3. SERVICE CLASSIFICATIONS AND RATES (TWO-POINT) (Cont'd)

3.1 IMTS - Schedule I (Cont'd)(A) Application

Service between two points in the LATA is furnished as set forth in 3.1(B) and 3.1(C) following.

(B) Mileage Measurement(1) Mileage Determination

Airline mileages between rate centers are determined as described in The Verizon Telephone Companies Tariff FCC No. 22.

In general, each point in the LATA is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest and in a few of the largest cities there are several rate centers further identified as city zones.

(a) Where a Point is Divided into City Zones

- the rate airline mileage is measured between the rate center of the city zone and the rate center of the other point, except that when such mileage exceeds forty (40) miles, the rate airline mileage is measured between the rate center of the master zone and the rate center of the other point with a minimum of forty-one (41) miles being applicable.

(b) Where Both Points are Divided into City Zones

- the rate airline mileage is measured between the rate centers of the city zones, except that when such mileage exceeds forty (40) miles, the rate mileage distance is measured between the rate centers of the master zone with a minimum of forty-one (41) miles being applicable.

(c) The rate centers in this tariff are arranged alphabetically by rate center within the LATAs.

The three types of Intelligent Toll Free Services are:
