WIRE CENTER INFORMATION

A. COMPETITIVE AND NON-COMPETITIVE COUNTIES

Counties and county-equivalents within the Company's operating territories are either Competitive or Non-Competitive for the purposes of pricing services.

Subject to Part 0, Section 1, the application of rates and charges for Special Access service subject to Competitive and Non-Competitive Counties pricing relief are described herein.

1. Competitive Pricing

The rate elements associated with the transmission path are those rate elements applicable for the type of service involved. Rates and charges for competitive rate elements are shown in terms of price bands, regardless of the status of the county for a particular wire center. To determine the price band for a rate element, first locate the county and the wire center from which the service is provided in (C) following and find the corresponding price band.

For IEF Service, Packet Services, Optical Networking services, and Low Speed Components, Price Band rates and charges apply regardless of whether the county is Competitive or Non-Competitive. (N) | (N)

2. Price Cap Pricing

Price Cap rates and charges apply for DS3 and below Non-Competitive End User Channel Terminations and Optional Features and Functions/Supplemental Features ordered for such Non-Competitive End User Channel Terminations (e.g., Bridging) as specified in the applicable Company FCC Tariff.

B. APPLICATION OF RATES

To determine the price band for the channel mileage rate element when the wire centers involved are located within different price bands, apply the rates and charges for the higher price band number. For the avoidance of doubt, in accordance with Part 0, Section 2.4.7 of this Product Guide, only Company wire centers in the operating territory of this Product Guide will be considered in order to determine the price band of the applicable channel mileage rate elements. If one wire center is in the operating territory of this Product Guide and the other wire center is not, the rates and charges applicable to the channel mileage rate element will be determined by the band that applies based on the wire center that is in the Company's operating territory.

However, for service within the New York-New Jersey Corridor or within the Pennsylvania-New Jersey Corridor, any Company wire center within the operating territory of the Corridor will be considered in order to determine the price band of the applicable channel mileage rate elements. (N) | (N)
