3.0 JURISDICTIONAL REPORTING

3.1 Description and Requirements

The jurisdictional reporting requirements will be as specified below. When a Customer orders access service, its projected percent interstate usage (PIU) must be provided in whole numbers to the Company. These whole number percentages will be used by the Company to apportion the use and/or charges between interstate and intrastate until a revised report is received as set forth herein.

(a) Originating Access

Originating access minutes may be based on traffic originating at the state, LATA or local switching center level, provided that the traffic being measured is only traffic originating from the Company local switching center(s). The Customer must provide the Company with a projected PIU factor on a quarterly basis, as specified herein. If no PIU for originating minutes is submitted, then the projected PIU will be set on a default basis of 50 percent interstate traffic and 50 percent intrastate traffic.

(b) Terminating Access

Terminating access minutes may be based on traffic terminating at the state, LATA or local switching center level, provided that the traffic being measured is only traffic terminating to the Company local switching center(s). The Customer must provide the Company with a projected PIU factor on a quarterly basis, as specified below. If no PIU for originating minutes is submitted, then the projected PIU will be set on a default basis of 50 percent interstate traffic and 50 percent intrastate traffic.

(c) Except where the Company measured access minutes are used, the Customer reported projected PIU factor as set forth above will be used until the Customer reports a different projected PIU factor, as set forth below. The revised report will serve as the basis for future billing and will be effective on the next bill date.

3.0 JURISDICTIONAL REPORTING (Cont'd)

3.1 Description and Requirements (Cont'd)

(d) Effective on the first of January, April, July and October of each year the Customer shall update its interstate and intrastate jurisdictional report. The Customer shall forward to the Company, to be received no later than 15 days after the first of such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June and September, respectively, for each service arranged for interstate use, based solely on the traffic originating from or terminating to the Company's local switching center. The revised report will serve as the basis for the next three months billing and will be effective on the bill date for that service. If the Customer does not supply the reports for those services where reports are needed, the Company will assume the percentage to be the same as that provided previously. For those cases in which a quarterly report has never been received from the Customer, the Company will assume the percentages to be the same as those provided in the access service request.

(e) Jurisdictional Reports Verification

For Switched Access Service, if a billing dispute arises or a regulatory commission questions the projected PIU factor, the customer will provide the data issued to determine the projected PIU factor. The Customer will supply the data within 30 days of the Company request.

The Customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained and, upon request of the Company, shall make the records available for inspection as reasonably necessary for purposes of verification of the percentages. The Company reserves the right to conduct an audit at any time during the year. The Customer, at its own expense, has the right to retain an independent auditing firm.
