POINT TO POINT SONET SERVICE FACILITIES
REGIONS 1 AND 11

A. GRANDFATHERING AND RESTRICTED AVAILABILITY OF SERVICE (C)

1. Point to Point SONET Service Special Access Ports are available only for an in-service Company provided point to point SONET service in Region 1 and Region 11. (T)

2. Grandfathering and Restricted Availability. Point to Point SONET Service Special Access Ports are available only where facilities exist. Effective May 16, 2025 orders for new Point to Point SONET Service Special Access Ports are no longer permitted. The Company will continue to provide existing Point to Point SONET Service Special Access Ports that were in service as of May 16, 2025 or any order for Point to Point SONET Service Special Access Ports placed with the Company prior to May 16, 2025 (collectively, Existing Ports), subject to the following conditions: (N)

   a. The Company will continue to provide Existing Ports until (i) the Customer discontinues service; or (ii) the Company terminates service.
   b. Renewal of Existing Ports is not permitted.
   c. For any Existing Port for which a Commitment Period expires or has expired, the Company will provide the Existing Port on a month-to-month basis at month-to-month rates and, without limiting the foregoing, the Company in its sole discretion may take such action as may be required to convert the Existing Port to month-to-month service (e.g., change in USOCs, etc.).
   d. Moves and changes (of any type, including without limitation conversion to a comparable service) of an Existing Port are not permitted.
   e. Notwithstanding any other provision of this Product Guide, Verizon in its sole discretion may disconnect any or all Existing Ports upon at least fifteen (15) calendar days' written notice to the Customer. (N)

B. GENERAL

1. Company provided point to point SONET service is provided where technically and operationally feasible as determined by the Company and provides a customer with SONET based broadband access transport over the Company's shared SONET network. The customer has the option to order the service with multiplexing capability from which lesser capacity Special Access channels can be derived via ports on the node.
   a. DS3 Transmux Port

      The customer has the option to order a DS3 Transmux Port which performs a DS3 to DS1 conversion. The DS3 Transmux Port includes a DS3 Transmux Facility that allows a single DS3 Transmux Port to be associated with up to twenty-eight (28) Special Access DS1 circuits.

      - he DS3 Transmux Facility aggregates the facilities associated with the DS1 services as part of a higher level DS3 handoff that is dropped from multiplexed point to point SONET service.
      - The DS3 Transmux Facility provides a two-point channelized facility between a customer designated premises and the DS3 Transmux Port. Such port may be associated with a multiplexing node that is located at a customer designated premises only. Applicable rates and charges for the port apply.

   b. Low Speed (DS1/DS3/STS1) Special Access Ports allow for lesser capacity service(s) to be added to, or dropped from, a SONET point to point service multiplexing node.

C. SHARED NETWORK ARRANGEMENT (C) (M)

(D)

(D)

1. The customer may have point to point SONET service DS3 Transmux Ports under a Shared Network Arrangement subject to Part 0, Section 13. (C)

D. CONNECTION TO OTHER SERVICES

1. Special Access High Capacity DS1 Service may be connected to a DS3 Transmux Facility via the multiplexed point to point SONET service facility. The customer must specify the connecting facility assignment (**CFA**) for both the DS3 Transmux Facility and the multiplexed point to point SONET service facility.

2. The Multiplexing Capability optional feature allows Customers to multiplex IBT OC3, OC12, and OC48 facilities to Special Access High Capacity Service of a lesser capacity. A low speed port applies for each lesser capacity service that is added to, or dropped from, an IBT multiplexing node. (M)

H. CUSTOMER OF RECORD (C)

(D)
|
|
(D)

1. The DS3 Transmux Port is billed to the Customer of record for the associated point to point SONET service. The DS1 Ports, if applicable, for the channels derived from the DS3 Transmux Facility are billed to the Customer of record for the associated High Capacity Special Access DS1 Services. (T)

J. TERMINATION LIABILITY

1. Ports which are provided under 3-Year or 5-Year term plans (which must have been subscribed prior to grandfathering of this service as set forth above) are subject to termination liability if service is disconnected prior to the end of the term plan. Termination charges are calculated as follows: (C) (C)

2. Termination liability is calculated at one hundred percent (100%) of the monthly charges for the unexpired portion of the term plan. (C) (C)

(D) | (D)

K. MINIMUM PERIOD

1. Month-to-Month Billed Ports

Ports which are provided on a month-to-month basis are subject to a one year minimum service period. If service is disconnected during the first year, the minimum period charge is one hundred percent (100%) of the monthly rate from the date of disconnection through the end of the first year.

2. 3-Year and 5-Year Billed Ports

Ports which are provided with a 3-Year or 5-Year term (which must have been subscribed prior to grandfathering of this service as set forth above) are not subject to a separate minimum service period. Minimum service period charges are recovered through the application of termination liability under Section J preceding. (C) (C)

Note: DS1 ports for High Capacity DS1 Services associated with a DS3 Transmux Port are provided under Section B1b preceding.
