

SUPPLEMENTAL SERVICES

★ ★ ★ (C)
A. APARTMENT DOOR ANSWERING SERVICE (1) |

1. GENERAL

This service permits occupants of individual apartments in an apartment house to be called through their telephone exchange service from a customer-provided telephone located in the lobby of the apartment house. The telephone exchange service of the occupants of the apartments may then be used to operate a customer-provided apartment house door opening device by dialing a code. (C)

If a call from the customer-provided lobby telephone or any other call to or from the occupant's service is in progress when a call of the other type is placed, a distinctive tone will automatically be placed on the line to notify the occupant that another call is waiting. The occupant can either complete the call in progress and then answer the other call, or hold the call in progress by switchhook operation and answer the other call. If the occupant holds the call in progress and then hangs up without returning to it, the call will continue to be held and the occupant's provided station will be automatically called by the ringing of the bell. (C)

2. REGULATIONS

- a. The customer for Apartment Door Answering Service may be only the owner or operator of an apartment house in which the service is to be furnished. Each Apartment Door Answering Service System must be served by the normal serving central office building and may not be used by more than one customer.
- b. The customer shall be responsible for the payment of all charges due with respect to the service.
- c. Occupants will be responsible to the Telephone Company for their own respective telephone services and any other telecommunication services or equipment furnished them, exclusive of Apartment Door Answering Service.
- d. The service is available only if furnished to all the apartments in the apartment house, whether occupied or not occupied.

NOTE:

- (1) Not available for new installations. Additions and maintenance replacements furnished only to the extent of available stock. (C)

(C) Indicates change.

ISSUED DECEMBER 12, 1984.

EFFECTIVE (FEBRUARY 10, 1985)
FEBRUARY 17, 1985.

SUPPLEMENTAL SERVICES

A. APARTMENT DOOR ANSWERING SERVICE (1) (Cont'd)

2. REGULATIONS (Cont'd)

- e. The customer is responsible for: (1) providing, installing and maintaining the door opening equipment, furnishing the power to activate the door opening equipment and connecting the door opening equipment to the Telephone Company terminal, (2) providing, installing and maintaining the lobby telephone used in connection with this service, (3) providing, installing and maintaining the conduit or other suitable means required for the Telephone Company channel facilities within the building and (4) providing an up-to-date directory showing the code to be dialed for each apartment.
- f. Each Apartment Door Answering Service common equipment has a maximum capacity of 4 customer-provided lobby telephones and 400 apartment arrangements. Only one lobby telephone associated with a common equipment may be used at any one time. Additional Apartment Door Answering Service common equipment may be furnished at Tariff charges, where required.
- g. Where an occupant has more than one telephone exchange service line in one apartment in the apartment house, this service will be furnished on only one of such lines. This service will not be furnished on foreign exchange or foreign central office lines.
- h. An apartment without regular telephone exchange service, whether the apartment is occupied or not occupied, will be furnished connection arranged for access from the Apartment Door Answering Service only.
- i. Each apartment with regular telephone exchange service, where the Apartment Door Answering Service is not associated with such service, will be provided with a connection arranged for access to the Apartment Door Answering Service only. In such a case, the charges will be billed to the customer of the Apartment Door Answering Service.
- j. No per call charge applies for calls between the lobby telephone and the apartments.
- k. Apartment Door Answering Service may be furnished in connection with Individual regular telephone exchange service. (C)

NOTE:

- (1) Not available for new installations. Additions and maintenance replacements furnished only to the extent of available stock.

SUPPLEMENTAL SERVICES

A. APARTMENT DOOR ANSWERING SERVICE (1) (Cont'd)

2. REGULATIONS (Cont'd)

- 1. Timing of a local or toll call, either received or originated, continues during the period such call is held by the occupant. (C)
- m. No access to bridged lines or stations outside an occupant's apartment will be provided from the lobby telephone. (C)
- n. This service is furnished subject to the availability of facilities. (C)
- o. The provision of this service does not create any relationship or obligation, direct or indirect, to any person other than the customer to this service. (C)

Telephone service furnished by the Telephone Company is not represented as adapted for operating customer-provided door opening equipment. The use of the customer's door opening equipment in connection with the facilities of the Telephone Company is permitted only on the condition that the Telephone Company shall not be responsible to the customer or any other person for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission, or failures or defects in the Telephone Company equipment furnished for Apartment Door Answering Service, except to the extent set forth in Section 1 of this Tariff, and the customer indemnifies and saves the Telephone Company harmless from any and all claims to the extent set forth in said Section 1.

E. DATA ACCESS ARRANGEMENT ^{1, 2}

1. GENERAL

The term "data access arrangement" denotes a protective connecting arrangement for use with the network control signaling unit or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria set forth in c. following.

¹ Formerly included in Section 21A of this Tariff.

² Not available for new installations or additions. Maintenance replacements furnished only to the extent of available stock.

(C) Indicates Change

SUPPLEMENTAL SERVICES

E. DATA ACCESS ARRANGEMENT (1) (2) (Cont'd)

1. GENERAL (Cont'd)

Where the customer elects to use customer-provided data transmitting and/or receiving equipment through a data access arrangement:

- a. The Telephone Company shall furnish the data access arrangement for use with the network control signaling unit.
- b. The customer shall furnish the equipment which performs the functions of data signal conditioning.
- c. To protect the telecommunications network and the services furnished to the general public by the Telephone Company from harmful effects, the customer-provided data transmitting facilities must comply with the following minimum network protection criteria:
 - (1) to prevent excessive noise and crosstalk in the network, it is necessary that the power of the signal at the central office shall not exceed 12db below one milliwatt when averaged over any three second interval. To permit each customer, independent of distance from the central office, to supply signal power which approximates the 12db below one milliwatt limit at the central office, the power of the signal which may be applied by the customer-provided facilities to the Telephone Company interface located on the customer's premises will be specified for each customer's location, but in no case shall it exceed one milliwatt.
 - (2) to protect other services, it is necessary that the signal which is applied by the customer-provided facilities to the Telephone Company interface located on the customer's premises meet the following limits:
 - (a) The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18db below the power of the signal as specified in (1) above.
 - (b) The power in the band from 4,000 Hertz to 10,000 Hertz shall not exceed 16db below one milliwatt.
 - (c) The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24db below one milliwatt.

NOTES:

- (1) Formerly included in Section 21A of this Tariff.
- (2) Not available for new installations or additions. Maintenance replacements furnished only to the extent of available stock.

SUPPLEMENTAL SERVICES

E. DATA ACCESS ARRANGEMENT (1) (2) (Cont'd)

1. GENERAL (Cont'd)

c. (Cont'd)

(2) (Cont'd)

(d) The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36db below one milliwatt.

(e) The power in the band above 40,000 Hertz shall not exceed 50db below one milliwatt.

(3) to prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided facilities to the Telephone Company interface located on the customer's premises at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

2. RATES

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>	<u>USOC</u>
Arrangement for manual connection.....	\$15.00	\$2.11	CDT
Arrangement for unattended sending and receiving through a voltage type control interface.....	30.00	6.33	CBS
Arrangement for unattended sending and receiving through a contact closure type control interface	30.00	4.22	CBT
Power supply for use with contact closure type interface when not supplied by customer.....	-	1.32	CBV

NOTES:

- (1) Formerly included in Section 21A of this Tariff.
- (2) Not available for new installations or additions. Maintenance replacements furnished only to the extent of available stock.

SUPPLEMENTAL SERVICES

F. FOUR WIRE SERVICE TERMINATING ARRANGEMENT

1. GENERAL

The Four Wire Service Terminating Arrangement permits switching equipment that is designed to use four wire terminations to be connected to the Telephone Company's standard two wire Foreign Exchange (FX) and Foreign Central Office (FCO) exchange facilities toll network. While this offering contemplates the use of four wire facilities, between the local serving wire centers and the premises switching equipment, two wire facilities may be used.

Transmission performance that meets the established standards of the Telephone Company will be obtained over facilities connected to a Four Wire Service Terminating Arrangement. If a customer requests improvement beyond this, additional equipment will be provided, where facility conditions permit, subject to additional rates and charges based on the costs incurred.

2. RATES⊗

The following rates apply for each four wire service terminating arrangement, and are in addition to the applicable rates for the associated FX or FCO dial tone line.

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>	<u>USOC</u>
Four Wire Service Terminating Arrangement, each			
When installed coincident with the dial tone line with which associated	\$60.00	\$23.40 (I)	4WF
When installed subsequent to the dial tone line with which associated	90.00	23.40 (I)	4WF

⊗ Flexibly Priced.

(I) Indicates increase.
