Provide five OC48 optical services without multiplexing capability as portions of a fiber ring architecture. The five OC48 optical services include 10 channels between the customer designated premises and the associated SWCs and interoffice channel mileage consisting of 57 airline miles. The remaining portions (optical services) of the ring will be provided by a Competitive Access provider (CAP). The overall ring will connect 11 customer designated premises. In addition, duplicate OC48 optical transmission services are being provided for added protection of the primary services. The duplicate services are also being provided without multiplexing capability as portions of a fiber ring architecture. The following rates, based on a 7-year service period, will apply:

USOC	Monthly Rate	Nonrecurring Charges

If service is disconnected in full or in part during the service period, the customer is liable for a termination liability charge calculated as set forth in (a) or (b) following. When calculating termination liability charges, the Telephone Company will apply the option which provides the customer with the lowest termination liability charge. For each option listed below, the termination liability charge shall apply to the portion of the service that is disconnected.

(a) Option 1

For disconnects prior to the end of the service period, the termination liability charge is 80% of the service period rate for each month and fraction thereof in the balance of the service period.

(b) Option 2

The termination liability charge will be the product of the actual number of months the service has been in effect times a rate differential.

The rate differential is the difference between the rate that would be applicable for a lesser service period and the rate for the service period.

The rate differential used to calculate the termination charges are:

DISCONNECT PERIOD	RATE DIFFERENTIAL
1 Month - 23 Months	.66 x Service Period Rate
24 Months - 35 Months	.58 x Service Period Rate
36 Months - 47 Months	.50 x Service Period Rate

2000-1 Bell Atlantic Global Networks, Inc.

This specialized arrangement provides the customer with partitioned access to performance and statistical information on its Bell Atlantic Enterprise DS0 Services. Through the use of a Graphical User Interface (GUI), Customer Service Management (CSM) allows for a graphical representation of the customer's network elements that are under control of the Telephone Company's management system. CSM also allows the customer to receive alarm information on its network elements and to generate its own network reports. At its premises, the customer must provide a 330Mhz or higher Pentium or SUN PC on which CSM software has been installed.

The customer must order a Special Access 1.544 Mbps service from its designated premises to the central office-based CSM server as designated by the Telephone Company.

The rate for this specialized arrangement is a nonrecurring charge, which applies in addition to the rates and charges for the associated 1.544 Mbps Service. Only one 1.544 Mbps Service is required, regardless of the number of workstations equipped at that customer designated premises.

This specialized arrangement is being provided for a trial period not to exceed 120 days. Upon completion of the trial, this service will be provided under a Special Access tariff, or the service will be terminated.

Description of Specialized Service

This specialized service provides Triumph Communications (the customer) with a 45 Mbps interface option for its Advanced Uncompressed Digital Video Service (AUDVS) allowing for transmission of a simplex (one-way) 45 Mbps signal across the video time slot channel. The 45 Mbps signals will be provided over the same AUDVS channel as the customer's 8 bit or 10 bit encoded NTSC video signals. Each channel termination on the AUDVS channel will be arranged to originate transmission (transmit only) or to receive transmission (receive only) as specified by the customer. The 45 Mbps signal can not be the first channel termination activated on the AUDVS channel.

The customer must subscribe to AUDVS under the terms and conditions specified in Section 7.2.14 preceding, unless otherwise stated in this specialized service.

Terms and Conditions

This specialized service is being provided under a 60 month Service Discount Plan commitment period, subject to the terms and conditions and termination liability specified in Section 7.4.10 preceding.

Rates and Charges

The 45 Mbps interface is provided as an additional Channel Termination only. The customer must activate a First 8 bit or a First 10 bit Channel Termination before any 45 Mbps Additional Channel Terminations may be ordered. These channel terminations apply per point of termination.

Type of Additional Channel Termination	USOC	Monthly Rate	Nonrecurring Charge With Initial Installation	Nonrecurring Charge Subsequent to Initial Installation

(c) Example using New York rates:

A customer schedules 6 1004 Hz Loss Tests, 6 C-Message Noise Tests and 4 Return Loss Tests on one trunk for a year. The charges will be computed as follows:

```
 6 x . 26 = 1.56
+6 x 1.05 = 6.30
+4 x 1.05 = 4.20
          $12.06 per month, per trunk

(1) Cable Space

Cable space for Expanded Interconnection arrangements which are in-service or on order prior to February 17, 2004 and not converted under 28.1.1(H) or 28.6.1(K) preceding are set forth following.

	USOC	Monthly Rates Fixed** (per multiplexing node or virtual collocation arrangement)	
New York/Connecticut	SP1CC	$45.60	
Massachusetts/ Rhode Island	SP1CC	35.33 Per Linear Ft. per cable #	(T) (T)
New York/Connecticut	SP1CD	$0.22	
Massachusetts/ Rhode Island	SP1CD	0.16	(T) (T)

* See Section 28. preceding for application of rates.

** A microwave customer will not be assessed a fixed cable space charge unless the customer's cables and/or waveguide passes through the serving wire center cable vault.

A customer interconnecting its transmission equipment between its multiplexing nodes or virtual collocation arrangements within the same serving wire center, access tandem or remote node will not be assessed a fixed cable space charge.

\# When determining the linear footage associated with interconnection of an Expanded Interconnection Arrangement and another Interexchange Carrier point of presence already located in the same Telephone Company building as the serving wire center, access tandem or remote node (i.e., a point of presence established under terms other than those specified for Expanded Interconnection), the linear footage to connect such locations will be measured from manhole zero to the multiplexing node or virtual collocation arrangement.
