SWITCHED DATA SERVICES

I. GENERAL

APPLICABILITY

Applicable to measured-rate, Single Line and CentraNet®, Switched Data Services.

TERRITORY

Within all exchange areas, as those areas are defined by maps filed as part of the tariff schedules.

GTE CALIFORNIA EDUCATION INITIATIVE

New services provided in this schedule are subject to the GTEC Education Initiative Waiver. A credit of up to $2,000.00 may be used within 24 months after applying to the program. This program is available to Public Schools (K-12), Public Libraries, Community Colleges and/or Private Schools (K-12) that have more than 100 students, are registered with the Department of Education and are within GTEC serving area for the installation and/or monthly rate for the new services. The waiver period will be for a 36 month period beginning November 9, 1994 and ending November 9, 1997.

DISCOUNTS FOR QUALIFYING ENTITIES (N)

In compliance with D.96-10-066, GTE California will discount Switched Data Service, or its functional equivalent, for qualifying entities (See Special Condition III.I.) as follows:

Health Care Facilities	20%
Schools and Libraries	50%
Community Based Organizations	25%

Applicable discounted rates are listed in Section II.F. (N)

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS

A. Definitions (T)(L)

Asynchronous. A method of transmitting data in which each transmitted character is preceded by a start bit and followed by a stop bit, thus permitting the interval between characters to vary.

Bit. A binary digit. The smallest unit of information in the binary system of notation.

Bits Per Second (bps). The number of bits transmitted per second. A measure of the speed of transmission of digital information.

Digital. Information which is expressed in discrete or noncontinuous form.

Full Duplex. Type of communication that supports the transmission of signals in both directions simultaneously. This is not associated with simultaneous transmission of voice and data communications.

Half Duplex. Type of communication that supports transmission of data signals alternately in both directions, but is not capable of simultaneous and independent transmission and reception. This is not associated with simultaneous transmission of voice and data communications. (L)

(L) Material previously shown in Schedule G-15, 4th Revised Sheet 6.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

A. Definitions - Continued (T)(L)

Hunting. A search through a group of telephone numbers until an idle number is found or the last number of the group is reached.

Off-Peak. The Off-Peak period for usage rating is from 5:00 p.m. up to, but not including, 8:00 a.m.

Peak. The peak period for usage rating is from 8:00 a.m. up to, but not including, 5:00 p.m.

Synchronous. A method of transmitting data in which the data characters and bits are transmitting data in which the data characters and bits are transmitted at a fixed rate with the transmitter and receiver synchronized, eliminating the need for individual start bits and stop bits. (L)

(L) Material previously shown in Schedule G-15, 1st Revised Sheet 6.1.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

B. Description of Services (T)(L)

Switched Data Services. Exchange network services which provide for digital, end-to-end data transport. (T)

Low Speed Line Services. Low Speed Switched Data service supports 300, 1200, 2400, 4800, 9600 and 19,200 bits per second, asynchronous, full duplex or half duplex connections and 1200, 2400, 4800, 9600 and 19,200 bits per second synchronous full duplex or half duplex connections for single line and CentraNet® Line applications.

High Speed Line Services. High Speed Line Services support 48,000, 56,000, and 64,000 bits per second synchronous full duplex connections for Single Line and CentraNet® Line applications. (T)(L)

Switched Data Individual Line Loop Extension Service. An extended loop capability which transports Switched Data usage between the customer premises and the local serving central office. Each Switched Data Individual Line Loop Extension includes one channel which is used exclusively for data transmissions. Some technologies will permit transmissions up to 56,000 bits per second or up to 64,000 bits per second depending on technology. (N) (N)

(L) Material previously shown in different form in Schedule G-15, 4th Revised Sheet 2.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

B. Description of Services - Continued (T)(L)

Switched Data Channel Access. A 1.544 high capacity digital facility that transports Switched Data usage between the customer premises and the local serving central office on a channelized basis. Switched Data Channel Access provides 24 digital channels that support data transmission only. On a per channel basis, the customer can transmit data up to 56,000 bits per second. (T)

Data Line Security. Data Line Security prevents a call from being interrupted by override tones, such as a call waiting tone, or other test or busy verification tests that would interrupt the flow of data. (T)

Intercom Dialing. Intercom Dialing allows customer group stations to complete calls to other stations without the assistance of an attendant, by dialing a 2 through 7 digit number. This feature is applicable to CentraNet® customer groups only and is restricted to the serving wire center only. (T)

(L)

(L) Material previously shown in Schedule G-15, 1st Revised Sheet 2.1.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

B. Description of Services - Continued (T)(L)

Direct Dialing. Direct Dialing allows the user to place local and long distance calls between Switched Data lines without the assistance of an attendant by using the standard 7 through 10 digit dialing methods. (T)

Data Direct Connect. Data Direct Connect is an optional service which provides an automatic connection between a Switched Data calling line that goes off-hook at a predetermined location. (T)

Data Closed User Group. Data Closed User Group is an optional service restricted to CentraNet lines, which provide partitioning of Switched Data lines into groups where calls within such a group are allowed, but calls between such groups are denied. (T)

Voice Option. Voice Option is an optional service which allows simultaneous voice and data communications over a single Switched Data line. This feature is available where technical capabilities exist but is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension. (T) (T) (C)(L)

(L) Material previously shown in Schedule G-15, 4th Revised Sheet 3.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

B. Description of Services - Continued (T) (L)

Packaged Services (T)

Feature Package Data 1000

Data Individual Speed Call-Short List. Individual Speed Call-Short List is limited to an individual Switched Data line. Short List permits up to eight stored numbers. Short List is not available with Switched Data Channel. Access nor with Switched Data Individual Line Loop Extension. (C)

Data Call Forward (All/Busy/No Answer). Data Call Forward permits incoming calls to be automatically forwarded to a predetermined number. All calls may be forwarded or calls can be forwarded according to busy or no answer conditions. Data Call Forward is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension. (C)

Data Last Number Redial. Data Last Number Redial permits redialing the last called number by depressing a single key. Redial is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension. (C)

Data Toll Restriction. Data Toll Restriction will block toll calling over Switched Data Lines.

Data Sequential Hunt Group. Data Sequential Hunt Group pilot telephone number to a group of lines. Hunting is sequential, starting at the first line assigned to the pilot telephone number and ending at the last line. (T) (L)

(L) Material previously shown in Schedule G-15, 4th Revised Sheet 4.

Continued

SWITCHED DATA SERVICES

III. SPECIAL CONDITIONS - Continued

B. Description of Services - Continued (L)

Feature Package Data 2000. (In addition to services included in Feature Package Data 1000) (T)

Data Call Back. Data Call Back notifies a user encountering a busy station to be notified when the station becomes idle and automatically establish the call. Data Call Back is available with CentraNet® intercom calling but not with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.

Data Saved Number Redial. Data Saved Number Redial allows a redialing a saved number by depressing a single key. Redial is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension. (C) (C)

Data Circular Hunting. Data Circular Hunting assigns a pilot telephone number to the hunt group. Hunting starts after the first idle line found by the previous hunt and continues until the hunting starting point is reached. Hunting is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension. (C) (C)

Data Group Speed Calling. Data Group Speed Calling permits abbreviated dialing for a list of numbers shared by a group of data lines. The list may be updated either by a service order or by a designated user (controller). Additions, changes, or deletions of numbers can be made only from the controller's line. Other lines with access to this list are restricted. Speed Calling is available with CentraNet® intercom calling but is not available Data Channel Access nor with Switched Data Individual Line Loop Extension. (C) (C)

Data Individual Speed Call-Long List. Long List is the same as the Data Individual Speed Call Short-List except a Long List permits up to thirty stored numbers. Long List is limited to Switched Data lines but is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.

C. General

Switched Data Service will be furnished only where facilities are available. Service is offered on a limited basis by specific switching systems within certain geographical areas. Since this service is not offered in all areas, it is important to verify its availability by contacting your Company Account Representative or Business Office at the telephone number listed in your telephone directory under the heading "WHERE TO REACH GTE", for Installation/Service. (T) (L)

The minimum billing for which service is provided is one month. (L1)

Customer Premises Channelization may be provided by the customer or the Utility. If the Utility provides channelization, at a customer's premises the customer is not required to provide a channel access card. Channel termination equipment shall be placed at a single equipment location on the customer's premises. The customer must provide floor space, a temperature controlled environment, and a 120 volt, 60 Hz AC power service. Emergency backup power and ring generating equipment services are available at charges and rates developed for each individual case. (T) (T)(L1)

(L) Material previously shown in Schedule G-15 on Original Sheet 9.8.

III. SPECIAL CONDITIONS - Continued

C. General - Continued (L)

Switched Data Channel Access or Switched Data Individual Line Loop Extension is required for customers located in areas which are restricted by the technical requirements as specified herein, or in a local serving central office which is not capable of providing Switched Data. The Utility will determine the nearest central office capable of providing Switched Data Service. Interoffice IntraLATA digital high capacity mileage (1.544) will apply for Switched Data Channel Access from the non-capable central office to the central office capable of providing Switched Data at the mileage rate specified in Schedule Cal. P.U.C. No. C-1, Section III.B.2.K., excluding the Special Transport Termination rate. In this situation, the customer will utilize the dialing plan associated with the central office that delivers the digital dial tone. (T) (T) (L)

Interoffice Digital Data Service (DDS) Special Transport mileage apply for Switched Data Individual Line Loop Extension from the non-capable central office to the central office capable of providing Switched Data Services at the rates shown in Schedule Cal. P.U.C. No. G-8. If Switched Data Services cannot be provided from the customer's serving central office, Switched Data Channel Access or Switched Data Individual Line Loop Extension may be required in lieu of the Switched Data Low Speed or High Speed Line Service. (N) (N)

(L) Material previously shown in different form in Schedule G-15, 2nd Revised Sheet 10.

D. Application of Rates (T)(L)

Switched Data CentraNet® Line rates are determined-by the total number of either Low Speed or either High Speed lines (i.e., if a customer requests 55 Low Speed lines and 25 High Speed lines, all 55 Low Speed lines will be billed at the "50-100" rate and all 25 High Speed lines will be billed at the "2-49" rate).

Rates and charges specified in other tariff schedules for services provided in conjunction with Switched Data service (Smart Call_ features, CentraNet® features, etc.) are in addition to the monthly rates for Switched Data service.

Customer Premises Channelization is an optional component of Switched Data Channel Access. The customer has the option to support premises channelization with CPE devices or to be made available by the Utility. Channelization at the customer's premises when provided by the Utility is available at the rates specified in Section II.A.3. Both the Customer Premises Channelization charge, per channel and the Customer Premises Termination charge, per access arrangement (24 channels) will apply. (T)

End User charges as specified in the End User Facilities for Interstate Access (FIA), Section 13, of GTOC Tariff FCC No. 1 will apply to Switched Data service. For each Switched Data Channel Access and Switched Data Individual Line Loop Extension the End User FIA charge will apply twice. (T)

For Presubscription of an Interexchange Carrier, the rates and regulations as set forth in Section 6 of GTOC Tariff FCC No. 1 will apply to Switched Data service. (T)

A directory listing for Switched Data service will be provided upon request in accordance with Schedule Cal. P.U.C. No. D-1. (T)

E. Access Dialing (T)(L)

Access to Switched Data service is obtained through a dial connection via the public switched telephone network using the standard 7 through 10 digit methods.

Origination of calls for 800, 900, 976, 0-(IntraLATA) and 0+ (IntraLATA) is limited to voice calls only. These calls will be provided with the Voice Option feature of Switched Data service when requested by the customer. (L)

(L) Material previously shown in Schedule G-15, Original Sheet 9.8.

III. SPECIAL CONDITIONS - Continued

F. Technical Limitations (T)(L)

Switched Data service requires the use of customer provided data equipment that is compatible with the Utility' s equipment and facilities. Visit charges, as set forth in Schedule Cal. P.U.C. No. V-1, apply for visits by the Utility to a customer's premises if a service difficulty results from customer-provided facilities or equipment. (T)(T)

Customers may be affected by technological limitations because of digital signal power loss. Beyond the following limitations, customers will be served with Switched Data Individual Line Loop Extensions or Switched Data Channel Access: (T)(T)

DMS-100: 42dB loss at 80 kilohertz, equating to a maximum route length ranging from 12,000 feet to 18,000 feet, depending on cable gauge and customer wiring. (T)(T)

GTD-5: 26dB loss at 80 kilohertz, equating to a maximum route length ranging from 8,000 feet to 15,000 feet, depending on cable gauge and customer wiring. (T)(T)

5ESS (non-ISDN equipped): 42dB loss at 80 kilohertz, equating to a range from 12,000 feet to approximately 14,000 feet depending on cable gauge and including customer wiring. (N)(N)

If these losses are exceeded for a customer, the customer must subscribe to Switched Data Individual Line Loop Extension Service. (T)(T)(L)

(L) Material previously shown in Schedule G-15, 2nd Revised Sheet 10.

I. Discounted Switched Data for Qualifying Entities (N)

In compliance with D.96-10-066, GTE California will discount Switched Data Service to qualifying entities as follows:

Health Care Providers	20%
Schools and Libraries	50%
Community Based Organizations	25%

These discounted services may not be resold to, or shared with, any other non-qualifying person or entity.

Qualifying Entities

A. Health Care Providers - a discounted rate is applicable for municipal and county goverment owned and operated hospitals and health clinics.

B. Schools and Libraries - To qualify for the discount, schools must be public or nonprofit schools providing elementary or secondary education and which do not have endowments of more that $50 Million. Only those libraries which are eligible for participation in state based plans for funds under Title III of the Library Services and Construction Act qualify for the discount. There is no limit to the number of subsidized lines that a health care provider can have.

C. Community Based Organization (CBO) - In order to qualify for the discount, a CBO must provide proof at the time of application that it is a tax exempt organization. They must also certify that it offers health care, job training, job placement, or educational instruction. CBOs are limited to: (1) a total of two ISDN lines; **or** (2) one ISDN line and one Switched Data line; **or** (3) one T-1 line at the discounted rate; **or** (4) a total of two Switched Data lines. (N)
