TARIFF FORMAT

A. Page Numbering: Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1

B. Page Revision Numbers: Revision numbers also appear on the upper right corner of each page. These numbers are used to determine the most current page version on file with the Department. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Department follows in its Tariff approval process, the most current page number on file with the Department is not always the Tariff page in effect.

C. Check Sheets: When a tariff filing is made with the Department, an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Department.
