COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

I. GENERAL

A. The Utility shall provide collocation services in accordance with, and subject to, the terms and conditions of this tariff and any additional applicable regulations in other Utility tariffs. The Utility shall provide collocation services under this tariff only to those parties which have an effective interconnection agreement with the Utility for this state under Sections 251 and 252 of the Telecommunications Act of 1996, or have adopted such an agreement pursuant to Section 252(i) thereof. Requesting carriers may also seek to negotiate rates, terms, and conditions that are in addition to, or different from, the rates, terms, and conditions in this tariff to the extent permitted by applicable law. As required by applicable law, the Utility shall also offer rates, terms, and conditions for collocation services that are not expressly addressed in this tariff or other Utility tariffs on Bona Fide Request ("BFR") basis, and in doing so, shall comply with all applicable federal or state requirements. By agreeing to the rates, terms, and conditions of this tariff or the collocation of any equipment hereunder: (1) the Utility does not waive, and expressly reserves, its rights to continue to challenge the legality of the FCC Collocation Order (Docket No. 98-147) and to take further action regarding this matter as future circumstances warrant; (2) the Utility does not intend to, and therefore does not, establish any precedent, waiver, course of dealing or in any way evidence the Utility's position or intent with regard to future collocation requests; and (3) the Utility specifically reserves the right to incorporate herein the decision by the United States Court of Appeals for the District of Columbia Circuit on March 17, 2000 and any other subsequent court decisions affecting rules adopted by the FCC to implement collocation under Section 251 of the Telecommunications Act of 1996 (see, GTE Service Corporation, et. al. v. Federal Communications Commission and United States of America, No. 99-1176, consolidated with No. 99-1201, 2000 U.S. App. LEXIS 4111 (D.C. Cir. 2000). (N) | (N)

B. Collocation provides access to the Utility's premises for the purpose of interconnection and/or access to unbundled network elements, including its central offices and serving wire centers and all other buildings or similar structures owned, leased, or otherwise controlled by the Utility that houses the Utility's network facilities. (P)

(P) Pending approval of Advice Letter No. 9509A.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

III. ORDERING CONDITIONS (Continued)

E. Augmentation (Continued)

2. Minor Augments of collocation arrangements will require the submission of a complete application form and the Minor Augment Fee. Minor augments are those requests that do not require more AC or DC power, add equipment that generates more BTUs of heat, or increase the floor space, over what the CLEC requested in its original application. The requirements for a minor augment request can not exceed the capacity of the existing electrical/power or HVAC system. Requests for additional DS0, DS1, and DS3 cross connects for access to unbundled network elements are included as minor augments. (P1) (P1) (T) (T)

Minor augments that require an augment fee are those requests that require the Utility to perform a service or function on behalf of the CLEC including but not limited to: installation of Virtual equipment cards or software upgrades, removal of Virtual equipment, requests to pull cable from exterior microwave facilities, and requests to terminate DS0, DS1 and DS3 cables. (P1) (P1)(T)

Minor augments that do not require a fee are those augments performed solely by the CLEC, that do not require the Utility to provide a service or function on behalf of the CLEC, including but not limited to, requests to install additional equipment in the CLEC's cage. Prior to the installation of the additional equipment the CLEC agrees to provide the Utility with an application form with an updated equipment listing that includes the equipment to be installed in the CLEC's collocation arrangement. Once the updated equipment list is submitted to the Utility, the CLEC may proceed with the augment. The CLEC agrees that changes in equipment provided by the CLEC under this provision will not exceed the engineering specifications for power and HVAC as requested on the original application. All augments will be subject to Utility inspection, in accordance with the terms of this tariff for the purpose of ensuring compliance with Utility safety standards. (P)

(P) Pending approval of Advice Letter No. 9509.
(P1) Pending approval of Advice Letter No. 9850.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued)

B. Space Preparation (Continued)

2. Site Selection/Power

The Utility shall designate the space within its premises where the CLEC shall collocate its equipment. (P)
The Utility will assign collocation space to the CLEC in a just, reasonable, and nondiscriminatory manner. (N)
The Utility will allow the CLEC requesting caged or cageless collocation to submit space preferences on the Application Form prior to assigning caged and cageless collocation space to the CLEC. The Utility will assign caged and cageless space in accordance with the following standards: (1) The CLEC's collocation costs cannot be materially increased by the assignment; (2) The CLEC's occupation and use of the Utility's premises cannot be materially delayed by the assignment; (3) The assignment cannot impair the quality of service or impose other limitations on the service the CLEC wishes to offer; and (4) The assignment cannot reduce unreasonably the total space available for caged and cageless collocation, or preclude unreasonably, caged and cageless collocation within the Utility's premises.

The Utility may assign caged and cageless collocation to space separate from space housing the Utility's equipment, provided that each of the following conditions is met: (1) Either legitimate security concerns, or operational constraints unrelated to the Utility's or any of its affiliates' or subsidiaries' competitive concerns, warrant such separation; (2) Any caged and cageless collocation space assigned to an affiliate or subsidiary of the Utility is separated from space housing the Utility's equipment; (3) The separated space will be available in the same time frame as, or a shorter time frame than, non-separated space; (4) The cost of the separated space to the CLEC will not be materially higher than the cost of non-separated space; and (5) The separated space is comparable, from a technical and engineering standpoint, to non-separated space. (N)

The Utility shall provide, at the rates set forth in Section XIV following, 48V DC power with generator and/or battery back-up, AC convenience outlet, heat, air conditioning and other environmental support to the CLEC equipment in the same standards and parameters required for Utility equipment within that premises. The Utility will be responsible for the installation of the AC convenience outlets, overhead lighting and equipment superstructure per the established rates. (P)

(L)

(L)

(P) Pending approval of Advice Letter No. 9509A.

(L) Material previously on this page moved to 1st Revised Sheet 14.1.

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued) (P)

B. Space Preparation (Continued) (P)

3. DC Power (P1)(L[2])(L[1])

The Utility will provide DC power to the collocation arrangement as specified by the CLEC in its Collocation application. The CLEC will specify the load on each feed and the size of the fuse to be placed on each feed. Charges for DC power will be applied based on the total number of load amps ordered on each feed.

For example, if a CLEC orders a total of 40 load amps of DC power and an A and B feed, the CLEC could order 20 load amps on the A feed and 20 load amps on the B feed. The Utility will permit the CLEC to order a fuse size up to 2.5 times the load amps ordered provided that applicable law permits this practice. Thus, the CLEC could order that each feed be fused at 50 amps if the CLEC wants one feed to carry the entire load in the event the other feed fails. Accordingly, the CLEC will be charged on the basis of the total number of load amps ordered, i.e., 40 amps, and not based on the total number of amps available for the fuse size ordered.

The CLEC is responsible for engineering the power consumption in its Collocation arrangements and therefore must consider any special circumstances in determining the fused capacity of each feed. The Utility will engineer the power feeds to the Collocation arrangement in accordance with industry standards based upon requirements ordered by the CLEC in its Collocation application. Any subsequent orders to increase DC power load at a Collocation arrangement must be submitted on a Collocation application.

The Utility reserves the right to perform random inspections to verify the actual power load being drawn by a Collocation arrangement. At any time, without written notice, the Utility may measure the DC power drawn at an arrangement by monitoring the power distribution point.

(a) If the inspection reveals that the power being drawn does not exceed the total number of load amps ordered, no further action will apply. (P1) (L[2])

(L[1])

(P) Pending approval of Advice Letter No. 9509A.
(P1) Pending approval of Advice Letter No. 9850.

(L[1]) Material previously on this page moved to Original Sheet 14.1.1.
(L[2]) Material moved from 2nd Revised Sheet 14.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (N)

IV. INSTALLATION AND OPERATION (Continued) (N)

B. Space Preparation (Continued) (N)

3. DC Power (Continued) (N)

(b) If the inspection reveals that the power being drawn is greater than 100% and up to 110% of the total number of load amps ordered, the Utility will provide the CLEC with written notification by certified U.S. Mail to the person designated by the CLEC to receive such notice that more power is being drawn than was ordered. Within five (5) business days of the date of notification, the CLEC must reduce the power being drawn to match its ordered load or revise its power requirement to accommodate the additional power being drawn. Failure to reduce the power being drawn or submit a revised application within the five (5) business days will result in an increase in the amount of power being billed to 110% of the power ordered in the application on file. (P) (L)

(c) If the inspection reveals that the power being drawn is greater than 110% of the total number of load amps ordered, that arrangement is subject to the following treatment.

(1) The Utility will provide the CLEC with written notification by certified U.S. Mail to the person designated by the CLEC to receive such notice that it has exceeded its ordered power.

(2) Additional Labor charges, as set forth in Section XVI, apply for the cost associated with performing this inspection.

(3) The Utility will bill the CLEC for the full fused capacity for each of the next six (6) bill periods following the inspection.

(4) After six (6) months of full fused capacity billing, and upon receipt of an application to revise the power required at that arrangement, the Utility will adjust the billing to reflect the CLEC's revised power requirement. In the event that a revised application is not submitted, billing at full fused capacity will continue until a revised application is received.

(5) Within fifteen (15) business days of the date of notification, the CLEC must submit a non-scheduled attestation of the power being drawn at each of its remaining Collocation arrangements. Failure to submit this non-scheduled attestation will result in the application of Additional Labor charges, as set forth in Section XVI, for any subsequent DC power inspections the Utility performs prior to receipt of the next scheduled attestation. Scheduled attestations are described in Section (e).

In those instances where the Utility needs access to the Collocation arrangement to make these measurements, the Utility will schedule a joint meeting with the CLEC. (P) (L)

(P) Pending approval of Advice Letter No. 9850.

(L) Material moved from 1st Revised Sheet 14.1.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued)

C. Equipment and Facilities

1. Purchase of Equipment

The CLEC will be responsible for supply, purchase, delivery, installation and maintenance of its equipment and equipment bay(s) in the collocation area. If it chooses, the Utility will assist the CLEC in the purchase of equipment by establishing a contact point with Verizon Logistics, Inc. The Utility is not responsible for the design, engineering, or performance of CLEC equipment and provided facilities for collocation. Upon (P) (P1)
installation of all transmission and power cables for collocation services, the CLEC relinquishes all rights, title and ownership of transmission (excluding fiber entrance facility cable) and power cables to the Utility. (P1)

2. Permissible Equipment (P)

The Utility shall permit the collocation and use of any equipment necessary for interconnection or access (N)
to unbundled network elements in accordance with the following standards: (1) Equipment is necessary for interconnection if an inability to deploy that equipment would, as a practical, economic, or operational matter, preclude the CLEC from obtaining interconnection with the Utility at a level equal in quality to that which the Utility obtains within its own network or the Utility provides to any of its affiliates, subsidiaries, or other parties; and (2) Equipment is necessary for access to an unbundled network element if an inability to deploy that equipment would, as a practical, economic, or operational matter, preclude the CLEC from obtaining nondiscriminatory access to that unbundled network element, including any of its features, functions, or capabilities.

Multi-functional equipment shall be deemed necessary for interconnection or access to an unbundled network element if and only if the primary purpose and function of the equipment, as the CLEC seeks to deploy it, meets either or both of the standards set forth in the preceding paragraph. For a piece of equipment to be utilized primarily to obtain equal in quality interconnection or nondiscriminatory access to one or more unbundled network elements, there also must be a logical nexus between the additional functions the equipment would perform and the telecommunication services the CLEC seeks to provide to its customers by means of the interconnection or unbundled network element. The collocation of those functions of the equipment that, as stand-alone functions, do not meet either of the standards set forth in the preceding paragraph must not cause the equipment to significantly increase the burden on the Utility's property.

Whenever the Utility objects to collocation of equipment by a requesting CLEC for purposes within the scope of Section 251(c)(6) of the Act, the Utility shall prove to the state commission that the equipment is not necessary for interconnection or access to unbundled network elements under the standards set forth above. (N)

The CLEC may place in its collocation space ancillary equipment such as cross connect frames, and (P)
metal storage cabinets. However, metal storage cabinets must meet Utility premises environmental (T)
standards. (P)

(P) Pending approval of Advice Letter No. 9509A. (L)
(P1) Pending approval of Advice Letter No. 9850.
(L)

(L) Material previously on this page moved to Original Sheet 15.1. Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (N)

IV. INSTALLATION AND OPERATION (Continued) (N)

C. Equipment and Facilities (N)

3. Specifications (P) (L)

The CLEC facilities shall not physically, electronically, or inductively interfere with or impair the service of the Utility's or any other CLEC facilities, create hazards or cause physical harm to any individual or the public. All CLEC equipment used for Caged and Cageless Collocation must be tested to, and must meet: (1) the Network Equipment Building Systems (NEBS) Level 1 family of safety requirements as defined in the Utility's NEBS requirements RNSA-NEB-95-0003, Revision 10 or higher; and (2) the specific risk/safety/hazard criteria specified in Addendum E of the Collocation Services Packet. (P) (L)

(P) Pending approval of Advice Letter No. 9509A.

(L) Material moved from 2nd Revised Sheet 15.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued) (P)

C. Equipment and Facilities (Continued) (P)

9. Interconnection Between Collocated Spaces (P) (T)

Dedicated Transit Service (DTS), which allows for interconnection between CLECs, provides a dedicated electrical or optical path between collocation arrangements (caged, cageless, and virtual) of the same or of two different CLECs within the same Utility premises, using Utility provided distribution facilities. DTS is available for DS0, DS1, DS3, and dark fiber cross connects. In addition, the Utility will also provide other technically feasible cross-connection arrangements, including lit fiber, on an Individual Case Basis (ICB) as requested by a CLEC. The Utility will offer DTS to requesting CLECs as long as such access is technically feasible. (C)

DTS is only available when both collocation arrangements (either caged, cageless, and/or virtual) being interconnected are within the same Utility premises, provided that the collocated equipment is used for interconnection with the utility and/or for access to the Utility's unbundled network elements. The Utility shall provide such DTS connections from the CLEC's collocation arrangement to another collocation arrangement of the same CLEC within the same Telephone Company premises, or to a collocation arrangement of another CLEC in the same Telephone Company premises. DTS is provided at the same transmission level from CLEC to CLEC. (C)

The DTS arrangement requires the requesting CLEC to provide cable assignment information for itself as well as for the other CLEC. The Utility will not make cable assignments for DTS. The requesting CLEC is responsible for all DTS ordering, bill payment, disconnect orders and maintenance transactions and is the customer of record. The requesting CLEC must also provide a letter of agency from the CLEC it is connecting to that authorizes the DTS connection and facility assignment. DTS is provided on a negotiated interval with the requesting CLEC. DTS service order and service connection rates are specified in Section XVI. (N) (N)

10. Optical Facility Terminations (P1)

CLECs who request access to unbundled dark fiber and unbundled optical interoffice facilities may apply for a fiber optic patchcord connection(s) between the Utility's fiber distribution panel (FDP) and the CLEC's collocated transmission equipment and facilities. The fiber optic patchcord cross connect is limited in use solely in conjunction with access to unbundled dark fiber, unbundled optical interoffice facilities, and Dedicated Transit Service. (T) (P1) (T)

(L)

(P) Pending approval of Advice Letter No. 9509A.
(P1) Pending approval of Advice Letter No. 9850.

(L) Material previously on this page moved to Original Sheet 19.1. (L)

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (N)

IV. INSTALLATION AND OPERATION (Continued) (N)

D. Access to Collocation Space (P) (L)

The Utility will permit CLEC employees, agents, and contractors approved by the Utility to have direct access to CLEC caged or cageless collocated equipment twenty-four (24) hours per day, seven (7) days per week, and reasonable access to the Utility's restroom facilities. CLEC employees, agents, or contractors must comply with the policies and practices of the Utility pertaining to fire, safety, and security as described in the Utility's Security Procedures and Requirements Guidelines, which are attached to the Collocation Services Packet. The Utility reserves the right, with 24 hours prior notice to the CLEC, to access the CLEC's collocated partitioned space to perform periodic inspections to ensure compliance with Utility installation, safety and security practices. Where the CLEC shares a common entrance to the premises with the Utility, the reasonable use of shared building facilities, e.g., elevators, unrestricted corridors, etc., will be permitted. However, Verizon reserves the right to permanently remove and/or deny access from Utility premises any CLEC employee, agent, or contractor who violates the Utility's policies, work rules, or business conduct standards, or otherwise poses a security risk to the Utility. (T) (T) (P) (L)

(P) Pending approval of Advice Letter No. 9509A.

(L) Material moved from 2nd Revised Sheet 19.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued)

F. Security Requirements (Continued)

1. Background Tests; Training (Continued)

The CLEC must agree that its employees/vendors with access to Utility premises shall at all times adhere to the rules of conduct established by the Utility for the premises and Utility personnel and vendors. The Utility reserves the right to make changes to such procedures and rules to preserve the integrity and operation of Utility network or facilities or to comply with applicable laws and regulations. The Utility will provide the CLEC with written notice of such changes. Where applicable, the Utility will provide information to the CLEC on the specific type of security training required so its employees can complete such training.

2. Security Standards

The Utility will be solely responsible for determining the appropriate level of security in each premises. The Utility reserves the right to deny access to Utility buildings for any CLEC employee, agent or contractor who cannot meet the Utility's established security standards. Employees, agents or contractors of the CLEC are required to meet the same security requirements and adhere to the same work rules that Utility employees and contractors are required to follow.

The Utility also reserves the right to deny access to Utility buildings for CLEC employees, agents and contractors for falsification of records, violation of fire, safety or security practices and policies or other just cause.

CLEC employees, agents or contractors who meet the Utility's established security standards will be provided access to the CLEC's collocation equipment twenty-four (24) hours per day, seven (7) days per week and reasonable access to the Utility's restroom facilities. (T)
(P) (T)

(P) Pending approval of Advice Letter No. 9509.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

IV. INSTALLATION AND OPERATION (Continued)

F. Security Requirements (Continued)

2. Security Standards (Continued)

If CLEC employees, agents or contractors request and are granted access to other areas of the Utility's premises, a Utility employee, agent or contractor may accompany and observe the CLEC employee(s), agent(s) or contractor(s) at no cost to the CLEC. (T)

The Utility may use reasonable security measures to protect its equipment, including, for example, enclosing its equipment in its own cage or other separation, utilizing monitored card reader systems, digital security cameras, badges with computerized tracking systems, identification swipe cards, keyed access and/or logs, as deemed appropriate by the Utility. (P)

The Utility may require CLEC employees and contractors to use a central or separate entrance to the Utility's premises, provided, however, that where the Utility requires that CLEC employees or contractors access collocated equipment only through a separate entrance, employees and contractors of the Utility's affiliates and subsidiaries will be subject to the same restriction. (N)

The Utility may construct or require the construction of a separate entrance to access caged and cageless collocation space, provided that each of the following conditions is met: (1) Construction of a separate entrance is technically feasible; (2) Either legitimate security concerns, or operational constraints unrelated to the incumbent's or any of its affiliates' or subsidiaries' competitive concerns, warrant such separation; (3) Construction of a separate entrance will not artificially delay collocation provisioning; and (4) Construction of a separate entrance will not materially increase the CLEC's collocation costs. (N)

3. Access Cards/Identification (P)

Access cards or keys will be provided to no more than a reasonable number of CLEC appointed individuals for each Utility premises. All CLEC employees, agents and contractors requesting access to the premises are required to have a photo identification card, which identifies the person by name and the name of the CLEC. The ID must be worn on the individual's exterior clothing while on Utility premises. The Utility will provide the CLEC with instructions and necessary access cards or keys to obtain access to Utility buildings.

The CLEC is required to immediately notify the Utility by the most expeditious means, when any CLEC employee, agent or contractor with access privileges to Utility buildings is no longer in its employ, or when keys, access cards or other means of obtaining access to Utility buildings are lost, stolen or not returned by an employee, agent or contractor no longer in its employ. (P)

(P) Pending approval of Advice Letter No. 9509.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

V. SPACE REQUIREMENTS (Continued)

E. Collocation Space Report

Upon request by the CLEC and upon its signing a collocation nondisclosure agreement, the Utility will make available a Collocation Space Report with the following information for the premises requested:

- Detailed description and amount of caged and cageless collocation space available; (T)
- Number of telecommunications carriers with existing collocation arrangements;
- Modifications of the use of space since the last Collocation Space Report requested; and,
- Measures being taken, if any, to make additional Collocation spaces available.

The Collocation Space Report is not required prior to the submission of a collocation application for a specific premises in order to determine collocation space availability for the premises. The Collocation Space Report will be provided to a CLEC within ten (10) calendar days of the request, provided the request is submitted during the ordinary course of business. A Collocation Space Report fee will be assessed per request and per premises.

F. Reclamation

When initiating an application form, the CLEC must have started installing equipment approved for collocation at the Utility premises within a reasonable period of time, not to exceed six (6) months from the date the collocation arrangement is accepted. If the CLEC does not utilize its collocation space within the established time period, and has not met the space reservation requirements of Section V.D, the Utility may reclaim the unused collocation space to accommodate another CLEC request or the Utility's future space requirements. (P)

(P) Pending approval of Advice Letter No. 9509.

Continued

COMPETITIVE ACCESS SERVICES - COLLOCATION SERVICE (P)

XV. DESCRIPTION AND APPLICATION OF RATE ELEMENTS

A. Non-Recurring Charges

The following are non-recurring charges (one-time charges) that apply for specific work activity.

1. Engineering/Major Augment Fee

The Engineering/Major Augment Fee applies for each initial Caged, Cageless, Virtual, or Microwave collocation request and major augment requests for existing Caged, Cageless, and Virtual collocation arrangements. This charge recovers the costs of the initial walkthrough to determine if there is sufficient collocation space, the best location for the collocation area, what building modifications are necessary to provide collocation, and if sufficient DC power facilities exist in the premises to accommodate collocation. This fee also includes the total time for the Building Services Engineer and the time for the Outside Plant and Central Office Engineers to attend status meetings. (P1) (P1) (P1)

2. Minor Augment Fee

The Minor Augment Fee applies for each minor augment request of an existing Caged, Cageless, Virtual, or Microwave collocation arrangement that does not require additional AC or DC power systems, HVAC system upgrades, or additional cage space. Minor augments are those requests that require the Utility to perform a service or function on behalf of the CLEC including, but not limited to: installation of Virtual equipment cards or software upgrades, removal of Virtual equipment, requests to pull cable from exterior microwave facilities, and requests to terminate DS0, DS1 and DS3 cables. (P1) (P1) (P1) (P1)(T)

3. Access Card Administration

The Access Card Administration rate covers activities associated with the issuance and management of premises access cards. The rate is applied on a per card basis.

4. Cage Enclosure

The Cage Enclosure rate is applied per caged arrangement. This rate includes the labor and materials to recover the costs incurred in constructing the CLEC's cage, cage gate, and grounding bar. There are five caged enclosure rate elements based on the size of the cage: 25 to 100 square feet; 101 to 200 square feet; 201 to 300 square feet; 301 to 400 square feet, and 401 to 500 square feet. (P)

(P) Pending approval of Advice Letter No. 9509.
(P1) Pending approval of Advice Letter No. 9850.

XV. DESCRIPTION AND APPLICATION OF RATE ELEMENTS (Continued)

A. Non-Recurring Charges (Continued)

46. Dedicated Transit Service (DTS) - Service Order Charge (P1) (N)

Applied per DTS order to the requesting CLEC for recovery of DTS order placement and issuance costs. The manual charge applies when the semi-mechanized ordering interface is not used.

47. Dedicated Transit Service (DTS) - Service Connection CO Wiring (P1)

Applied per DTS jumper to the requesting CLEC for recovery of DTS jumper material, wiring, and service turn-up for DS0, DS1, DS3, and dark fiber circuits. (P1)

48. Dedicated Transit Service (DTS) - Service Connection Provisioning

Applied per DTS order to the requesting CLEC for recovery of circuit design and labor costs associated with the provisioning of DS0, DS1, DS3, and dark fiber circuits for DTS. (N)

XV. DESCRIPTION AND APPLICATION OF RATE ELEMENTS (Continued)

B. Monthly Charges (Continued)

21. Adjacent Cable Vault Space (P1)

The Adjacent Cable Vault Space charge covers the cost of the space the CLEC's cable occupies within the cable vault. The charge is based on the diameter of the cable or subduct.

22. Adjacent Cable Rack Space (P1)

This charge covers the space utilization cost that the CLEC's fiber, metallic or coaxial cable occupies within the cable rack system. The charge is based on the linear feet occupied. (P1)

(P1)

(P1)

(P) (P1)

23. Microwave Rooftop Space (P1)

Microwave Rooftop Space is the cost per square foot to provide rooftop space to the CLEC for microwave antennae and other exterior facilities. The cost includes only that which relates directly to the land and building space itself.

24. Virtual Equipment Maintenance

The Virtual Equipment Maintenance charge is applied on a per quarter rack (or quarter bay) basis and recovers the costs incurred by the Utility for maintenance of the CLEC's virtual collocation equipment. This charge would apply to the maintenance of equipment including, but not limited to, ATM, DSLAM, frame relay, routers, OC3, OC12, OC24, OC48, and NGDLC. This charge does not apply for the maintenance of splitters. (P1)

(P) Pending approval of Advice Letter No. 9509.
(P1) Pending approval of Advice Letter No. 9850.

XVI. RATES AND CHARGES (Continued) (P1)

AAI. Dedicated Transit Service (DTS) (N)

	NRC
DS0	
Service Order, Semi-Mechanized, per order	$ 21.89
Service Order, Manual, per order	38.02
Service Connection CO Wiring, per jumper	6.95
Service Connection Provisioning, per order	82.27
DS1, DS3, Dark Fiber	
Service Order, Semi-Mechanized, per order	21.89
Service Order, Manual, per order	38.02
Service Connection CO Wiring, per jumper	16.92
Service Connection Provisioning, per order	95.89 (N)

AAJ. Labor Charges (P) (P1)(T)

	Charges
Labor Rates, Per Technician	
Basic Business Day	
1st Half Hour	78.98
Each Additional Half Hour	39.49
Overtime Non-Business Day	
1st Half Hour	100.00
Each Additional Half Hour	75.00
Premium Non-Business Day	
1st Half Hour	150.00
Each Additional Half Hour	125.00 (P)

(P) Pending approval of Advice Letter No. 9509.
(P1) Pending approval of Advice Letter No. 9850.
