

Verizon New England Inc.

1. Public Telephone Services

1.1 Public Access Smart-pay Line (PASL) Service

Rates and charges for Public Telephone Services are contained in Part M Section 1.

1.1.1 Description	
A.	PASL is a class of service offered to Payphone Service Providers (PSPs) for use with payphones. PASL is provided as Basic Coin Access Line-1, Basic Coin Access Line-2. This service is available in suitably equipped central offices where sufficient facilities exist.
B.	PASL is provided from the Telephone Company's central office up to and including the network interface located at the customer's premises or other customer arranged location and is provided only where suitable central office facilities are available

1.1.2 Regulations	
A.	The customer is responsible for payment of all applicable charges, including local, toll, and FCC charges associated with the provisioning of this service.
B.	Telephone equipment used with PASL must be registered in compliance with Part 68 of the FCC's Registration Program.
C.	The Payphone Service Providers must conform to any applicable rules and regulations established by the DTC which include, but are not limited to, the following. Payphones must: 1. Have access to Directory Assistance service (411) 2. Emergency Number (911) where offered 3. Be clearly marked as to ownership.

(C)

1.1.3 Service Components	
A.	BCAL 1 and BCAL 2 are comprised of a network access line with dial tone first capability, coin functionalities and blocking features. 1. The network access line is measured and BCAL 1 is arranged for one way (outgoing) calling and BCAL 2 is arranged for two way (incoming and outgoing) calling. 2. The coin functionality features consist of coin timing and rating of sent paid end user calls and coin signaling. Coin signaling is used to control the disposition of the coins held in the pay telephone and consists of coin collect and coin return. Coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered. 3. The blocking features consist of originating number screening-operator screening, terminating number screening, and selective blocking.

1. Public Telephone Services

1.2 Public Access Line (PAL) Service

1.2.1 Description	
A.	PAL which is for use with Customer Owned Coin Operated Telephones (COCOT) and Customer Owned Coinless Telephones is a class of service offered to Payphone Service Providers (PSP's) for use with payphones.
B.	PAL is provided from the Telephone Company's central office up to and including the network interface located at the customer's premises or other customer arranged location and is provided only where suitable central office facilities are available.
C.	Screening and Blocking Optional Features – are offered with one-party main telephone exchange service in suitably equipped central offices to the extent that existing facilities are available. If a customer's local serving office is not suitably equipped, screening and blocking optional features can be furnished on a foreign exchange of foreign central office service basis, subject to the availability of facilities. The provision screening and blocking optional features is dependent on the customer's subscribing to a compatible Interexchange Carrier (IC).
1.	Originating Number Screen a. Operator Screening— Alerts the operator that operator handled calls and operator handled directory assistance calls may not be billed to the originating number. b. Direct Dialed Screening— Blocks directly dialed toll calls except calls placed to 800 numbers. Directly dialed calls to directory assistance are denied Toll and directory assistance calls may be placed on an operator handled basis. This feature is offered only in exchanges served by electronic central offices where suitable facilities exist and is not available with Municipal Calling service, as defined in the MA Product Guide Part A, Section 5.2.8.
2.	Terminating Number Screening— is available in three options: Option A— Alerts operators throughout the country that collect and third number calls cannot be billed to a particular number. Option B— Alerts operators throughout the country that third number calls cannot be billed to a particular number. Option C— Alerts operators throughout the country that collect calls cannot be billed to a particular number.
