1. Centrex Service
1.1 Description

1.1.2	Student Residence Centrex (SRC)	
A.	Centrex service is a residence telecommunications system when provided as SRC service. SRC is offered only as a LSPP contract. SRC is only available as an independent system to public or private educational institutions for residential use by students, faculty members, or employees who reside in dormitories or other residential quarters owned, leased, or under control of the educational institution.	
1.	SRC is only available on an unlimited service basis.	
B.	SRC is furnished from central office equipment located on Telephone Company premises and provisioned with associated facilities arranged to provide the equivalent of one-party unlimited residence main telephone exchange service.	
1.	The local calling area for SRC is the same as that specified for one-party unlimited residence main telephone exchange service.	
C.	**Billing Options—** Under any of the following options, the educational institutions must render assistance to the Telephone Company in collection of charges billed to the occupant of the room, apartment, or suite.	
1.	**Option 1—** The educational institution is responsible for the ordering of services and is bill for all charges.	
2.	**Option 2—** The educational institution is responsible for the ordering of services and is bill for all charges except that the occupant of the room, apartment, or suite is billed for MTS messages, telegrams, cablegrams, radiograms, restoral of service charges and directory assistance charges.	
3.	**Option 3—** The occupant of the room, apartment, or suite is responsible for the ordering of services and is billed for all charges.	
D.	All SRC lines furnished to an educational institution must be located in a room, apartment, or suite occupied by one or more persons as residential quarters and any additional telephones on the line shall be limited to such quarters.	
E.	Tie lines may be furnished, as specified in Part B of the Rhode Island Product Guide for Type 2001B Channels, between the switching system of the educational institution and the SRC central office equipment. If tie lines are provided, the educational institution's stations are not permitted access to exchange the Message Telecommunications Service (MTS) connections via the SRC central office equipment. At the option of the educational institution, SRC lines may be permitted access to exchange and MTS connections via the educational institution's switching system.	(C)
1.	Tie lines are provided at the rates and charges for Private Line Type 2001B channels, for the local and interexchange facilities, as required, to provide each tie line between SRC and the educational institution's switching system.	
2.	Tie line terminals are provided at rates and charges specified for dial-type tie line terminations as required with the switching equipment involved.

1.1.2	Student Residence Centrex (SRC)	
F.	**Rates and Charges**	
1.	Rates and charges apply for associated services and equipment, as specified elsewhere in this tariff or in the Rhode Island Product Guide.	(C)
2.	**Toll Denial—** An arrangement to restrict the use of a residential student line from the MTS network, where facilities are available.	
3.	**Directory Listings—** Additional directory listings will be available for Student Residence Centrex lines at the rate for additional listings for residence service.	(X)
4.	**Unlimited Service Usage Charges** apply to Student Residence Centrex and are based on the total number of main station lines in-service at the end of each customer's billing period. The PBX Trunk Equivalency Table (refer to Exhibit 1.1.2-1), specifies the equivalencies for main station lines. The exchange usage charge monthly rate is multiplied by the PBX Trunk Equivalency to determine the monthly unlimited service usage charge for the system	(X)
