SUPPLEMENTAL SERVICES

SPECIAL CONDITIONS

A. Metering Service

1. General

(a) Rate 1 contemplates that meters be located in the central office.

(b) Metering service is furnished only when operating conditions and facilities permit and in accordance with engineering specifications and standard operating procedures of the Utility.

(c) Resettable or nonresettable meters will be provided based on the customer's requirements when considering the functional operation of the service with which the meters will be associated and whether or not the meters provided will meet the customer's service need.

(d) Rearrangement of individual primary station and/or trunk line service and other classification of the line (i.e., tie line, private line, etc.) for which the service is adapted will be at the charge in the appropriate tariff schedule.

B. Rotary Control Arrangement

Rotary control arrangement stops rotary switching action in the central office at the predetermined number. The arrangement will permit a customer to restrict the number of incoming central office lines in rotary to a group smaller than that required during normal operation. Equipment located in the serving central office and connected to a predetermined number within the rotary group is activated by customer equipment at the customer's premises. Mileage charges as set forth in private line schedules apply to the channel between the customer premises and the central office.

C. Business Traffic Study Service (N)

1. General

Business Traffic Study Service provides business customers with a performance report of call capacity for originating and terminating traffic on access lines or hunt groups. The traffic study report enables customers to determine how many calls terminate successfully and the number of calls that reach a station busy condition. [1] The reports will be provided verbally and, upon request from the customer, an electronic copy will be provided. The Utility provides these reports along with a recommendation of required lines to accommodate the studied call traffic, based on industry standards for call traffic handling. Recommendations are based on traffic engineering tables and are not guaranteed to address all traffic situations which may be encountered by the customer. (N)

[1] Traffic report studies provided from a DMS 100 central office switch will not include the number of calls that reach a busy condition on individual access lines.

SUPPLEMENTAL SERVICES (N)

SPECIAL CONDITIONS

C. Business Traffic Study Service - Continued

2. Regulations

(a) Business Traffic Study Service is available only to business customers.

(b) Calls must be carried by Verizon California Inc. and billed by, or on behalf of, Verizon California Inc. to the customer requesting the study.

(c) Traffic studies are performed on the customer's access lines or hunt groups with local exchange numbers.

(d) Customers with access lines or hunt groups at more than one location will be assessed the Service Establishment Charge for traffic studies for each location.

(e) Traffic study reports are provided verbally on a weekly, bi-weekly or monthly basis. The monthly rate is determined by the number of traffic study reports provided within a 4-week billing cycle. Upon request by the customer, an electronic copy will be provided.

(f) Only one Service Establishment Charge will be applicable when a customer requests an Initial Traffic Study and Subsequent Traffic Studies at the same time. The monthly reporting rate will then begin after the first week of the study.

(g) Data provided in the traffic study report may vary due to technical parameters determined by the central office switch technology.

(h) For the setup of each additional Business Traffic Study Report, per customer location, per calendar year, the Service Establishment Charge applies in addition to the monthly rate.

(i) A telephone number is defined as a non-hunting business line, a multiline hunt group, or a DID/DOD/PRI or other hunt group.

(j) Studies cannot be performed on toll-free or pay-per-call type telephone numbers.

(k) A separate traffic study report is required for each of the following:

Individual Access Line
Multiline Hunt Group
PBX Trunk Group
DID Trunk Group
DOD Trunk Group
ISDN BRI
ISDN PRI Trunk Group
DCS Trunk Group
WorkSmart Group
CentraNet® CustoPAK Group
Remote Call Forwarding
CentraNet® Single Line Station
CentraNet® Multiline Hunt Group
CentraNet® Attendant
CentraNet® Features - RCF/ACD
Access Network Register(s) / Business Groups or other trunk groups (N)
