International
Global Private Line (PL) Services

(N)

(Available only to existing Customers, at existing locations, without modification.)

General Description

The Company's Global Private Line Services are provided as a family of bandwidth and data services which link customers' locations and provide voice, data, video and other transmissions. Service will be provided between the United States and International locations specified herein.

An end to end International Service will be comprised of a customer premises and a Point of Presence (POP) in the United States and a customer premises and a POP at an International location.

Service Guarantee

The Company provides Service Guarantees for Global PL Service. If service is not restored within specified time frames, subject to the regulations stated in this Product Guide, the Company will issue a credit for the Global PL Service circuit as provided in the regulations below.

Performance Objective

The Performance Objective for Global PL Services from Customer's premises to Customer's Premises is 99.96% circuit availability.

Credit Allowances

If a particular service is interrupted beyond a specified time, an appropriate credit will be provided as set forth below:

For an interruption of four hours or more for each calendar day for a particular service, and if requested by the customer, the Company shall provide the Customer with a days credit for the particular service circuit recurring rates.

The credit shall be based on a pro-ration of the number of out of service days to the number of days in the month. As an example, six out of service days/thirty days in month is equal to a 20% rebate of the monthly charges. (N)

Service Guarantee, (Cont'd.) (N)

No Credit Allowances

No credit allowances will be made for:

Interruptions due to the failure of power, equipment systems, or services not provided by the Company; or

Interruptions during any period when the Customer or user has released the circuit to the Company for maintenance, rearrangement purposes, for the implementation of a Customer order, or for routine maintenance, testing and adjustment; or

Interruptions not reported to the Company; or

Interruptions that are due to a cause beyond the Company's reasonable control, including without limitation, problems with the Customer's terminal equipment, or failure of Customer to meet responsibilities set forth in this RTC.

Interruption Period

An interruption period begins when the Customer reports to the Company that the service has been interrupted and releases it for testing and repair. An interruption period ends when the service is operative again. (N)

Services (N)

Global PL DS0 Services

Global Private Line DS0 Service is a high quality digital bandwidth service with transmission capabilities of up to 64 Kbps. A DS0 provides the transmission of low-to-medium speed analog and digital channels between two customer designated premises, between a designated customer premises and a Point of Presence (POP), or between POPs provided by the Company.

Global Private Line DS0 Service will include the following:

-Digital Data Service B A point-to-point Digital data transport service utilizing speeds of 56 Kbps or 64 Kbps.

-Analog Data B A point-to-point Analog data transport service utilizing 19.2 Kbps speed.

-Analog Voice B A full 64 Kbps point-to-point service for the transmission of Voice communications offering the following services:

2 and 4 Wire Voice
Automatic Ringdown
Manual Ringdown
Hoot and Holler (N)

Services, (Cont'd.) (N)

Global PL Fractional DS1/T1 Service

Global Private Line Fractional DS1/T1 is a high quality digital Bandwidth Service that provides medium-to-high speed transmission between two customers designated premises, between a designated customer premise and a POP, or between POPs provided by the Company. This Service will support contiguous bit rate services for simultaneous, two-way, digital transmission of voice, data, video, and image and is available at the following contiguous bit rates:

128 Kbps
256 Kbps
384 Kbps
512 Kbps
768 Kbps

Global PL DS1/T1 Service

Global Private Line DS1/T1 service is a high quality digital Bandwidth Service that provides high speed 1.544 Mbps transmission. The Global PL DS1 Service may be used to provide connection between two customer designated premises, between a customer designated premises and a POP, or between POPs provided by the Company.

Global PL DS3/T3 Service

The Company's Global Private Line DS3/T3 Service is a high quality digital Bandwidth Service that provides high speed 44.736 Mbps transmission over fiber optic facilities. The Global PL DS3 Service may be used to provide connection between two customer designated premises, between a customer designated premises and a POP, or between POPs provided by the Company.

Global PL T1-E1 Conversion Service

The Company provides for the conversion of 24 channels (T1) to 30 channels (E1) or the conversion from E1 to T1. E1 Service is similar to DS1 Service, except that the transmission speed is the European standard of 1.920 Mbps. (N)

Other Terms and Conditions (N)

Taxes and Fees apply in addition to the stated rates.

See Private Line and Data Services – General Product Guide for additional terms and conditions.

Rates and Charges

Access Local Loop

If the Company provides the Access Local Loop facilities, the facilities will be billed at rates based on recurring and nonrecurring prices for such Access Local Loops as established by the LEC, CLEC or other Carriers.

When the Access Local Loop facilities are provided to the Customer by other Carriers, the Customer is responsible for all associated recurring and nonrecurring charges and for compliance with the providing Carriers' Terms and Conditions.

Interoffice Channel (IOC)

Recurring and nonrecurring IOC charges apply to each IOC. Recurring charges are based on circuit bandwidth capability.

Agency Coordination

A Nonrecurring Charge applies for each Access Local Loop Facility associated with the Company acting as the Customer's agent:

Circuit	Nonrecurring Charge Per Access Local Loop
DS0	$100.00
FDS1-128 Kbps	$100.00
FDS1-256 Kbps	$100.00
FDS1-384 Kbps	$100.00
FDS1-512 Kbps	$100.00
FDS1-768 Kbps	$100.00
DS1	$100.00

Other Charges

If applicable, to provide Domestic Interstate PL transport from the Company's POPs stated herein to a POP which connects the Access Local Loop to the Customers premises, additional IOC charges as governed by the Company's Domestic Product Guides will apply.

Term Commitment Plan

Discounts apply to all recurring rate elements of the Company's Global PL Service for two-year and three year Term Commitment Plans.

Service Period	% Discount Level
One Year Term	No Discount
Two Year Term	5%
Three Year Term	10%
