

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

A. APPLICATION

Part 1 of this tariff applies to message toll telephone service originated from a General Telephone Company of Pennsylvania rate center which terminates within a Local Access and Transport Area (LATA) and within the State of Pennsylvania. The points between which service is furnished on a local basis are indicated by the Local General Tariffs governing the rates for exchange service.

B. GENERAL REGULATIONS

1. DEFINITION

Message toll telephone service is that of furnishing facilities for telephone communication between telephones in different local service areas of the same LATA in accordance with the regulations and system of charges specified in Part 1 of this tariff. The toll service charges specified in Part 1 of this tariff are in payment for all service furnished between the calling and called telephones.

2. UNDERTAKING OF TELEPHONE COMPANY

The Telephone Company does not transmit messages, but offers, subject to the terms and conditions specified in Part 1 of this tariff, the use of its facilities where available for communication between customers.

3. PRIORITY OF SERVICE

In case a shortage of facilities exists at any time either for temporary or protracted periods, the furnishing of message toll telephone service shall take precedence over the use of trunk lines between central offices for the furnishing of the following types of channels: extension, branch exchange station, tie, private, teletypewriter, program transmission, short period talking, secretarial, toll terminal and foreign exchange.

4. LIABILITY OF TELEPHONE COMPANY

The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays, or errors or defects in transmission, or failures or defects in the Telephone Company's equipment occurring in the course of furnishing service or other facilities and not caused by the negligence of the customer, or of the Telephone Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, or error or defect in transmission, or failure or defect in the Telephone Company's equipment occurs. Adjustments within the limits provided herein may be made by direct payment to the customer or by credit to the customer's account.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

B. GENERAL REGULATIONS (Cont'd)

5. USE

a. Use of Service

Service is provided for use by the customer and may be used by others, when so authorized by the customer, provided that all such usage shall be subject to the provisions of Part 1 of this tariff.

b. Use of Service for Unlawful Purposes

Service is furnished subject to the condition that it will not be used for an unlawful purpose. Service will not be furnished if any law enforcement agency, acting within its jurisdiction, advises that such service is being used or will be used in violation of the law, or if the Telephone Company receives other evidence that such service is being or will be so used.

c. Use of Service With Customer-Provided Equipment

Customer-provided terminal equipment and communications systems may be connected to exchange facilities of the Telephone Company subject to the regulations and rates applicable to the connection of such facilities to the local and long distance Telecommunications System of the Telephone Company as provided by Tariffs Telephone-Pa. P.U.C. Nos. 1, 3, 4 and 6.

6. SERVICE USED FOR DATA TRANSMISSION

a. Message toll telephone service is available for use on a two-point service basis with data transmitting and/or receiving equipment for the transmission and reception of data signals.

b. The regulations and rates for each call made for the purpose of transmitting data signals are those applicable for message toll telephone station-to-station and person-to-person services according to the connection established.

7. RESALE OF SERVICE

When Message Toll Telephone Service is provided for resale, a discount of 5% (five percent) will apply. This discount applies only to two-point service and does not include associated services. Verizon North Discount Calling Service, Verizon North Between Friends and Selective Exchange Calling Plan Service are available for resale at tariffed rates and must be applied on a per customer (end user) basis. The resale provisions will be available upon completion of Company and reseller arrangements. Services and facilities will be provided to resellers that have been duly authorized to transact business within the Commonwealth of Pennsylvania on a non discriminatory basis.

8. INTRALATA PRIMARY INTEREXCHANGE CARRIER (IPIC) FEE CREDIT

A credit per line for the amount charged by a company other than Verizon North for IntraLATA Message Toll Telephone Service will be issued to customers for IPIC change charge when changing their IPIC to Verizon North.

C. TWO-POINT SERVICE

1. DEFINITIONS

Bill to Third Party¹

The term "Bill to Third Party" denotes a billing arrangement by which a call may be charged to an authorized station as determined by the Telephone Company other than the station originating the call or the station where the call is terminated.

¹ Effective August 8, 2016, Bill to Third Party will be discontinued and will not be accepted as a billing arrangement for calls.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE(Cont'd)

1. DEFINITIONS (Cont'd)

Collect Call¹

The term "Collect Call" denotes a billing arrangement by which the charge for a call may be reversed provided the charge is accepted at the called station. A collect call may be billed to a third party number. In the case of a collect call to a pay telephone, the charge must be billed to a third party number, or the call may be reoriginated from the called station.

Operator Person-to-Person¹

The term "Operator Person-to-Person" denotes that service where the person originating the call specifies to the Telephone Company operator a particular person to be reached, a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, or a particular station, department, or office to be reached through a Centrex or PBX attendant.

When, after the station, Miscellaneous Common Carrier mobile radio system, Centrex, or PBX called has been reached and while the connection remains established, the person originating the call requests or agrees to talk to any person other than the person specified, or to any other person or mobile station to be reached through a Miscellaneous Common Carrier attendant, or to any other station, department or office to be reached through a Centrex or PBX attendant, the classification of the call remains person-to-person.

When the person originating the call wishes arrangements made in advance with a particular party or station for the establishment of a connection at a specified time (appointment call), the call is classified as person-to-person.

^{**} Effective July 1, 2010 Verizon North LLC Calling Cards will be discontinued and will not be accepted as a billing arrangement for calls.

¹ Effective August 8, 2016, Collect Call and Operator Person-to-Person will be discontinued and will not be accepted as a billing arrangement for calls.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE (Cont'd)

1. DEFINITIONS (Cont'd)

Operator Person-to-Person¹ (Cont'd)

The Telephone Company does not undertake in connection with person-to-person service to bring to a station a called person who cannot be reached at a station connected to the General Telephone Company of Pennsylvania. However, at the request of the calling party, the Telephone Company, when possible, will arrange on behalf of the calling party, for messenger service; that is, a messenger or other means to notify the called party of the call. The Telephone Company shall be reimbursed by the calling party for the amount expended for such messenger service, such charges being subject to prior authorization by the calling party to the extent that they can be determined in advance. Such charges for messenger service are in addition to the tariff charges for the message.

Station

The term "Station" denotes the network control signaling unit and any other equipment provided in accordance with Telephone Exchange Service Tariffs of this Company's concurring and connecting carriers, or Tariffs of this Company's other participating carriers, or furnished by foreign telephone administrations, at a customer's premises or at pay telephone locations which enables a customer to establish communications connections and to effect communications through such connections.

Station-to-Station

The term "Station-to-Station" denotes that service where the person originating the call dials the telephone number desired or gives to the Telephone Company operator the telephone number of the desired station, Miscellaneous Common Carrier connecting circuit, Centrex, PBX, Centrex station, or PBX station which is reached directly rather than through a Centrex or PBX attendant, or gives only the name and address under which the number of the desired station, Miscellaneous Common Carrier connecting circuit, Centrex or PBX is listed and does not specify a particular person to be reached, nor a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, nor a particular station, department or office to be reached through a Centrex or PBX attendant.

¹ Effective August 8, 2016, Operator Person-to-Person will be discontinued and will not be accepted as a billing arrangement for calls.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE (Cont'd)

1. DEFINITIONS (Cont'd)

Station-to-Station (Cont'd)

The classes of station-to-station service offered are as follows:

"Dial Station-to-Station" is that station-to-station service where the person originating the call from other than a pay telephone dials the telephone number desired and the call is completed without the assistance of a Telephone Company operator and the call is not billed to a number other than the originating number, except when an operator records the originating telephone number where no automatic recording equipment is available; when an operator reaches the called telephone number where facilities are not available for dial completion; when an operator places a call for a calling party who identifies himself as being handicapped and unable to dial the call because of his handicap; and when an operator reestablishes a call which has been interrupted after the called number has been reached.

"Coin Paid Customer Dialed" is that station-to-station service where the person originates the call from a pay telephone, dials "1" plus the called number, and pays for the call by depositing the coins in the coin telephone.

"Operator Station" is that station-to-station service where the person originating the call dials "0" plus the called number and charges the call to a third number¹, special billing number or makes the call collect. "Operator Station" is also that station-to-station service where the person originating the call dials "0" and requests the operator to dial the desired number and charge the call to a third number, special billing number, make it a collect call or pay for the call. All Station Time and Charge Requests are also included in this category.

** Effective July 1, 2010 Verizon North LLC Calling Cards will be discontinued and will not be accepted as a billing arrangement for calls.

¹ Effective August 8, 2016, Third Number will be discontinued and will not be accepted as a billing arrangement for calls.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE(Cont'd)

2. PROCEDURE FOR DETERMINING A RATE

- a. In order to determine the rate for a given class of service between two points in the State of Pennsylvania, the steps to be followed are:
 - (1) Refer to Part 1 of this tariff and note the V and H coordinates for the rate centers involved, together with any other rate information in the V-H coordinate columns. In accordance with the instructions therein, determine the rate airline distance between the rate centers involved.
 - (2) For Harrisburg, Philadelphia, and Pittsburgh, to points for which the direct distance is 40 miles or less from the respective zones, toll rates are based on the airline distance between the points. To points for which the direct distances to the respective zones are more than 40 miles, toll rates are based on the distances to Zone 1 with a minimum of 41 miles.
 - (3) Refer to the appropriate rate table in 9. following. Opposite the mileage step which includes the mileage determined as in (1) above will be found the rates for all classes of service between the rate centers involved.

3. METHOD OF APPLYING RATES

Message toll telephone service rates between points within a LATA in Pennsylvania are based on the airline distance between rate centers. In general, each point is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest and in the large metropolitan areas there are several rate centers. Each exchange area has one rate center except the Harrisburg, Philadelphia, Pittsburgh, Philadelphia Suburban and Pittsburgh Suburban exchange areas which are divided into zones each of which has a separate rate center.

For the purpose of determining rate distances, a vertical (V) and horizontal (H) coordinate system is used. The V-H system consists of a series of coordinates which represent a theoretical grid of vertical and horizontal lines covering the State of Pennsylvania. The spacing between these lines is about 1,670 feet and an intersection of any two grid lines represents the center of an area approximately one-tenth of a square mile designated by the two coordinates.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE(Cont'd)

3. METHOD OF APPLYING RATES (Cont'd)

The location of a rate center expressed in latitude and longitude can be converted mathematically to its grid location, i.e., vertical (V) and horizontal (H) coordinates. These coordinates permit calculation of the distance between any two such rate centers. The rate applicable for the distance so obtained is as provided in 9. following.

The V and the H coordinates for each rate center, and the rate center for each central office, in the State of Pennsylvania are listed in the Rate Guide in Part 3 of this tariff.

When service is available to a point not listed in this tariff, the rate center is the rate center for the central office through which exchange telephone service at the point is furnished.

4. CLASSES OF SERVICE

Service is offered on a Dial Station-to-Station, Coin Paid Customer Dialed, Operator Station, or Operator Person-to-Person¹ basis.

Charges for messages within these classes of service are based upon the day of the week and the time of day that each initial minute or additional minute begins.

Peak and Off-Peak Rate Periods - Peak rates apply from 7:00 a.m. to and including 6:59 p.m., Monday thru Friday. Off-Peak rates apply during all other time periods, including Saturdays, Sundays and the holidays listed in paragraph 1.C.8. of this Tariff.

** Effective July 1, 2010 Verizon North LLC Calling Cards will be discontinued and will not be accepted as a billing arrangement for calls.

¹ Effective August 8, 2016, Operator Person-to-Person will be discontinued and will not be accepted as a billing arrangement for calls.

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE(Cont'd)

5. INITIAL MINUTE, ADDITIONAL MINUTES AND DISCOUNTS

Rates are quoted in terms of initial minute and additional minutes.

a. All Calls

Initial minute rates given in the rate table in 9.a. following are for connections of one minute or any fraction thereof.

- b. All additional minute rates given in the rate table in 9.a. following are for each additional minute or any fraction thereof that the connection continues beyond the initial minute.

6. TIMING OF MESSAGES

- a. The time when connection is established, (determined in accordance with the time-standard or daylight saving - observed at the location of the rate center of the calling station) determines whether Peak or Off-Peak rates apply. This rule applies whether the call is sent as paid or collect.
- (1) In cases where a message begins in one rate period and ends in another, the rate in effect at the time the connection is established applies to the initial minute. The rate for each additional minute is the rate in effect at the beginning of each additional minute of usage.
- (2) On Station-to-Station messages, chargeable time begins when connection is established between the calling station and the called station, Miscellaneous Common Carrier mobile radio system or PBX.

(C) Indicates Change

Verizon North LLC

1. MESSAGE TOLL TELEPHONE SERVICE

C. TWO-POINT SERVICE (Cont'd)

6. TIMING OF MESSAGES (Cont'd)

- (3) On Person-to-Person¹ messages, chargeable time begins when connection is established between the calling person and the particular person or station specified or an agreed alternate.
- b. Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Telephone Company operator.
- c. Chargeable time does not include time lost because of faults or defects in the service.
- d. When exchange telephone service used for Message Toll Telephone Service is connected through a Service Terminating Arrangement or Connecting Arrangement at a customer's premises to a communications system, chargeable time for all calls begins when a call from the telecommunications network terminates in or passes through the first terminal equipment on that communications system. It is the customer's responsibility to furnish answer supervision so that chargeable time may begin.

7. REVERSAL OF CHARGES (COLLECT CALLS¹)

The regularly established Operator Station-to-Station or Operator Person-to-Person¹ rates apply.

8. RATES APPLICABLE ON CERTAIN HOLIDAYS

On Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), Thanksgiving Day and Labor Day, the rate applicable is the Off-Peak rate, unless a lower rate would normally apply.

¹ Effective August 8, 2016, Operator Person-to-Person and Collect Calls will be discontinued and will not be accepted as a billing arrangement for calls.

(D) Indicates Decrease

1. MESSAGE TOLL TELEPHONE SERVICE

D. CONFERENCE SERVICE

1. TOLL CONFERENCE SERVICE

a. Definition

Message toll conference service is that of furnishing connections between three or more main lines on one connection at the same time.

b. Conditions Under Which Service is Furnished

- (1) Service is furnished where and to the extent that facilities permit
- (2) All lines on a conference connection may be so interconnected that each may communicate with all the others, or arrangements may be made whereby one line will be the transmitting line and all others receiving lines.
- (3) One class of service only is offered whether the call is to specified persons or specified telephones.
- (4) The Telephone Company, upon request, will attempt to arrange for the establishment of a conference connection at a specified time.

c. Reversal of Charges (Collect Calls¹)

Charges for conference calls may, upon request, be reversed provided:

- (1) The total charge will be billed against one called line.
- (2) The charge is accepted at the designated line.

d. Timing of Messages

- (1) Chargeable time begins when connection is established between all lines on the conference.
- (2) Chargeable time ends on a given two-point connection of a conference call when the connection is terminated by the originating line of the called line.
- (3) Chargeable time does not include time lost because of faults or defects in the service.

e. Rates and Charges

The rates for a conference call are the sum of:

- (1) the two-point initial minute and additional minute charges determined in accordance with C. preceding for a call between the originating line and each called line on the conference, and
- (2) a service charge of \$2.50 for each called line.

2. LOCAL CONFERENCE SERVICE

a. Definition

At points where the special equipment required for conference connections is in service, the Telephone Company will undertake to establish local conference connections between more than two lines, all of which are within the same local service area on one connection at the same time, all such lines being so interconnected that each may communicate with all the others. The total number of lines connected will be determined by equipment limitations.

These connections will be established on either a person-to-person or station-to-station basis. The Telephone Company, at the request of a customer, will undertake to arrange for the establishment of a conference connection at a specified time.

Reversal of Charges (Collect Calls¹)

Charges for conference calls may, upon request, be reversed, provided:

- (1) The total charge will be billed against one line.
- (2) The charge is accepted at the designated line.

¹ Effective August 8, 2016, Collect Calls will be discontinued and will not be accepted as a billing arrangement for calls.

2. LOCAL CONFERENCE SERVICE (cont'd)

b. Rates and Charges

Where all lines in a conference connection are within the same local service area, the following rates apply:

- | | |
|--|--------|
| (1) Usage Charge: | |
| For each line in excess of the originating line: | |
| Each one minute or fraction thereof..... | \$.05 |
| (2) Service Charge: | |
| For each called line | \$2.50 |

E. MOBILE TELEPHONE SERVICE

1. APPLICATION OF REGULATIONS AND RATES

The regulations and rates set forth below apply for intrastate message toll Mobile Telephone Service furnished through the mobile telephone service base stations listed in 3. following.

2. GENERAL REGULATIONS

a. Definition

Message Toll Mobile Telephone Service is a communication service through a mobile telephone service base station between a mobile unit and a wire telephone located outside the mobile service area associated with such mobile telephone service base station or between two mobile units served through mobile telephone service base stations having different rate centers.

Message Toll Mobile Telephone Service also includes service through a mobile telephone service base station between a wire telephone or a mobile unit, and another station which is authorized by the Federal Communications Commission to communicate with the mobile telephone service base station, or between two such other stations.

In the application of regulations and rates, stations other than mobile units which are authorized by the Federal Communications Commission to communicate with a mobile telephone service base station are considered as mobile units.

b. Availability of Service

Mobile Telephone Service is available to mobile units equipped for this service when within range of a mobile telephone service base station through which such service is furnished, and subject to transmission, atmospheric and like limitations.

c. Class of Service

Calls may be filed either to a specified person or to a specified telephone.

d. Registry of Mobile Unit

The party on the mobile unit placing or receiving a toll call shall inform the mobile service operator, upon request, as to the place of registry of the mobile unit placing the call.

3. RATES

The rates applicable for calls from or to mobile units served by the base stations listed below, are station-to-station Peak or Off-Peak rates or person-to-person¹ rates as set forth in C. preceding.

¹ Effective August 8, 2016, Person-to-Person will be discontinued and will not be accepted as a billing arrangement for calls.
