4.0 SERVICE DESCRIPTIONS

4.1 Switched Access Service

4.1.1 Description of Services

Switched Access Service provides the ability to originate calls from an End User's Premises location to a Customer's Premises, and to terminate calls from a Customer designated Premises to an End User's Premises. Company Switched Access Service consists of the services offered pursuant to this Tariff. Service is offered via the Company's facilities and/or in combination with resold exchange services, transmission facilities provided by other certificated carriers, or a combination thereof. (T) | (T)

Under this tariff, the Company is only responsible for the services and facilities it provides under this tariff, and it assumes no responsibility for any service provided by any other entity that purchases access to the Company network in order to originate or terminate its own services, or to communicate with its own Customers.

The provision of Company's Services is subject to and contingent upon the Company obtaining and retaining such approvals, consents, governmental authorizations, licenses and permits, as may be required or be deemed necessary by the Company. The Company shall use reasonable efforts to obtain and keep in effect all such approvals, consents, authorizations, licenses and permits that may be required to be obtained. The Company shall be entitled to take, and shall have no liability whatsoever for, any action necessary to bring the Services into conformance with any rules, regulations, orders decisions, or directives imposed bye the Federal Communication Commission or other applicable agency, and the Customer shall fully cooperate in and take such action as may be requested by the Company to comply with any such rules, regulations, orders, decisions, or directives.

4.1.2 Billing of Access Minutes

When recording originating calls over FGD with multifrequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over FGD ends when the originating FGD entry switch receives disconnect supervision from either the originating end user's local switching center (indicating that the originating end user has disconnected), or the Customer's facilities, whichever is recognized first by the entry switch.

For terminating calls over FGD with multifrequency address signaling, the measurement of access minutes begins when a seizure signal is received from the Carrier's trunk group at the point of presence within the LATA. The measurement of terminating call usage over FGD ends when a disconnect signal is received, indicating that either the originating or terminating user has disconnected.

When recording originating calls over FGD with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct trunk groups and with the receipt of an exit message by the switch for tandem trunk groups. The measurement of originating FGD usage ends when the entry switch receives or sends a release message, whichever occurs first.

For terminating calls over FGD with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives the initial address message from the terminating end user. On directly routed trunk groups or on tandem routed trunk groups, the Company switch receives the initial address message and sends the indication to the Customer in the form of an answer message. The measurement of termination FGD call usage ends when the entry switch receives or sends a release message, whichever occurs first.

4.1.3 Application of Rates

The rate for switched access is assessed based on the monthly usage charges for end-office switching and tandem switched transport. Usage rates are rates that are applied on a per access minute or per query basis.

4.1.4 Rates

(a) End Office Switching Charge:

Per Access Minute of Originating Use	Per Access Minute of Termination Use	
$ 0.00910000	$0.00910000	(R)

(b) Tandem Switched Transport Charge

Per Access Minute of Originating Use	Per Access Minute of Terminating Use	
$ 0.00342250	$ 0.00342250	(R)

4.2 Historic Invoices

The Company will furnish, upon the Customer's request, copies of invoices which were originally issued to the Customer more than thirteen months prior to the request or copies of invoices that are available on-line, but that customer does not wish to retrieve from the available on-line system. Customers can request the invoice in one of two formats: electronic copy (portable data file/.pdf) or CSV/CD of Call Detail Record. Customer will be charged based on the format requested and on a per invoice basis.

Format	Rate Per Invoice
Electronic	$10.00
CSV/CD of CDR	$25.00

4.3 Service Order Changes

4.3.1 Service Order Change Charge

Customer will be assessed a non-recurring charge when it initiates a modification of a Service Order after its acceptance by XO. If a Service Order is modified after its acceptance by XO, per-Circuit change charges will apply as follows: $50 for any change requested by Customer within five (5) days of Service Order acceptance; $200 for any change requested by Customer between five (5) days of Service Order acceptance and five (5) days of the projected Start of Service Date; and $400 for any change requested by Customer within five (5) days of the projected Start of Service Date. In addition, Customer must pay all third party charges imposed as a result of the change.

4.3.2 Service Order Cancellations

Customer will be assessed a non-recurring charge for each Circuit cancelled between the date of its acceptance by XO and the projected Start of Service Date. The cancellation charges will be as follows:

Circuit Type	Cancellation Charge – Per Circuit
DS1	$750.00, plus one month's MRC
DS3	$1,500.00, plus one month's MRC
All other Circuit types	One month's MRC and applicable installation charges

In addition to these charges, Customer must pay all third party charges imposed as a result of the cancellation.

4.4 Service Extension Charge

A Service Extension Charge will be assessed when a customer requests and XO agrees to provide services at a location beyond XO's demarcation point. This non-recurring charge will be applied to the first and each additional circuit as outlined below:

	NON-RECURRING CHARGES	
Type of Circuit	**First Circuit**	**Each Additional Circuit**
Less Than or Equal to a DS1 (1.544 Mbps)	$ 325.00	$ 80.00
More Than a DS1 (1.544 Mbps) and Less Than or Equal to a DS3 (44.736 Mbps)	$ 550.00	$ 550.00
