PAY TELEPHONE LINES (PTL)

A. GENERAL

Pay Telephone Lines (PTL) are individual dial tone line Local Exchange services for use by pay phone service providers to connect coin, coinless and/or combination coin/coinless pay telephones to the Telephone Company's network.

B. REGULATIONS

1. Four types of PTL are available: Network Controlled Coin Line (NCCL), Network Controlled Non-Coin Line (NCNL), Network Controlled Inmate Line (NCIL) and Customer-Provided Coin-Operated Telephones (COCOTS).

2. Explanation of Terms

- a. Network Controlled Coin Line (NCCL)

The Network Controlled Coin Line (NCCL) is a dial tone line, message or measured rate, Local Exchange service for use with coin-operated pay telephones.*

The NCCL is equipped with network coin control capability which includes coin collect and return features, call rating capabilities and unique operator services which allow an end user to signal the operator during a call.

- b. Network Controlled Non-Coin Line (NCNL)

The Network Controlled Non-Coin Line (NCNL) is a dial tone line Local Exchange service for use with non-coin pay telephones, including card reader or credit card telephones. This line prevents the completion of chargeable direct dialed local or chargeable direct-dialed toll calls without operator intervention.

- c. Network Controlled Inmate Line (NCIL)

The Network Controlled Inmate Line (NCIL) is a dial tone line Local Exchange service for use with coinless and coin-operated telephones provided on the premises of city, county, state or federal prisons where institutionally authorized telephone programs warrant the service.

* Local messages will be billed on an unlimited flat basis until a message and measured rate exchange line is technically feasible for coin-operated telephones. At that time all NCCL lines equipped with flat rate service will convert to a message or measured rate exchange line.

Calls to Telephone Company numbers such as repair service, directory assistance, live operator (0-), Toll Free numbers, 10XXX, and public emergency service numbers such as 911 will be blocked from all Network Controlled Inmate Lines.

The following are standard blocking/screening features of the NCIL service:

- (2) Originating Line Number Toll Screening - provides special screening codes to the operator identifying any outward call screening on the line.
- (3) 900 blocking - prevents an exchange user from accessing 900 service telephone numbers.
- (4) Audiotex Blocking - prevents the completion of outgoing calls placed directly to an Audiotex Service telephone number.

d. Customer-Provided Coin-Operated Telephone Service (COCOTS)

Customer-Provided Coin-Operated Telephone Service (COCOTS) is a flat-rated dial tone line, Local Exchange service with unlimited local usage and touch tone designed for use with station controlled pay telephones.

Call Screening, when used in connection with COCOTS, is an optional arrangement whereby outgoing calls, which are routed to a Telephone Company operator, will be processed only on a bill-to-third number or collect call basis as instructed by the calling party.
