - iv. A Network Access Charge charge as specified in Section S4 of this Tariff will apply.
- d. Suitable and sufficient space for any remote units required shall be leased by the Company from the customer.
 - (1) Suitable space includes provisions for atmospheric control, which encompasses the following environmental requirements: (1) dust free, (2) controlled temperatures ranging from 50° to 85° Fahrenheit, with consideration given to heat loss and/or gain of the equipment, and (3) relative humidity of 20% minimum and 55% maximum.
 - (2) Commercial power necessary to operate the remote units, if required, located on the customer's premises shall be provided by the customer.
- e. Rotary dial stations may not be capable of accessing all CentraNet[®] Service features shown in Section S112.1.2.
- f. CentraNet[®] Service system lines are not subject to Business Exchange Service Rates set forth in Section S3 of this Tariff. However, Call Connection and Minutes of Use Rates set forth in Section S3 of the Tariff apply to exchange calls (if appropriate) originating from a CentraNet[®] Service system.
- g. This Tariff contemplates the use of central office equipment selected by the Company. When special central office equipment or features are provided at the request of the customer, special assembly rates and charges may be applied in addition to the applicable rates for CentraNet[®] Service.

(N)

S112.1 CentraNet[®] Service (Continued)

S112.1.5 Conditions (Continued)

- h. This Tariff (including the rates and charges) for CentraNet[®] Service is subject to such changes or modifications as the Commission may from time to time direct or allow in the exercise of its jurisdiction.
- i. Subsequent lines additions/deletions.
 - (1) Subsequent line additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract. If the line addition results in the customer's total CentraNet[®] line count exceeding the threshold of the line group previously contracted, lines will be billed at the rate for the larger group.
 - (2) Subsequent line deletions resulting in reductions equal to or exceeding 20% of the initial lines under contract will be treated as set forth in S112.1.5.c.(2) preceding. If the reduction causes the total number of lines to fall within a different line group, all remaining lines will be billed at rates according to the associated line group.
- j. If a customer chooses to combine CentraNet[®] Service stations terminating at different locations into a single CentraNet[®] Service system, then all stations must be served by the same central office switching equipment.
- k. Private line arrangements connected with CentraNet[®] Service are subject to applicable rates and charges shown in Section S20 of this Company's Tariff.
- l. Certain Optional Feature capabilities as shown in Section S112.1.6.b.(5) may not be compatible with other Series or Optional features.

S112.1 CentraNet[®] Service (Continued)

S112.1.7 Subsidiary System Arrangement

a. General

- (1) A Subsidiary System of a CentraNet[®] system is a customer-provided equipment system which is furnished Automatic Access lines from the central office serving the customer's CentraNet[®] system and which is connected by tie lines to that CentraNet[®] system.
- (2) A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer's CentraNet[®] system to the stations of one or more Subsidiary Systems.

b. Regulations

- (1) Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the Subsidiary System is properly equipped for DID service.
- (2) The Automatic Access Lines of the Subsidiary System are provided at the same rates and charges as specified for such Automatic Access Lines furnished from the central office serving the customer's CentraNet[®] system. In addition, foreign central office or foreign exchange mileage charges are applicable to those Automatic Access Lines when the Subsidiary System is located outside the area of that serving central office.
- (3) The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one Subsidiary System is involved, each Subsidiary System is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.

S112.1 CentraNet[®] Service (Continued)

S112.1.7 Subsidiary System Arrangement (Continued)

b. Regulations (Continued)

- (4) Tie lines connecting the CentraNet[®] and Subsidiary Systems are provided at the same rates and charges as specified for CentraNet[®] tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- (5) SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by Subsidiary System stations be via the central office serving the customer's CentraNet[®] system.
 - (a) Where the Subsidiary System station's outward local and toll network calls are placed via tie lines and the network access registers of the CentraNet[®] system, the charges for such calls are identified and billed as primary directory listing calls of the CentraNet[®] system.
 - (b) Where the Subsidiary System station's outward local and toll network calls are placed via Automatic Access Line, the charges for such calls are identified as primary directory listing calls of the CentraNet[®] system.
- (6) The CentraNet[®] Subsidiary System Arrangement is provided solely for the furnishing of SSA station numbers to Subsidiary Systems for local and toll network and intercommunication calling and does not provide any of the basic or optional service features of CentraNet[®] service to stations of the Subsidiary Systems.

S112.1.8 Telephone Numbers and Facilities Reserved for Future Use

a. General

- (1) A customer may reserve preassigned telephone numbers and facilities necessary to meet their specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserved telephone numbers, timely main station additions cannot be assured and facilities necessary for growth requirements will be provided only within normal engineering and construction intervals.
- (2) Telephone numbers reserved for future use services include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as required by the customer.
- (3) The assignment of telephone numbers and the sequence of numbers assigned to a CentraNet[®] system is made at the discretion of the Company.
- (4) The service is furnished subject to the availability of facilities and telephone numbers.

¹Apply rates and charges as specified in Section S13 of this Tariff for DID service.

²Apply rates and charges as specified in Section S3 of this Tariff for Automatic Access Line.

³Tie lines are provisioned using Automatic Access Lines. Apply rates and charges specified in Section S3 of this Tariff.

S112.1.8 Telephone Numbers and Facilities Reserved for Future Use (Continued)

a. (Continued)

- (5) Calls to reserved (unassigned) telephone numbers will be routed to intercept over CentraNet[®] common recorded announcement facilities.
- (6) Telephone numbers furnished herein retain their reserve status until assigned to a main station at which time the service assumes applicable rates and charges.
- (7) Reserved numbers not assigned to a main station as agreed in S112.1.8 will be billed at applicable rates until removed from reserved status or billed as an active CentraNet[®] main station.

S112.1.9 Rates and Charges

- a. CentraNet[®] Service is a highly competitive service. Minimum rates and charges for CentraNet[®] Service will be furnished under cover with the Public Service Commission.
