III. RATES

	Monthly Rate	Nonrecurring Charge [1]	Basic Termination Liability [3]	
First Data Link [2], per CDL				(T)
1 Year Term [3]	$ 700.00	$3,300.00	$10,610.00	
3 Year Term [3]	650.00	3,300.00	10,610.00	
5 Year Term [3]	610.00	3,300.00	10,610.00	
Month-to -Month [4]				(T)
Additional Data Link, per CDL				
1 Year Term [3]	120.00	200.00	2,763.00	(T)
3 Year Term [3]	115.00	200.00	2,763.00	
5 Year Term [3]	100.00	200.00	2,763.00	
Month-to-Month [4]				(T)
Video Link, per CDL				
1 Year Term [3]	415.00	3,000.00	7,378.00	(T)
3 Year Term [3]	400.00	3,000.00	7,378.00	
5 Year Term [3]	380.00	3,000.00	7,378.00	
Month-to -Month [4]				(T)
Interoffice Transport		300.00	n/a	
Transport (per airline mile)	40.00			
Termination	160.00			

1 In addition to the charges from Schedule Cal. P.U.C No. A-41. (T)

2 The customer must subscribe to the First Data Link, between the serving wire center and each customer designated location (CDL), in order to subscribe to an Additional Data Link or a Video Link. If the First Data Link is disconnected then all MMDS will be disconnected to that CDL. The Additional Data Link and Video Link can be disconnected without disconnecting the First Data Link to a CDL. (T)

3 See Schedule Cal. P.U.C. No. D&R, Rule No. 47, for termination liability rules. (C)

4 The Month-to-Month rate option will only be available after completion of one of the three term period options. The Month-to-Month rate will be the same as the rate for the completed term option. (T) (T)

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL

A. Definitions

Additional Data Link
Subsequent Data Links ordered from the same CDL to the same serving wire center as the first Data Link are rated as an Additional Data Link(s).

Customer Designed Location (CDL)
A location specified by the customer for purposes of terminating services. The Utility must have access to the location to perform installation, testing, and maintenance functions. The customer may or may not have access to the location. CDLs include locations such as customer premises, customer repeater stations, customer microwave towers, or some other point where Utility testing can occur.

Data Link
A Data Link (DL) in MMDS is the electrical connection of the customer's data terminal equipment from the Network interface to the Utility's network supporting MMDS. The Data Link includes the Network Interface, the Network Node, and the fiber optic local loop facility.

First Data Link
The first Data Link is assessed on the first Data Link ordered by the customer for each CDL.

Interoffice Transport
Interoffice Transport provides for the transmission facilities between serving wire centers associated with two CDLs. The Interoffice Transport monthly rate applies to fiber optic transmission facilities between serving wire centers. The rate is applied to each airline mile or fraction thereof between the serving wire centers.

(N)

Continued

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL

A. Definitions - Continued

Link
A Link, whether First, Additional, or Video, is a transport over MMDS facilities between the Utility's wire center and each customer designated location (CDL).

Network Interface The Network Interface is the point of electrical interconnection on the customer's premises between the Utility's communications facilities and the customer's terminal equipment.

Network Node
The Network Node is the Utility provided electrical equipment that converts the electrical signal delivered at the network interface optical signal.

Video Link
A Video Link can only be ordered from a CDL for which a First Data Link rate is being assessed. The Video Link rate applies in addition to the First Data Link rate and any Additional Data Link rates. One Video Link must be ordered for each end (CDL) of a point-to-point MMDS Video service.

B. Description of Service

Multi-Media Data Service (MMDS) is a fiber optic based group of high speed data and video services for use within a LATA. MMDS can be used to connect Ethernet (IEEE 802.3) and Token Ring (IEEE 802.5) LANs, provide host/remote IBM 3270 connections as well as electrical interfaces such as RS449/422 and V.35. MMDS video service is a single channel video for applications such as video conferencing and distance learning. Specific distance limitations are identified in Provision of Service (IV.C.1). (N)

Continued

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL - Continued

C. Provision of Service

1. Technology

MMDS will support the following types of data and/or video services:

Ethernet (IEEE 802.3)
Token Ring (IEEE 802.5)
IBM 3270 *
V.35
RS449/422
Non-Framed DS1
Single Channel Broadband Video (NTSC/RS250B)

* Where MMDS provides IBM 3270 connectivity, the service is limited to customer locations served by the same serving wire center.

a. MMDS Ethernet Service
A Local Area Network (LAN) to Local Area Network (LAN) transport service for interconnecting IEEE 802.3 LANs data rates up to 10 Mbps. This service is distance limited to a -31 dB system loss budget. Ethernet service can be point-to-point or multipoint (a maximum of eight nodes).

b. MMDS Token Ring Service
A LAN to LAN transport service for interconnecting IEEE 802.5 LANs at data rates up to 4 Mbps or 16 Mbps. This service is distance limited to a -31 dB system loss budget. Token Ring service can be point-to-point or multipoint (a maximum of eight nodes). (N)

Continued

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL - Continued

C. Provision of Service - Continued

1. Technology - Continued

c. MMDS IBM 3270 Host/Remote Service
A half-duplex, character oriented binary synchronous host to remote transport service offered in two configurations:

1) Support of coaxial connections supporting up to two customer provided 3274 controllers.
2) Support of coaxial terminal adapter ports for connection to customer provided 3299 type multiplexer.

Distance limitations for IBM 3270:
- with IBM RPQ - 12,000 cable feet.
- without IBM RPQ 3,200 cable feet.

d. MMDS V.35 Service
A wideband electrical signal for asynchronous transmission up to 256 Kbps.

e. MMDS RS449/422 Service
An EIA recommended electrical interface for balanced circuits. The MMDS transport supports RS449/422 at speeds from 20 Kbps to 9.4 Mbps.

f. MMDS NFDS-1 Service
A non-framed, DS1 point-to-point optical transmission at 1.544 Mbps. This service is provided without synchronization and is not channelized by the Utility.

g. MMDS VIDEO Service
This is the transport over MMDS facilities of single channel broadband video signals conforming to NTSC/RS250B. The service supports a single video channel with two accompanying audio channels. MMDS Video is limited to point-to-point or point-to-multi point service where each CDL is served from the same serving wire center.

(N)

Continued

MULTI-MEDIA DATA SERVICE

IV. GENERAL - Continued

D. Special Conditions

MMDS service is only offered where fiber optic transmission facilities are available and service is technically feasible. Where service can be provided but not within the normal provisioning of service, any additional costs associated with providing this service will be subject to Special Construction Charges. (T) (T)

MMDS service will only be used to interconnect customer locations within the same LATA where GTE provides service in the originating and terminating areas.

The network demarcation point for MMDS is on the electrical side of the Utility provided network interface on the customer premises. The customer is responsible for providing all facilities and cabling necessary to connect customer equipment to the network interface.

It is the customer's responsibility to ensure that the customer's equipment provides industry standard electrical signals for MMDS transmission.

The First Data Link is required in order to provide MMDS to a CDL.

An Additional Data Link (ADL) is only available to CDLs with at least one First Data Link. An ADL is required if:

- an additional protocol is used, e.g., Ethernet and DS1, or
- there are more than eight nodes (CDLs) supporting a single Ethernet or Token Ring connection.

A Video Link is only available to CDLs with at least one First Data Link.

Interoffice Transport provides for the transmission facilities between serving wire centers associated with the CDLs. The monthly rate is assessed on a per airline mile basis between the serving wire centers. The method of calculating applicable airline miles for rating purposes is specified in the NECA Tariff No. 4.

Interoffice Transport Termination provides the equipment and arrangements necessary to terminate the Interoffice Transport facility at a serving wire center. One Interoffice Transport Termination applies for the termination of each end of an Interoffice Transport facility.

Continued

MULTI-MEDIA DATA SERVICE

IV. GENERAL - Continued

D. Special Conditions - Continued

The First Data Link, Additional Data Link and Video Link at each CDL must be ordered for a term period of one (1), three (3), or five (5) years. All terms are subject to the termination liability rules as specified in Schedule Cal. P.U.C. No. D&R, Rule No. 47. Prior to the expiration of the term period, a customer must notify the Utility of the customer's choice of the following options: (T) I (T)

- convert to a new term period of the same or different length, or (T)
- continue at the completed term period's rate but on a month-to-month basis, or (T)
- discontinue service.

If the customer does not notify the Utility of one of the above options, then the Utility will continue to bill the customer at the completed term period's rate on a month-to-month basis. (T)

If prior to the expiration of a term period, the customer converts to a term period with a longer period of time, then the customer, at the customer's option, may receive credit for the elapsed time under the old term period toward the new term period. (T) I (T)

MMDS requires at least one First Data Link to a CDL. When the First Data Link is disconnected, then MMDS will be disconnected to the CDL. An Additional Data Link and/or Video Link can be disconnected without disconnecting the First Data Link to the CDL.

In the initial order for service at a CDL, the term period for Additional Data Links or Video or Video Links cannot be longer than the term period selected for the First Data Link. (T) (T)

Continued

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL - Continued

D. Special Conditions - Continued

The First Data Link, Additional Data Link and Video Link at each CDL must be ordered for a contract period of one (1), three (3), or five (5) years. All contracts are subject to the Contract Termination Liability as specified in this tariff. Prior to the expiration of the contract period, a customer must notify the Utility of the customer's choice of the following options:

- convert to a new contract period of the same or different length, or
- continue at the completed contract period's rate but on a month-to-month basis, or
- discontinue service.

If the customer does not notify the Utility of one of the above options, then the Utility will continue to bill the customer at the completed contract period's rate on a month-to-month basis.

If prior to the expiration of a contract, the customer converts to a contract period with a longer period of time, then the customer, at the customer's option, may receive credit for the elapsed time under the old contract toward the new contract period.

MMDS requires at least one First Data Link to a CDL. When the First Data Link is disconnected, then MMDS will be disconnected to the CDL. An Additional Data Link and/or Video Link can be disconnected without disconnecting the First Data Link to the CDL.

In the initial order for contractual service at a CDL, the contract period for Additional Data Links or Video or Video Links cannot be longer than the contract period selected for the First Data Link. (N)

Continued

MULTI-MEDIA DATA SERVICE

IV. GENERAL - Continued

D. Special Conditions - Continued

If the customer subsequently orders an Additional Data Link(s) or a Video Link(s) and the term period for the First Data Link has not expired, then the following applies: (T)

- the term period selected for an Additional Data Link(s) or a Video Link(s) must be equal to or shorter than the remaining term period for the First Data Link or (T) (T)

- the term period for the First Data Link will be extended to be coterminous with the term period selected for the Additional Data Link or Video Link. The monthly rate for the First Data Link shall be equal to the First Data Link rate for the new term period selected for the Additional Data Link and/or Video Link. (T) I (T)

An Additional Data Link(s) or a Video Link(s) can be provided after the expiration of the term period for the First Data Link, but the First Data Link will be placed under a term period equal to the term period selected for the Additional Data Link or Video link. The First Data Link monthly rate shall be equal to the First Data Link rate for the new term period selected for the Additional Data Link and/or Video Link. (T) (T) (T)

When service is discontinued prior to the end of the term period, the Basic Termination Liability charges will apply based on the remainder of the term period in effect at the time of disconnect. See Schedule Cal. P.U.C. No. D&R, Rule No. 47, for termination liability rules. (T) (T)

MULTI-MEDIA DATA SERVICE (N)

IV. GENERAL - Continued

D. Special Conditions - Continued

If the customer subsequently orders an Additional Data Link(s) or a Video Link(s) and the contract period for the First Data Link has not expired, then the following applies:

- the contract period selected for an Additional Data Link(s) or a Video Link(s) must be equal to or shorter than the remaining contract period for the First Data Link or

- the contract period for the First Data Link will be extended to be coterminous with the contract period selected for the Additional Data Link or Video Link. The monthly rate for the First Data Link shall be equal to the First Data Link rate for the new contract period selected for the Additional Data Link and/or Video Link.

An Additional Data Link(s) or a Video Link(s) can be provided after the expiration of the contract period for the First Data Link, but the First Data Link will be placed under contract for a period equal to the contract period selected for the Additional Data Link or Video link. The First Data Link monthly rate shall be equal to the First Data Link rate for the new contract period selected for the Additional Data Link and/or Video Link.

When service is discontinued prior to the end of the period, the Basic Termination Liability charges will apply based on the remainder of the contract period in effect at the timer of disconnect. The Basic Termination Liability amount will be reduced each month by 1/12 for 1-Year Contracts, 1/36 for 3-Year Contracts, and 1/60 for 5-Year Contracts.

MULTI-MEDIA DATA SERVICE

IV. GENERAL - Continued

E. Discounts for Qualifying Entities (N)

In compliance with D.96-10-066, GTE California Incorporated will discount Multi-Media Data Service, as a functional equivalent of DS1 or DS3 Service dependent upon the data speeds requested by the customer for entities as follows:

Health Care Providers	20%
Schools and Libraries	50%
Community Based Organizations	25%

These discounted services may not be resold to, or shared with, any other nonqualifying person or entity.

Qualifying Entities

1. Health Care Providers - a discounted rate is applicable for municipal and county government owned and operated hospitals and health clinics.

2. Schools and Libraries - To qualify for the discount, schools must be public or nonprofit schools providing elementary or secondary education and which do not have endowments of more than $50 Million. Only those libraries which are eligible for participation in state based plans for funds under Title III of the Library Services and Construction Act qualify for the discount.

3. Community Based Organizations (CBO) - In order to qualify for the discount, a CBO must provide proof at the time of application that it is a tax exempt organization. They must also certify that it offers health care, job training, job placement, or educational instruction. CBOs are limited to: (1) a total of two ISDN lines; or (2) one ISDN line and one Switched Data line; or (3) one T-1 line at the discounted rate; or (4) a total of two Switched Data lines. (N)
