SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 General

Presubscribed service is offered from locations served with equal access end offices.

The Company's service is available twenty-four hours per day, seven days a week except as otherwise provided in the Company's price lists.

All usage rates are expressed as rate per minute, unless otherwise clearly indicated. (T)

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive services are based on the airline distance between the rate center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the applicable rate centers as defined by Telecordia (formerly BellCore) and on file with the FCC in the FCC in NECA Tariff FCC No. 4, in the following manner: (T)

Step 1 - Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the call.

Formula:

$$\sqrt{\frac{|V_1 - V_2|^2 + |H_1 - H_2|^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.3.1 Timing for all calls begins when the called party answers the call (i.e. when two way communications are established). Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.

3.3.2 Chargeable time for all station-to-station calls begins when connection is established between calling party and the called party and ends when the calling party hangs up thereby releasing the network connection. If the called party hangs up but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the network, or by an operator.

3.3.3 Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this price list.

3.3.4 Calls are measured and billed in one minute increments unless otherwise indicated in this price list. Any partial minute is rounded up to a full minute.

3.3.5 No charges apply to incomplete calls. An incomplete call is a station call in which the called station does not answer, or a person to person call in which the station does not answer or the requested person is unavailable, or a collect call for which the called party refuses to accept the charges.

3.3.6 Usage charges are computed on a per call basis. When computation of call charges result in fractional cents, the resulting charge is rounded up to the nearest penny.
