ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.1 GENERAL

This section sets forth the terms and conditions and order related charges for Access Orders for Special Access Service. These charges are in addition to other applicable charges as set forth in other sections of this Product Guide.

An Access Order is an order to provide the customer with Special Access Service or to provide changes to existing services.

4.1.1 ORDERING CONDITIONS

A customer may order any number of services of the same type and between the same premises, on a single Access Order. All details for the services for a particular order must be identical except for those for multipoint service.

The customer shall supply all the information necessary for the Company to provide and bill for the requested services. In addition to the order information required in 4.2 following the customer must also provide:

- Customer name and premises address(es).
- Billing name and address (when different from customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

4.1.2 PROVISION OF OTHER SERVICES

(A) Presubscription and other services shall be ordered with an Access Order or as set forth in (B) following. The rates and charges for these other services, as set forth in other sections of this Guide, will apply in addition to the ordering charges set forth in this Section and the rates and charges for the Access Service with which they are associated.

(B) With the agreement of the Company, other services set forth in (A) preceding, may subsequently be added to the order at any time, up to and including the service date for the Access Service. When added subsequently, charges for a design change as set forth in 4.2.2(C) following will apply when an engineering review is required.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.1 GENERAL (Cont'd)

4.1.2 PROVISION OF OTHER SERVICES (Cont'd)

(C) Additional Engineering is not an ordering option, but will be applied to an Access Order when the Company determines Additional Engineering is necessary to accommodate a customer request. Additional Engineering will only be required as set forth in 10.1 following. When it is required, the customer will be so notified and will be furnished with a written statement setting forth the justification for the Additional Engineering as well as an estimate of the charges. If the customer agrees to the Additional Engineering of Company Facilities, a firm order will be established. If the customer does not want the service or facilities after being notified that Additional Engineering of Company facilities is required, the order will be withdrawn and no charges will apply. Once a firm order has been established the total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10%.

The terms and conditions, rates and charges for Additional Engineering are as set forth in 10.1 following and are in addition to the terms and conditions, rates and charges specified in this section.

4.1.3 SPECIAL CONSTRUCTION

(A) APPLICATION

Special construction is involved where the Company, at the request of the customer, constructs facilities: (C)

- Where facilities are not presently available, and there is no other requirement for the facilities so constructed,
- of a type other than that which the Company would normally utilize,
- involving a route other than that which the Company would normally utilize,
- in a greater quantity than that required to serve the customer's immediate facility needs,
- on an expedited basis,
- on a temporary basis until permanent facilities are available,
- involving abnormal costs, or
- in advance of normal construction. (C)

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.1 GENERAL (Cont'd)

4.1.3 SPECIAL CONSTRUCTION (CONT'D)

(B) RATE TREATMENT (N)

Rates and charges for special construction will reflect the costs incurred by the Company and may include, but are not limited to, monthly rates, nonrecurring charges, basic termination liabilities, or combinations thereof.

(C) BASIS FOR COST COMPUTATION

The cost of providing facilities through special construction shall be determined by considering the following items to the extent they are applicable to a given situation:

- Cost of maintenance.
- Cost of operation.
- Depreciation on the estimated cost installed on any facilities provided based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage.
- Administration, taxes and uncollectable revenue on the basis of reasonable average costs for these items.
- Any other specific items of expense associated with special construction in a particular situation.
- A reasonable dollar amount for return and contingencies computed on the estimated cost installed of any facilities provided.

(D) CONSTRUCTION CHARGES

Estimated cost installed, referred to preceding, includes cost of equipment and materials specifically provided or used during the special construction together with the estimated cost of installation, including the cost of engineering, labor, supervision, transportation, rights-of-way and other items which are chargeable to the Company's capital accounts. (N)

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.1 GENERAL (Cont'd)

4.1.3 SPECIAL CONSTRUCTION (CONT'D)

E. TERMINATION LIABILITY (N)

1. To the extent the Company has no immediate requirement for the use of specially constructed facilities, the customer, upon termination of service, will incur termination charges for that portion of the termination liability period not yet expired.

2. The termination liability period, unless specified otherwise in this Product Guide, is ten (10) years.

3. The amount of the termination liability is equal to the total of the estimated amounts for:

   a. Cost installed of the facilities provided including estimated costs for rearrangements of existing facilities and/or construction of new facilities less net salvage. Cost installed includes the cost of:

      - Equipment and materials provided or used.
      - Engineering, labor and supervision.
      - Transportation.
      - Rights-of-way.
      - Other items chargeable to the Company's capital accounts.

   b. License preparation, processing and related fees.

   c. Preparation, processing and related fees.

   d. Any other identifiable costs related to the specially constructed or rearranged facilities.

4. The maximum termination liability is reduced by 1/120th for each month of the ten year period that the facilities are utilized after they are placed in service, or by a likewise proportionate portion if the period is other than ten years.

F. OWNERSHIP OF FACILITIES

Title to all specially constructed facilities provided in accordance with the preceding terms of service remains with the Company. (N)

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2 ACCESS ORDER

An Access Order is used by the Company to provide a customer Access Service as follows:

- Special Access Services as set forth in 6. following

When placing an order for service, the customer shall specify, at a minimum, information for the Entrance Facility, as described in (A) following, Direct-trunked Transport Facility, as described in (B) following, and/or Tandem Switched Transport, as described in (C) following. This information is in addition to the basic FGA, FGB or FGD Switched Access Service arrangement as described TARIFF B.P.U. N.J. NO. 6Section and in (D) and (E) following respectively.

(A) When the customer orders Direct-trunked Transport (as described in Section 4.1.2 following) for FGA, FGB or FGD the customer must specify whether the Entrance Facility that interfaces with the Direct-trunked Transport facility is new or existing. If the Entrance Facility is new, the customer shall order the Entrance Facility as described in (A) preceding. If the Entrance Facility is existing, the customer shall provide the Connecting Facility Assignment (CFA) of the existing facilities that will be used for the Direct-trunked Transport. The Entrance Facility capacity must be the same capacity as the Direct-trunked Transport or higher. The customer shall specify the type of Direct-trunked Transport facility, DS3, DS1, or Voice Grade, being requested between the SWC of the customer's premises and the end office switch and any multiplexing options desired at the end office. In addition, the customer must order FGA, FGB or FGD at the same time as described in (D) and (E) following.

(B) The customer must also provide any out-of-band signaling Local Switching options. When ordering trunks with out-of-band signaling, the customer shall provide STP point codes and location identifier codes, circuit identification codes and switch type. In addition, the customer shall also specify, for out-of-band signaling connections, the level of diversity in its network as defined in Bell Atlantic Supplement Common Channel Signaling (CCS) Network Interface Specification, Issue #1, December 1990, and in Technical Reference TR-TSV-000905, Issued August 1989.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2 ACCESS ORDER (Cont'd)

(C) For Feature Group D ordered with the Out-of-Band Signaling Ordering Option, the customer shall work cooperatively with the Company to determine the number of out-of-band signaling connections required to handle its signaling traffic.

(D) The WATS or Toll Free Service Access Line Optional Feature may be ordered separately by a customer other than the customer which orders the FGD. However, such WATS or Toll Free Service Access Lines or Local Exchange Access Lines arranged for INTELLIGENT Toll Free Service must be ordered for use with FGD. For the WATS or Toll Free Service Access Line optional feature, the customer shall specify the customer premises at which the WATS or Toll Free Service Access Line Terminates, the type of line (i.e., two-wire or four-wire), the type of calling (i.e., originating or terminating) and the type of Supervisory Signaling. When the necessary screening functions are not provided at the wire center the Company will use the nearest wire center premises where the screening capacity exists.

When a WATS or Toll Free Service Access Line or Local Exchange Access Line arranged for **INTELLIGENT** Toll Free Service is provided to a customer (end user by this Company) and used for Intrastate interLATA and intraLATA calling in order to obtain statewide WATS (OUTWATS or Toll Free)type service, the following treatment applies:

(1) The rates and charges for the WATS or Toll Free Service Access Line(s or Local Exchange Access Lines arranged for **INTELLIGENT** Toll Free Service and intraLATA usage are billed as specified in this Company's Product Guide, Part A, Section 13. InterLATA usage is subject to the rates specified herein.

(2) When WATS Access Line Service is provided to an IC so that the IC may furnish interLATA WATS or WATS-type service(s), the rates and terms and conditions specified throughout this Access Service Product Guide apply.

(3) The following is a condition for Interexchange Carrier (IC) participation in a statewide service arrangement that consists of an IC providing an intrastate interLATA service which complements the Company's intraLATA **INTELLIGENT** Toll Free Service. When the end user places an order with the Company for this service arrangement, the IC will not apply any end user charges which are comparable to the Company's Installation and Number Charges as specified in Part A, Section 13 of the Product Guide.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2 ACCESS ORDER (Cont'd)

(E) For Toll Free Database Access Service and 900 Access Service, as described in Tariff B.P.U. N.J. No. 6, Sections 1.3.(C)(3) and 6.1.3(C)(5), when the customer desires a separate trunk group for conventional signaling between the equal access tandem and the customer's serving wire center, the trunk group is ordered by specifying the number of trunks to the equal access tandem.

Toll Free Database Access Service and 900 Access Service can be ordered on a Statewide or LATA basis. When the customer orders NXXs to be activated on other than a Statewide basis, calls originating in a LATA in which the customer identification function is performed but to which the customer has not ordered the NXXs activated, will be blocked.

(F) When the Switched 56 Kilobit Service (S56) option, described in Tariff B.P.U. N.J. No. 6, Section 6.1.3(B)(6)(d), is ordered for use with Feature Group D service, the customer must specify the office where the Switched 56 Kilobit Service function is to be provided, as well as the Switched 56 Kilobit Service Switched Transport Optional Feature as described in Tariff B.P.U. N.J. No. 6, Section 4.(b)(3)(b). Switched 56 Kilobit Service is available only in Company-designated end office switches. Feature Group D Trunks used for Switched 56 Kilobit Service are dedicated to carrying only Switched 56 Kilobit Service traffic and must be ordered directly to the Switched 56 Kilobit Service-equipped end office.

(G) For Tandem Access Sectorization (TAS), the customer (interexchange carrier) must provide this Company with a written certification concerning compliance with the requirement of the New Jersey Board of Public Utilities that the customer (interexchange carrier) provide fourteen day advance notification to its existing Feature Group B end user customers that end user customer mileage calculations may be affected as a result of the implementation of TAS, and that end user customer charges for certain calls may increase or decrease.

(H) For all Special Access Services, the customer must specify the customer premises or Hubs involved, the type of service (e.g., Narrowband, Voice Grade High Capacity, etc.), the channel interface, technical specification package and options desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be different but all such interfaces shall be compatible.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2 ACCESS ORDER (Cont'd)
(H) (Cont'd)

The BHMC may be determined by the customer in the following manner. For each average business day (i.e., 8AM to 11PM, Monday through Friday, excluding national holidays), the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 AM hour). The customer shall, for the same hour period (i.e., busy hour) for each of twenty consecutive business days, pick the twenty consecutive business days in a calendar year which add up to the largest number of minutes of use. Both originating and terminating minutes shall be included. The customer shall then determine the average busy hour minutes of capacity (i.e., BHMC) by dividing largest number of minutes of use figure for the same hour period for the consecutive twenty business day period by 20. This computation shall be performed for each end office the customer wishes to serve. These determinations thus establish the forecasted BHMC for each end office.

Where the Special Access Service is subject to the surcharge, as set forth in 6.4.2 following and the customer does not use the Special Access Service as described and desires an exemption from the surcharge, it shall furnish with the order the certification as set forth in 6.4.2 following.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.1 ACCESS ORDER SERVICE DATE INTERVALS

Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval

To the extent the Access Service can be made available with reasonable effort, the Company will provide the Access Service in accordance with the customer's requested interval, subject to the following conditions:

(A) Standard Interval

The Company shall publish and make available to all customers a schedule of Standard Intervals applicable for Switched Access Service. The schedule specifies the services and the quantities of services that can be provided in the Standard Intervals. Standard delivery timeframes are based on product and are subject to change. Please contact your Sales Account Team for a list of most current Standard Delivery Dates. Normally, once a FOC has been issued for an order, a committed delivery date will be given to the customer.

Access Services provided in a Standard Interval will be installed during Company business days. If a customer requests that installation be done outside of scheduled work hours, and the Company agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in 10.2.6 (A) following.

(B) Negotiated Interval

The Company will negotiate a service date interval with the customer when:

(1) There is no Standard Interval for the service, or

(2) The customer requests a service date beyond the applicable Standard Interval service date.

The Company will offer a service date based on the type and quantity of Access Services the customer has requested. The Negotiated Interval may not exceed by more than 6 months the Standard Interval service date, or when there is no Standard Interval, the Company-offered service date.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.2 ACCESS ORDER MODIFICATIONS

The customer may request a modification of its Access order prior to the service date. The Company will make every effort to accommodate a requested modification when it is able to do so with normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Company will notify the customer. If the customer still desires Access Order Modification, the Company will schedule a new service date. All charges for Access Order modification will apply on a per occurrence basis.

Any increase in the number of Special Access Service channels, Switched Access Service lines, trunks, busy hour minutes of capacity, or out-of-band signaling connections will be treated as a new Access Order (for the increased amount only).

If order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer, these changes will be made without order modification charges being incurred by the customer.

(A) Service Date Change Charge

Access Order service dates may be changed, but the new service date may not exceed the original service date by more than 30 calendar days. If the customer requested service date is more than 30 calendar days after the original service date, the order will be cancelled by the Company and reissued with the appropriate cancellation charges applied. If the Company determines it can accommodate the customer's request without delaying service dates for orders of other customers, a new service date may be established that is prior to the original standard or negotiated interval service date.

If the service date is changed to an earlier date, and the Company determines additional labor or extraordinary costs are necessary to meet the earlier service date requested by the customer, the customer will be notified by the Company that Expedited Order Charges as set forth in (D) following apply. Such charges will apply in addition to the Service Date Change Charge.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.2 Access Order Modifications (Cont'd)

(A) Service Date Change Charge (Cont'd)

A Service Date Change Charge will apply, on a per order per occurrence basis, for each service date changed. The applicable charge is:

	Charge	USOC
Service Date Change Charge per order	$150.00	OMC

(B) Partial Cancellation Charge

Any decrease in the number of ordered Special Access Service channels, Switched Access Service Switched Transport Facilities lines, trunks, busy hour minutes of capacity, or out-of-band signaling connections will be treated as a partial cancellation and the charges as set forth in 4.2.3(B) following will apply.

(C) Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone personnel, of the service ordered and the requested changes to determine what changes in the design, if any are necessary to meet the changes requested by the customer. Design changes include such things as the addition or deletion of optional features or functions or a change in the type channel interface, type of Interface Group or technical specification package. Design changes do not include a change of customer premises, end user premises, end office switch, Feature Group type, or Special Access or Switched Transport Facilities channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.2 Access Order Modifications (Cont'd)

(C) Design Change Charge (Cont'd)

The Company will review the requested change, notify the customer whether the change is a design change, if it can be accommodated and if a new service date is required. If the customer authorizes the Company to proceed with the design change, a Design Change Charge will apply. The Design Change Charge will apply on a per order per occurrence basis, for each order requiring a design change. The applicable charge is:

	Rate	USOC
Design Change Charge, per order	$ 150.00	H28

If a change of service date is required, the Service Date Change Charge as set forth in (A) preceding will also apply.

(D) Expedited Order Charge

When placing an Access Order, a customer may request a service date that is prior to the standard interval service date. A customer may also request an earlier service date on a pending standard or negotiated interval Access Order. If the Company determines that service can be provided on the requested date and that additional labor cost or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided an estimate of the additional charges involved. Such additional charges will be determined and billed to the customer as follows:

To calculate the additional labor charges, the Company will, upon authorization from the customer to incur the additional labor charges, keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable Additional Labor charges as set forth in 10.2.6(A) following.

To develop, determine and bill the customer the extraordinary costs which may be involved, the special construction terms and conditions as set forth in Verizon Tariff F.C.C. No. 3 will be used by the Company. Authorization to incur the costs and to bill the customer will be in accordance with the terms and conditions of Verizon Tariff F.C.C. No. 3.

When the request for expediting occurs subsequent to the issuance of the Access Order, a Service Date Change Charge as set forth in (A) preceding also applies.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.3 Cancellation of an Access Order

(A) A customer may cancel an Access Order for the installation of service on any date prior to notification by the Company that service is available for the customer's use. The cancellation date is the date the Company receives written or verbal notice from the customer that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

A customer may negotiate an extension of a service date of an Access Order for installation of new services or rearrangements of existing services and a Service Date Change Charge, as set forth in 4.2.2(A) preceding, will apply. However, if the customer requested service date is more than 30 calendar days after the original service date, or if the customer or the customer's end user is unable to accept Access Service within 30 calendar days of the original service date, the order will be cancelled on the 31st day beyond the original service date and the appropriate Cancellation Charge will be applied.

Charges incurred in conjunction with the provision of Special Access Service start on the Application Date as defined in (B)(2) following.

When the customer cancels an Access Order prior to being notified of the critical events in the Provisioning Process, as defined in (B)(2) following, no charges shall apply.

(B) Applicable charges are based on the amount of provisioning completed by the Company at the time the order is cancelled. The charges are determined based on the following:

(1) Certain Company critical dates are associated with an Access Order provisioning interval, whether Standard or Negotiated. These dates are used by the Company to monitor the progress of the provisioning process. At any point in the Access Order provisioning interval the Company is able to determine which critical date was last completed and can thus determine what percentage of the Company's nonrecurring charge has been incurred.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)
4.2.3 Cancellation of an Access Order (Cont'd)
(B) (Cont'd)

(2) The critical dates tracked by the Company are as follows:

- Application Date (APP): The date the customer provides a firm commitment and sufficient information as detailed in 4.1 preceding to the Company. This is also the order date.

- Scheduled Issue Date (SID): The date that the order is to be entered in the Company's order distribution system.

- Design Layout Report Date (DLRD): The date the Design Layout Report (DLR) is to be forwarded to the customer. In the case of "Routing/Translation only"† orders, this date occurs when all necessary network design and layout information has been passed to the Translations Writing Organization.

- Records Issue Date (RID): The date that all design and assignment information is to be sent to the central office and installation forces.

- Wired and Office Tested Date (WOT): The date by which all intraoffice wiring is to be completed, all plug-ins optioned, aligned, and frame continuity established, and the interoffice facilities, if applicable, tested. In addition, switching equipment is to be installed and tested and all translations loaded and checked.

- Plant Test Data (PTD): The date on which overall testing of the service is to be started. In the case of "Routing/Translation only"† orders, this date is when all individual office tests of the translations are completed.

- Service Date (DD): The date on which service is to be made available to the customer. This is sometimes referred to as the Due Date.

† Trunk Routing/Switch Translation (R/T) installation orders are those that require translations software changes only. Routing/Translation Software installation includes, but is not limited to, 900 NXX code changes.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.3 Cancellation of an Access Order (Cont'd)

(B) (Cont'd)

(3) The amount of the total provisioning completed by the Company at a particular critical date varies by the type of service shown following.

When a customer cancels an Access Order, or part of an Access Order, before the service date, the Company will apply cancellation charges to the order, unless the order is canceled because the Company missed the service date, by multiplying all the nonrecurring charges associated with the order, or that part of the order being cancelled, by the percentage shown following for the critical date last completed on the order:

Service	Critical Date					
	APP	SID	DLRD	RID	WOT	PTD
FGA/Lineside BSA	0%	9%	19%	37%	100%	100%
FGB/Trunkside BSA Option	0%	8%	17%	32%	100%	100%
FGD/Trunkside BSA Option	0%	7%	18%	32%	100%	100%
CCSAS	0%	7%	18%	32%	100%	100%
OTS	0%	7%	18%	32%	100%	100%
SNA	0%	7%	18%	32%	100%	100%
R/T †	0%	20%	50%	75%	90%	100%
MT	0%	22%	39%	39%	68%	100%
S56	0%	7%	18%	32%	100%	100%
TG	0%	12%	23%	23%	66%	100%
VG	0%	8%	17%	17%	74%	100%
WAC	0%	7%	18%	32%	100%	100%
AP	0%	10%	24%	24%	70%	100%
TV	0%	7%	26%	26%	69%	100%
WA	0%	7%	26%	26%	69%	100%
WD	0%	7%	26%	26%	69%	100%
DA	0%	10%	21%	21%	70%	100%
HC	0%	6%	21%	21%	74%	100%

(C) If the Company misses the service date, the Cancellation Charge will not be applied.

(D) When a customer cancels an order for the discontinuance of service, no charges apply for the cancellation.

† Trunk Routing/Switch Translation (R/T) installation orders are those that require translations software changes only. Routing/Translation Software installation includes, but is not limited to, 900 NXX code changes.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.3 Cancellation of an Access Order (Cont'd)

(E) If the customer cancels an order on or after the date in which the service is made available to the customer, the minimum period charges are applicable.

4.2.4 Selection of Facilities For Access Orders

(A) When there are analog or digital high capacity facilities to a Hub on order or in service for the customer's use, the customer may request a specific channel or transmission path be used to provide the Special Access Service requested in an Access Order. The Company will make a reasonable effort to accommodate the customer request.

(B) For all other Access Orders, the option to request a specific transmission path or channel is not provided except as provided for under Special Facilities Routing as set for in 8. following.

4.2.5 Minimum Period

(A) The minimum period for which Access Service is provided and for which charges are applicable, is one month.

(B) The minimum period for part-time Television Special Access Service is one day even though the service will be provided only for the duration of the event specified on order (e.g., one-half hour, two hours, five hours, etc.)

4.2.6 Minimum Period Charges

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period.

The Minimum Period Charge for monthly billed services will be determined as follows:

(A) For Special Access Service, the charge for a month or fraction thereof is the applicable monthly rates for the service as set forth in 6.5 following.

ORDERING OPTIONS FOR SPECIAL ACCESS SERVICE

4.2. ACCESS ORDER (Cont'd)

4.2.7 Shared Use Facilities

Shared Use (i.e., Switched Access Services provided over an analog or digital high-capacity Special Access facility) is allowed as set forth in Section 6.4.6 following. (C) | (C)

Certain material previously found on this page can now be found on Page 45 of Part B, Section 6.
