SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 General

Subject to Section 2.1 of this tariff, presubscribed service is offered from locations served with equal access end offices. The Company's service is available twenty-four hours per day, seven days a week, except as otherwise provided in the Company's tariffs.

The Company provides telecommunications services between locations within the United States and foreign locations as specified herein. The Company's charges may be based upon call duration, time of day rate period, mileage, volume, location, and/or call type.

All rates specified in this tariff are expressed in US dollars and cents.

All usage rates are expressed as rate per minute, unless otherwise clearly indicated. (N)

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive services are based on the airline distance between the rate center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the industry standard "V" and "H" coordinates of the applicable rate centers, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the call.

Formula:

$$\sqrt{\frac{|V_1 - V_2|^2 + |H_1 - H_2|^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.3.1 Timing for all calls begins when the called party answers the call (i.e. when two way communications are established.) Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.

3.3.2 Chargeable time for all station to station calls begins when connection is established between the calling party and the called party and ends when the calling party hangs up, thereby releasing the network connection. If the called party hangs up but the calling station does not, chargeable time ends when the network connection is released, either by automatic timing equipment in the network or by an operator.

3.3.3 Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this tariff.

3.3.4 Calls are measured and billed in one minute increments on a per-call basis, unless otherwise indicated in this tariff. Fractional billing increments are rounded to the full billing increment as stated in the product description.

3.3.5 No charges apply to incomplete calls. An incomplete call is a station call in which the called station does not answer, or a person to person call in which the station does not answer or the requested person is unavailable, or a collect call for which the called party refuses to accept the charges.

3.3.6 Usage charges are computed on a per call basis. When computation of call charges result in fractional cents, the resulting charge is rounded to the nearest penny.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.6 International Message Telecommunications Service

3.6.1 General

International Message Telecommunications Service (IMTS) is the basic international long distance service offered to Residential and Business* Customers for outbound direct dialed calling. IMTS Service is the de`fault service for Customers that make international calls, but have not selected a specific international option. Rates are available 24 hours a day, seven days a week. (T)

IMTS is available to Customers who are presubscribed to Long Distance Message Telecommunications Service (LDMTS), or any of the Company's domestic plans for outbound interexchange direct dialed calling.

If a customer no longer purchases or is disconnected from the Company's outbound interexchange direct dialed calling plans, the Customer will also be disconnected from IMTS.

Service is offered subject to the availability of the necessary facilities, equipment and/or Customer information, including, but not limited to, billing systems and information required for billing. The Company may decline applications for service to or from a location where the necessary facilities or equipment are not available.

*Effective 7/19/14, Business LDMTS is grandfathered and no longer available to new Customers. No moves, changes or additions will be allowed for existing Customers. (T) (T)
