

VERIZON CALLING SERVICES

VERIZON calling services consist of optional services for use in connection with a customer's Local Exchange Service. VERIZON calling services are available in either individual or packaged configurations. The optional VERIZON calling services are as described in the following:

Speed Calling

- permits the customer to place calls to local or long distance numbers by dialing abbreviated codes instead of the complete telephone numbers. Two arrangements of Speed Calling are available; 8-number capacity using one digit abbreviated codes and 30-number capacity using two digit codes. Customers may make changes or entries in their repertory by dialing special codes.

Last Number/Saved Number Redial *¹

- permits the customer to dial a code which initiates the switch to automatically place a call to the last called number stored. Each time a customer dials, the most recent number is stored. Saved Number Redial allows the customer to store the called number by dialing a code at any point during a call, or upon encountering a busy or no answer condition when placing a call. The customer may place and receive any number of calls in the normal manner after a number is stored. A customer wishing to reinitiate a call to the party whose number was stored dials a code and the call is placed automatically.

¹ Withdrawn from residential service effective July 20, 2013; still available for resale until October 19, 2013, on which date the foregoing terms shall be effective for resale.
