FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd) (C)19.1 Rate Zones and Metropolitan Statistical Areas (C)

This section contains a list of each Telephone Company wire center that has been assigned to a rate zone. Rate zones are applicable to the services specified in Sections 4 and 5. This table lists, by jurisdiction, wire centers assigned to Rate Zones 1, 2, 3, and Price Bands A, B and C, Metropolitan Statistical Area (MSA) and MSA Level.

Metropolitan Statistical Areas (MSAs) may achieve various phases of pricing relief pursuant to Subpart H of the Commission's Part 69 Rules. For purposes of Switched Access Services, Telephone Company MSAs which qualify for Phase II pricing relief are identified in this section by MSA Name and level of pricing relief. MSAs are applicable to the services specified in Section 4. (C)
(N)
(N)

(A) Level 1 MSA Pricing

MSAs assigned to a Level 1 pricing are those MSAs which have achieved Phase II pricing relief for all Switched Access rate elements associated with the portion of the transmission path connecting an Interexchange Carrier's (ICs) customer designated location (CDL) to the wire center serving the secondary CDL, (i.e. end user premises). The rate elements associated with the transmission path are those rate elements applicable for the type of service involved. (C)
(D)

(This page filed under Transmittal No. 1351.)

Issued: August 31, 2017

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd) (C)19.1 Rate Zones and Metropolitan Statistical Areas (Cont'd) (C)

(B) Level 2 MSA Pricing

MSAs assigned to Level 2 pricing are those MSAs which have achieved Phase II pricing relief for all Switched Access rate elements associated with the end-to-end transmission path connecting the Interexchange Carrier's CDL to the secondary CDL involved. The rate elements associated with the transmission path are those rate elements applicable for the type of service involved. (C)

The services which are subject to the MSA rate bands are as follows:

- Switched Transport, Entrance Facilities (N)
- Switched Transport, Direct Trunked Transport (N)
- Switched Transport, Optional Features, Multiplexing (N)

(D)

|

|

|

(D)

To determine the pricing for the Switched Transport rate element when the wire centers involved are located within different price zones/bands, apply the rates for the higher price zone or price band. Rates subject to pricing flexibility are noted as Price Band A, B, or C. Traditional Price Cap rates are in Zones 1, 2 and 3. Rates between corresponding zones/bands (1/A- 2/B- 3/C) are maintained for services not awarded pricing flexibility. The MSA Level indicates whether dedicated Switched Access trunking services (DSW) may be subject to pricing flexibility band assignment. (C)

(D)

For the avoidance of doubt, in accordance with Section 2.7 of this Tariff, only Telephone Company wire centers in the operating territory of this Tariff will be considered in order to determine the applicable Switched Transport rate element. If one wire center is in the operating territory of this Tariff and the other wire center is not, the rates and charges applicable to the Switched Transport rate element will be dependent upon the level of pricing flexibility of only the wire center that is in the Telephone Company's operating territory. 19.2 Competitive and Non-Competitive Counties

(A) General

Counties and county-equivalents within the Telephone Company's operating territories have been designated by the Federal Communications Commission to be either Competitive or Non-Competitive for the purposes of pricing Special Access Services.

Price cap rates and charges are shown in Sections 3, 5, 6 and 11 preceding for Non-Competitive End User Special Access Lines and Optional Features and Functions ordered for such Non-Competitive End User Special Access Lines (e.g., Bridging).
