PRESUBSCRIPTION

3.1 INTRALATA TOLL PRESUBSCRIPTION

(A) Presubscription is a procedure whereby an end user, or a Pay Telephone Service Provider, may select and designate an IntraLATA Toll Provider (ITP) to access for intraLATA toll calls without dialing an access code. The end user or agent may designate an ITP for intraLATA toll, a different carrier for interLATA toll, or the same carrier for both. This ITP is referred to as the end user's, or agent's, preferred intraLATA toll provider.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user, or Pay Telephone Service Provider, selects a carrier as its preferred intraLATA toll provider, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user or Pay Telephone Service Provider without dialing an access code. Should the same end user or Pay Telephone Service Provider wish to use other services of the same carrier, it will be necessary for the end user or Pay Telephone Service Provider to dial the necessary access code(s) to reach that carrier's other service(s).

An ITP must use Feature Group D (FGD) Switched Access Service to qualify as an intraLATA toll provider. All intraLATA toll providers must submit a Letter of Intent (LOI) to the Company at least forty-five days prior to the intraLATA toll presubscription conversion date or, if later, forty-five days prior to the date on which the carrier proposes to begin participating in intraLATA toll presubscription.

Selection of an intraLATA toll provider by an end user or Pay Telephone Service Provider is subject to the terms and conditions following.

PRESUBSCRIPTION

3.1 INTRALATA TOLL PRESUBSCRIPTION (Cont'd)

(B) At the option of the ITP, the nonrecurring charge for a change in intraLATA toll presubscription, as provided in 3.1.4 (A) following, may be billed to the ITP, instead of the end user.

(1) Direct Billing

The Direct Billing option is available when an ITP initiates an intraLATA PIC change order.

The ITP can designate Direct Billing on any intraLATA PIC change orders it chooses. The nonrecurring charge for a change in presubscription will then be assessed to the ITP, instead of the end user.

The Direct Billing option is not available for orders placed via the Company's Residence or Business Service Centers.

(2) Reverse Billing

The Reverse Billing Option is available to ITPs for end user-initiated intraLATA PIC change orders placed at the Company's Residence or Business Service Centers. The non-recurring charge for all of the ITP's end user-initiated intraLATA PIC change orders placed at the Company's Residence or Business Service Centers will be assessed to the ITP, instead of the end user.

This option is only available to ITPs that also subscribe to the Reverse Billing option in Verizon's F.C.C. No.1 Tariff, Section 4.2(D).

The ITP must notify the Company in writing of its election to establish and/or cancel the Reverse Billing option. Establishment and/or cancellation will be effective within ten (10) business days from the date the Company receives written notification and must be in effect for a minimum of six months.

3.1.1 PRESUBSCRIPTION CHARGE APPLICATION

(A) Existing end users or Pay Telephone Service Providers may exercise an initial free presubscription choice, either by contacting the Company or by contacting the ITP directly. The initial free choice must be made within ninety days following implementation of intraLATA toll presubscription. The charge for the initial free choice change will be payable by the new ITP. End user or Pay Telephone Service Provider choices which constitute exercising the free initial choice are:

(1) Designating an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.

(2) Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Company.

Following an existing end user's or Pay Telephone Service Provider's initial free selection, any subsequent selection made during the first 180 days after presubscription or any change made more than 180 days after presubscription is implemented is subject to a nonrecurring charge as set forth in 3.1.4 (A) following.

(B) New end users or Pay Telephone Service Providers who subscribe to service after the presubscription implementation date (including an existing customer who orders an additional line) will be asked to select a primary ITP when they place an order for Company Exchange Service. If a customer cannot decide upon an intraLATA toll carrier at the time, the customer will have thirty days following completion of the service request to make an intraLATA PIC choice without charge. In the interim, the customer will be assigned a "No-PIC" and will have to dial an access code to make intraLATA toll calls. The free selection period available to new end users or Pay Telephone Service Providers is the period within thirty days of installation of the new service.

3.1 INTRALATA TOLL PRESUBSCRIPTION (Cont'd)
3.1.1 PRESUBSCRIPTION CHARGE APPLICATION (Cont'd)
(B) (Cont'd)

Initial free selections available to new end users or Pay Telephone Service Providers are:

- Designate an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.

- Choose no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Company. In addition, new end users or Pay Telephone Service Providers that do not select a preferred carrier will be assigned a "No-Pic."

Following a new end user's or Pay Telephone Service Provider's initial free selection, any subsequent selection made following implementation of intraLATA toll presubscription is subject to a non-recurring charge as set forth in 3.1.4 (A) following.

(C) If an ITP elects to discontinue Feature Group D service after implementation of the intraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users or Pay Telephone Service Providers, who have selected the canceling ITP as their preferred intraLATA toll provider. The ITP must inform the end users or Pay Telephone Service Providers that it is canceling its Feature Group D service, request that the end user select a new ITP, and state that the canceling ITP will pay the PIC change charge, as provided in 3.1.4 (A), following. The ITP must provide written notification to Verizon New Jersey that this activity has taken place.

(D) Unauthorized Preferred Carrier Change

An Unauthorized Preferred Carrier Change is a change in the preferred interLATA or intraLATA toll carrier that the end user or Payphone Service Provider denies authorizing.

If an end user or Payphone Service Provider denies authorizing a change in intraLATA toll presubscription as submitted by the alleged unauthorized toll carrier, the alleged unauthorized toll carrier will be assessed the Presubscription Change Charge as specified in Section 3.1.4 (A) following for:

- The disputed Presubscription Change Charge billed to the end user or Payphone Service Provider, and

- The Presubscription Change Charge for restoring the end user or Payphone Service Provider to its previous preferred intraLATA toll carrier.

In accordance with the Federal Communications Commission's Slamming Liability Rules in CC Docket 94-129, if an alleged unauthorized carrier is ultimately exonerated of liability, the alleged unauthorized carrier is entitled to receive full payment from the end user of Payphone Service Provider for all services provided. In such situations, any Presubscription Change Charge assessed against the alleged unauthorized carrier by the Company is subject to rebilling to the end user or Payphone Service Provider by the alleged unauthorized carrier.

PRESUBSCRIPTION

3.1 INTRALATA TOLL PRESUBSCRIPTION (Cont'd)

3.1.2 END USER/PAY TELEPHONE SERVICE PROVIDER CHARGE DISCREPANCY

(A) When a discrepancy is determined regarding an end user or Payphone Service Provider's designation of a preferred interLATA or intraLATA toll carrier, the following applies, depending upon the situation described:

- When two or more orders are received for an end user or a Payphone Service Provider line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date determines customer choice.

  If an end user or Payphone Service Provider denies requesting a change in carrier, as submitted by an intraLATA toll provider, the carrier will be assessed the Presubscription Change Charge as specified in Section 3.1.4 (A) following.

3.1.3 COIN SENT-PAID INTRALATA TOLL PRESUBSCRIPTION

Coin sent-paid intraLATA toll calls provides the ability for the Company to route directly dialed coin sent-paid intraLATA toll from a Network Controlled Coin Arrangement to the 0+ presubscribed provider or, to its subcontracted provider. The presubscribed provider may: 1) receive all intraLATA toll calls originating from a Network Controlled Coin Arrangement; 2) select one subcontracted provider per LATA to receive the coin sent-paid intraLATA traffic, or 3) it can continue to default the coin sent-paid intraLATA toll traffic to the existing carrier handling coin sent-paid intraLATA toll calls from a Network Controlled Coin Arrangement until the 0+ presubscribed provider elects to handle such traffic. 0+ presubscribed providers choosing to either carry or subcontract coin sent-paid intraLATA toll calls must provide a Letter of Intent (LOI) to the Company.

PRESUBSCRIPTION

3.1 INTRALATA TOLL PRESUBSCRIPTION (Cont'd)
3.1.3 COIN SENT-PAID INTRALATA PRESUBSCRIPTION (Cont'd)

If the 0+ presubscribed provider does not submit an LOI specifying the routing for intraLATA toll calls all coin sent-paid intraLATA traffic will continue to be routed to the existing coin sent-paid intraLATA carrier until such time as the 0+ presubscribed provider submits an LOI followed by an Access Service Request. If the 0+ presubscribed provider subcontracts the coin sent-paid intraLATA toll calls, the presubscribed provider remains responsible for all 0+ and direct dialed intraLATA toll calls originating from a Network Controlled Coin Arrangement.

If the 0+ presubscribed provider subcontracts the coin sent-paid intraLATA toll traffic, a Letter of Authorization (LOA) from the 0+ presubscribed provider or the subcontracted provider, must be delivered to the Company certifying that the sub-contracted provider agrees to accept and transport the coin sent-paid intraLATA toll calls traffic from a Network Controlled Coin Arrangement prior to routing such traffic to the subcontracted provider. If the 0+ presubscribed provider selects a subcontracted provider to handle 1+ coin sent-paid intraLATA traffic from a Network Controlled Coin Arrangement any arrangements will be solely between the presubscribed provider and its subcontracted provider.

Where a presubscribed provider which handles 0+ intraLATA traffic from a Network Controlled Coin Arrangement selects, on a LATA by LATA basis, a subcontracted provider to handle the coin sent-paid intraLATA traffic, it shall be the sole duty and obligation of the 0+ presubscribed intraLATA toll provider to make any and all arrangements for access billing and settlement with the sub-contracted provider. The Company shall be indemnified, defended and held harmless by the presubscribed provider and the subcontracted provider for any and all claims arising out of any act or omission of the presubscribed provider and/or subcontracted provider relating to access billing, settlement of arrangements and any other issue concerning the relationship between the presubscribed provider and its subcontracted provider.

3.1.4 RATES AND CHARGES

	RATE
(A) The charge for a change in IntraLATA Toll Presubscription.#	$ 2.50

The charge for a change in IntraLATA Toll Presubscription will apply on a per-line basis. This charge will be waived when a customer requests a change in toll providers for both InterLATA and IntraLATA services at the same time, for the same line, and on the same order. In this case the InterLATA rate will apply, as specified in Verizon's F.C.C. No. 1 Tariff, Section 4.2 (G).
