
SECTION 4 - DEFINITIONS

(N)

Rule 1 DEFINITIONS

Acceptance and Confirmation - Written acknowledgment to Customer that an application for service has been accepted by Verizon Select Services Inc.

Access Arrangement - Any equipment or access facility necessary to interconnect Customer's voice/data/video equipment to a Carrier Point-of-Presence (POP) for transmission purposes.

Application for Service - Customer request in the form of standard Carrier order that provides applicable service description, technical data and pertinent information that allows Carrier to design the network facilities for Customer and its authorized users.

Additional Period - Unit of time used for measuring and charging for time in excess of the initial period.

Authorization Code - Numerical code, one or more of which are available to Customer to enable it to access Carrier's network, and which are used by Carrier both to prevent unauthorized access to its facilities and to identify Customer for billing purposes.

Authorized User - Person, firm or corporation authorized by Customer to be connected to Customer through private line facilities.

Automatic Number Identification (ANI) - Refers to the calling telephone number identification, which will be forwarded to Carriers' network by the Local Exchange Company (LEC) as a call is placed.

B8ZS - Bipolar with eight zero substitution (B8ZS) is a line coding technique which permits DS-0 and DS-1 transmission with more than 15 consecutive zeros. B8ZS supports 64 Kbps clear channel transmission.

Bandwidth - In Hertz, the approximate size of the channel or termination and represents the difference between the highest and lowest frequencies of a band.

Baseline Service - Allows Customer to arrange for their own local access via another carrier. Customer is responsible for the installation, maintenance, and repair of the local access facilities. Carrier is only responsible for the POP to POP, which includes installation, repair, billing, and test and turn up.

Bill to Third Party - Billing arrangement by which a call may be charged to an authorized station other than the station originating the call or station where the call is terminated.

Bit - Smallest unit of information in a binary system of notation.

Bits per second (Bps) - Number of bits to be transmitted in a one-second interval.

Calling Card - Billing arrangement by which a call may be charged to an authorized carrier's calling card account.

Carrier - Verizon Select Services Inc.

Central Office Connection - Connection between local access facilities and Carrier service components for facilities.

Resolution No. _____

SECTION 4 - DEFINITIONS (Continued)

(N)

Rule 1 DEFINITIONS (Continued)

Channel - Electrical transmission path for two-way communications.

Clear Channel Capability - Allows Customers to utilize 64 Kbps per DS-O channel by allowing DS-O or DS-1 transmission independent of the number of consecutive zeros or pulse density.

Collect Call - Billing arrangement by which the charge for a call may be reversed provided the charge is accepted at the called station.

Commission - California Public Utility Commission.

Contract Service Arrangement - Agreement in which Carrier provides services under specified terms and conditions of this Tariff.

Conversation Minutes - For billing purposes, calls are billed based on conversation minutes, which begin when the called party answers, as determined by answer supervision, and end when either party disconnects.

Coordinated Service - Allows Customer to provide their own local access via another carrier. Carrier is responsible for the network components with the exception of the local loop. Carrier will coordinate the maintenance and repair of the local loop, however, Carrier will not bill or install it.

Customer - Company, individual, or other entity which orders or uses service and is therefore responsible for the payment of charges due and for compliance with Carrier's Tariff regulations.

Customer Dialed Direct Station-to-Station - Service where the person originating the call dials the telephone number desired, completing the message without the assistance of an Operator and the message is billed to the originating number.

Customer Premise - Customer or user's premises, including Customer-designated non-Carrier premises.

Data - Information represented as characters in digital or analog form to which meaning can be assigned.

Database Routing - Used to specify routing based on either the digits a caller enters on the keypad or the caller's ANI.

SECTION 4 - DEFINITIONS (Continued)

(N)

Rule 1 DEFINITIONS (Continued)

Digital Transmission - Information transmitted using digitally encoded signals.

DS-0 - Facilities provide for the two-way transmission of isochronous bipolar serial data at a rate of 56/64 Kbps.

DS-1 - Facilities provide for the two-way transmission of isochronous bipolar serial data at a rate of 1.544 Mbps.

DS-3 - Facilities provide two-way transmission of isochronous bipolar serial data signals at 44.736 Mbps. The service can be provided with either an optical or electrical interface as specified by Customer.

Enhanced Routing - Provides routing and control features which Customer may utilize by Voice Intelligent Network - Enhanced Toll Free Service. The routing features may be combined to create a customized routing plan for each Enhanced Routing number. Command Routing can be utilized to activate alternate routing plans by placing a call to designated Carrier personnel.

Entrance Facility - Physical circuit arrangement which connects and entrance site to a POP.

Entrance Site - Location of Carrier's transmission facilities from which services can be provided for Customer to any other entrance site or POP.

Facility (or Facilities) - Any item or items of communications plant or equipment used to provide or to connect to specialized services.

Frame Relay Service - High performance, cost effective data offering for connectivity of multiple local area networks (LANs) or Systems Network Architecture (SNA) locations.

Full Service - Includes all components from one Customer premise to another Customer premise. This includes local access facilities and any network components covered in this Tariff. Carrier is responsible for ordering, installation, maintenance, coordination, repair, billing, and test and turn up of the service from premise to premise. Customer is responsible for accurate information pertaining to ordering, repair, contact information, billing and product specific requirements.

Interactive Toll Free (IVR) - Allows callers to access information in Customers computer database and to receive that information using an ordinary touch-tone phone. This system also enables callers to execute certain transactions without the intervention of Customer Service personnel.

Inter Office Channel - Private line service element that connects two central offices POPs.

Initial Period - Minimum unit of time for which a rate is charged for a connection between given points.

SECTION 4 - DEFINITIONS (Continued)

(N)

Rule 1 DEFINITIONS (Continued)

Local Access Facility - Channel provided by the local telephone company or alternative provider to connect Carrier's POP to Customer's location.

Local Access and Transport Area (LATA) - Defined geographic area within which the local telephone company may provide telephone services and/or facilities.

Local Telephone Company - Furnishes exchange telephone service.

Main Billed Account - Customer name, address and account number to which charges are billed.

Multipoint - Private line service that connects three or more central offices.

Network Interface - Demarcation point on Customer's premise that defines the end of the supplier's responsibility.

Office Connection - Private line service element that interconnects channels and other service elements to a central office, including access connections and function connections.

Off-Peak Period - 7:00 PM up to, but not including, 7:00 AM local time of the originating location, Monday through Friday and anytime Saturday, Sunday and Holidays.

Operator - Inclusive of an automated or live operator.

Operator Assisted Station-to-Station - Service where the person originating the call requests the Operator to reach a particular number.

Payphone - Telecommunications device that allows users to place calls by several different methods, (N)
e.g., sent paid-coin calls, operator-assisted, calling card or credit card. (N)

Peak Period - 7:00 AM up to, but not including, 7:00 PM local time of the originating location Monday through Friday.

Person-to-Person - Service where the person originating the call requests the Operator to reach a particular person, mobile station, department, or office.

Point of Presence (or POP) - Location in Carrier's system where local access facilities connect to an interexchange carrier's network.

Prepaid Calling Card - Printed card containing the 800 access number, authorization code, and dialing instructions for prepaid calling service.

Prepaid Calling Service - Prepaid telecommunications service which provides Customer with an 800 access number and an authorization code, and allows Customer to originate outbound, direct dial, long distance calls over Carrier's network.

SECTION 4 - DEFINITIONS (Continued)

(N)

Rule 1 DEFINITIONS (Continued)

Real Time ANI - Refers to the delivery of calling party ANI to Customers using the Real Time ANI feature.

Service - Any or all service(s) provided by Carrier pursuant to this Tariff.

Service Period - Service date to Customer-requested end date.

Serving Wire Center - Physical location within a Service Wire Center area used to determine mileage sensitive rates.

Sub-Minute Rating - Consists of the initial 18 seconds rated at the appropriate initial period rate. Each increment of six seconds thereafter is rated at the appropriate additional period rate.

Third Party Number - Call where Customer places a call and requests charges to be billed to a different telephone number from the calling number or the called number.

(N)

(N)

Units - Element used as a rate measure for prepaid calling service.
