PREMIUM TIME WORK

A. REGULATIONS

Charges for premium time work to make installations and changes before or after the Company's regular business hours apply when the customer requests that the work be done during other than the Company's regular business hours, or where, because of too short notice from the customer, premium time work is required to complete the work by a specified date set by the customer.

B. RATES

The charge for premium time work is the difference between the total cost of the work and the cost of the work if performed on a normal basis.

C. APPLICATION OF CHARGES

Charges for premium time work apply:

1. For work done on any work day, Monday through Saturday, before or after the hours during which work is ordinarily scheduled, except in cases where by previous arrangement with the customer, work is regularly scheduled beyond these hours and is done at non-premium wage rates.

2. For any work done on Sundays and holidays.

3. For work done at any time on Saturday for which the Company is required to pay premium wage rates because of insufficient notice from the customer to permit scheduling the work at regular wage rates.
