PRIVATE BRANCH EXCHANGE SERVICE

I. GENERAL

Applicability

Applicable to network services of Centrex and Direct Inward Dialing and subject to the constraints of the Company's Product Guide.

Territory

Within the exchange areas of all exchanges as said areas are defined on maps as part of this Product Guide.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS

A. Inward Dialing Service - DID (AE - SXS 301 Type Equipment)

1. Stations (Maximum - Unlimited)

Attendant recall
Conference - 2 stations & 1 trunk
Consultation - hold
Controlled transfer
Direct outward dialing to trunks, tie lines ¹, or private lines ¹

Service groups - 3 classes
Station dialing
Restriction (restricted, semirestricted or nonrestricted)
Universal night answering access

¹ When system is so arranged

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

A. Inward Dialing Service - DID (AE - SXS 301 Type Equipment) - Continued

2. System

Code restriction (level access denial by station or groups of stations)
Direct Inward Dialing to stations
Night answering - Universal or predetermined
Standby power
Standby signaling
Station group hunting - sequential
Trunk groups - unlimited

3. Capacity and Limitations

a. Common Equipment

- (1) This is a step-by-step (SXS) rack mounted system, with unlimited capacities for station lines, trunks and intercommunicating paths and trunk groups limited only by selector access availability.
- (2) This system is provided by the Company in accordance with the Company's operating conditions and engineering standards, where operating conditions and facilities permit.

4. Switching System Line

- a. The rates include switch arrangement and trunk line facilities except foreign exchange trunk line facilities necessary to furnish basic features of DID service.
- b. The switching system line rate, whether restricted, semi restricted or nonrestricted will be computed by adding the rates for Intrasystem Service and direct inward and outward dialing features.
- c. The above rate treatment for direct inward and outward dialing is applicable only when the Intrasystem Service is provided by the Company and is not applicable in conjunction with customer-provided Intrasystem facilities.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

A. Inward Dialing Service - DID (AE - SXS 301 Type Equipment) - Continued

5. Supplemental Services Arrangement

Arrangement to provide full denial service will be furnished where the customer desires to deny access to toll and zone calling areas on in-service central office trunks. The charges and rates for this service are in addition to the applicable trunk service connection charge and monthly rate and contemplate station, operator, tie line or private line access to a trunk or trunk group.

Metering arrangements to mechanically record each outgoing local exchange call from a station line, tie line or private line will be provided only in connection with a full line so arranged. Central office metering arrangements will be provided in accordance with the charges, rates and special conditions in Section 5 of this Product Guide.

Full toll denial service will only be provided where the serving ("dial tone") central office and the customer are in exchanges serviced by this Company.

On any DID system for which message waiting or metering service is provided where stations access a trunk(s) arranged for full denial service, the capability to transfer a trunk call (outgoing) to another station will not be provided.

When an attempt is being made to place a toll or zone calling call in calling areas which are denied, the call will be diverted to a recording and not to an operator of the customer or the Company. This is the function of the toll denial trunk, not the DID system.

The arrangement will permit access only to the Traffic Service Position System (TSPS) toll operator and the arrangement that will deny access to toll and/or zone calling prefixes but will permit access to the Traffic Service Position System (TSPS) toll operator will only be available where the serving central office is arranged to access the traffic service position system network.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

A. Inward Dialing Service - DID (AE - SXS 301 Type Equipment) - Continued

5. Supplemental Services Arrangement - Continued

Selective access to certain customer-designated telephone, prefixes (or codes) will be provided, where compatible, in connection with local and foreign exchange trunks or private lines which terminate on the mechanical arrangements of DID systems.

This arrangement will prevent access to certain telephone prefixes (or codes), while allowing calling of other telephone prefixes (or codes), at the discretion of the customer, subject to the limitations of the arrangement.

Local and foreign exchange trunks or private lines may be provided with access to different preselected dialing prefixes within the same system on different groups or stations. A separate selective arrangement is required for each group of preselected dialing prefixes.

Each station arranged for the universal nonrestriction feature may access all trunks or private line associated with the DID system irrespective of the selective arrangements applicable to each trunk or private line.

Changes in, rearrangements of, or additions to, nonrestricted prefixes caused by Company-initiated telephone prefix (or code) changes will be made by the Company at no charge to the customer. All other changes or rearrangements made at the customer's request will be made at the appropriate charge specified herein.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

B. Centrex Service (AE - SXS 311 Type Equipment)

1. Stations (Maximum - Unlimited)

Attendant Recall on operator handled calls
Conference - 2 stations and trunk
Consultation - hold
Controlled transfer
Direct Outward Dialing to trunks, tie lines 1, or private lines ¹
Distinctive ringing (identifies whether local or incoming call)
Immediate ring
Nuisance trap (provides for "hold and trace" within the centrex system)
Service group - 3 classes
Station Dialing
Restriction: Restricted, semirestricted or nonrestricted
Universal night answering access

2. System

Automatic number identification of outward traffic
Code restriction (level access denial by station or groups of stations)
Direct Inward Dialing to stations
Intercept of unassigned terminals (provided in accordance with operating procedures and standards of the Company)
Night answering - Universal or predetermined Standby power
Standby signaling
Station group hunting - sequential (10 stations max.)
Trunk groups - unlimited

¹ When so arranged

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

B. Centrex Service (AE - SXS 311Type Equipment) - Continued

3. Capacity and Limitations

a. Common Equipment

- (1) This is a step-by-step (SXS) rack mounted system, with unlimited capacities for station lines, trunks and intercommunicating paths with trunk groups limited only by selector access availability.
- (2) The rates and charges set forth in this Section contemplate the provision of service under average installation conditions, in keeping with established standards of the Company and the availability of appropriate facilities. If unusual installation costs are involved, the Company may decline the provision of service or require the customer to pay all or a portion of such costs, the amount depending on whether the revenue to be derived from the service is sufficient to warrant the Company assuming such costs. The amount of such additional installation costs will depend on the circumstances in each case and charges to the customer are subject to prior authorization by the Public Utilities Commission.
- (3) In addition to the basic service features, Centrex Service includes detail billing of toll traffic, and optional bulk or detail billing of zone calling traffic or local calls in a measured rate area (central office located centrex only) by station line number.

b. Primary Line

- (1) The primary line rate, whether restricted, semirestricted or nonrestricted will be computed by adding the rates for Intrasystem service and direct inward and outward dialing with automatic number identification of outward traffic.

The above rate treatment for direct inward and outward dialing feature is applicable only when the Intrasystem Service is provided by the Company and is not applicable in conjunction with customer-provided intrasystem facilities.

- (2) The rates for primary lines include the switch arrangement and trunk line facilities except foreign exchange trunk line facilities necessary to furnish the basic features of Centrex service.

c. Two Digit Dialing Arrangement

- (1) The rates and charges herein do not include access arrangements or other charges and rates.
- (2) When required by the customer, a uniform dialing arrangement can also be provided by means of wiring options within the Centrex system.

The rate and charge applicable for this service will be the same as that applicable to the charge for the restrictive status of a station and will be required for each dialing pattern on a line.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

B. Centrex Service (AE - SXS 311 Type Equipment) - Continued

3. Capacity and Limitations - Continued

- d. Arrangement to provide full denial service will be furnished where the customer desires to deny access to all toll and zone calling areas on in-service central office trunks. The charges and rates for the service are in addition to the applicable trunk service connection charge and monthly rate and contemplate station, operator, tie line or private line access to a trunk or trunk group.

Metering arrangements to mechanically record each outgoing local exchange call from a station line, tie line or private line will be provided only in connection with a full denial arrangement. one meter arrangement is required for each line so arranged. Central office metering arrangements will be provided in accordance with the charges, rates and special conditions in Section 5 of this Product Guide.

Full toll denial service will only be provided where the serving ("dial tone") central office and the customer are in exchanges served by this Company.

On any system for which message waiting or metering service is provided where stations access a trunk(s) (or access line to the central office) arranged for full denial service, the capability to transfer a trunk call (outgoing) to another station will not be provided.

When an attempt is being made to place a toll or zone calling call in calling areas which are denied, the call will be diverted to a recording and not to an operator of the customer or the Company. This is a function of the toll denial trunk, not the Centrex System.

The arrangement that will permit access only to the traffic service position system toll operator and the arrangement that will deny access to toll and/or zone calling prefixes but will permit access to the traffic service position system toll operator will only be available where the serving central office is arranged to access the traffic service position system network.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

B. Centrex Service (AE - SXS 311 Type Equipment) - Continued

3. Capacity and Limitations - Continued

d. - Continued

When private line services terminating on the Centrex System are arranged to provide direct dial access to the local exchange service, such service will be provided via dedicated trunks and these trunks may be equipped to deny access to toll and zone calling areas. The rate and charge for toll denial on these dedicated local trunks will be the same as for foreign exchange trunks set forth under Rates herein. Rates and charges for access arrangements, trunks, and toll denial service are applicable.

- e. Selective access to certain customer-designated telephone prefixes (or codes) will be provided, where compatible, in connection with local and foreign exchange trunks or private lines which terminate on the mechanical arrangements of systems.

This arrangement will prevent access to certain telephone prefixes (or codes), while allowing calling of other telephone prefixes (or codes), at the discretion of the customer, subject to the limitations of the arrangement.

Local and foreign exchange trunks or private lines may be provided with access to different preselected dialing prefixes within the same system on different groups of stations. A separate selective arrangement is required for each group of preselected dialing prefixes.

Changes in, rearrangements of, or additions to, nonrestricted prefixes caused by Company-initiated telephone prefix (or-code) changes will be made by the Company at no charge to the customer. All other changes or rearrangements made at the customer's request will be made at the appropriate change charge specified herein.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

III. SPECIAL CONDITIONS - Continued

B. Centrex Service (AE - SXS 311 Type Equipment) - Continued

3. Capacity and Limitations - Continued

- f. Rotary out-trunk selection arrangement: Permits the customer to maintain the same outgoing call volume, and may utilize fewer trunks or circuits by providing switching equipment which will automatically search all trunks or circuits of a specific group and seize the first idle trunk or circuit available.
 - (1) This service arrangement is limited to foreign exchange trunks and private line channels.
 - (2) All trunks or channels assigned to rotary selection arrangement must be on the same type, grade, and class of service and must have the same point-to-point terminations. Mixtures of service would defeat the purpose of this service arrangement.
 - (3) Private line channels with different alternate-use arrangements, or having different transmission capabilities may not be associated with the same selection arrangement.
 - (4) Rearrangement of trunks or channels from one selection arrangement to another, due to change in type, grade, or class of service, or points of termination, will be made at the nonrecurring charge for installation of a new trunk or channel.
- g. When a central office that furnished Centrex Service is converted to common control switching equipment, existing Centrex Service customers will be notified of the planned conversion a minimum of one year in advance and will be required to terminate the Centrex Service within two years after the central Office is converted. Centrex service furnished during the two year service limitation period will continue to be offered under RATES.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

C. Supplemental Services Arrangement - Applicable to More Than One Type PBX

1. Rotary trunk control is an arrangement whereby a customer may stop the rotary action at a predetermined trunk or line to control a selected group of trunk lines or station lines (Centrex service) by the operation of customer equipment at the customer's premises. The arrangement is permanently connected in the central office to the trunk selected to control the rotary stop function. Trunks or lines beyond the "stop" point may be utilized for night connections. Mileage charges as set forth in Private Line Schedules apply to the channel between the customer premises and the central office.
2. Arrangement to provide full denial service will be furnished where the customer desires to deny access to all toll and zone calling areas on in-service central office trunks. The charges and rates for this service are in addition to the applicable trunk service connection charge and monthly rate and contemplate station, operator, tie line or private line access to a trunk or trunk group.

Metering arrangements to mechanically record each outgoing local exchange call from a station line, tie line or private line will be provided only in connection with a full denial arrangement. One meter arrangement is required for each line so arranged. Metering arrangements will be provided in accordance with the charges, rates and special conditions in Section 5 of this Product Guide.

Full toll denial service will only be provided where the serving ("dial tone") central office and the customer are in exchanges serviced by this Company.

On the cord type expandable dial PBX system, for which message waiting or metering service is provided where stations access a trunk(s) arranged for full denial service, the capability to transfer a trunk call (outgoing) to another station will not be provided.

When an attempt is being made to place a toll or zone calling call in calling areas which are denied, the call will be diverted to a recording and not to an operator of the customer or the Company. This is the function of the toll denial trunk, not the PBX.

Effective: December 1, 2008

PRIVATE BRANCH EXCHANGE SERVICE

II. SPECIAL CONDITIONS - Continued

C. Supplemental Services Arrangement - Applicable to More Than One Type PBX - Continued

2. - Continued

The arrangement that will permit access only to the traffic service position system toll operator and the arrangement that will deny access to toll and/or zone calling prefixes, but will permit access to the traffic service position system toll operator, will only be available where the serving central office is arranged to access the traffic service position system network.

3. Selective access to certain customer-designated telephone prefixes (or codes) will be provided, where compatible, in connection with local and foreign exchange trunks or private lines which terminate on the mechanical arrangements of PBX systems.

This arrangement will prevent access to certain telephone prefixes (or codes) while allowing talking of other telephone prefixes (or codes), at the discretion of the customer, subject to the limitations of the arrangement.

Local and foreign exchange trunks or private lines may be provided with access to different preselected dialing prefixes within the same system on different groups of stations. A separate selective arrangement is required for each group of preselected dialing prefixes.

Each station arranged for the universal nonrestriction feature may access all trunks or private lines associated with the PBX system irrespective of the selective arrangements applicable to each trunk or private line.

Changes in, rearrangements of, or additions to, nonrestricted prefixes caused by Company-initiated telephone prefix (or code) changes will be made by the Company at no charge to the customer. All other changes or rearrangements made at the customer's request will be made at the appropriate charge specified in Section 3 of this Product Guide.
