

PERSONAL SIGNALLING SERVICE

A. GENERAL

1. Personal Signalling Service is a one-way selective signalling service. Any landline telephone user in the telephone local calling area can dial the seven-digit number associated with a portable receiving unit to actuate the signalling mechanism in the receiver. A recorded message or a tone signal indicates to the calling party that the signal has been forwarded. Receiver numbers are not made public.
2. The service is available in certain serving areas in either tone only, tone and voice, or tone and display basis or shown under Paragraph C. RATES following.

a. Tone Only

Tone only personal signalling is provided by a radio receiver arranged to respond with a distinctive audible tone when the assigned telephone number is dialed. The audible tone usually indicates to the customer he should call a predetermined number.

b. Tone and Voice

Tone and voice personal signalling is provided by a radio receiver arranged to respond with a distinctive audible tone when the assigned telephone number is dialed. This is an indication to the customer that a recorded voice message of up to approximately ten (10) seconds will follow.

c. Tone and Display

Tone and display Personal Signalling Service is provided by a radio receiver arranged to respond with a distinctive audible tone followed by a message (such as a telephone number) displayed on a visual readout contained in the receiver, when the assigned telephone number and up to ten (10) additional digits are dialed.

B. CONDITIONS

1. Personal Signalling Service is available only when properly equipped receivers are within range of a land radio telephone transmitter and is subject to transmission, atmospheric and like limitations. The service is available in the Erie, Johnstown, Oil City, Somerset and York areas. In addition to those exchange areas as shown in Tariff (C) Telephone-Pa. P.U.C. No. 17, Personal Signalling Service is available to the public in additional territory in portions of Crawford, Blair, Cambria, Perry, Cumberland, York and Dauphin Counties including the cities of Meadville, Altoona and Harrisburg as certificated in the Commission's Order entered July 17, 1991 at Docket No. A-311420.

PERSONAL SIGNALLING SERVICE

B. CONDITIONS (Cont'd)

2. The Telephone Company will designate the seven-digit number assigned to the customer as a part of the service and will not attempt to provide a number that is compatible with a customer-provided Personal Signalling Receiver. The customer is responsible for making any changes in the customer-provided Personal Signalling Receiver that may be required because of changes in the call number made by the Telephone Company in connection with the efficient conduct of its business.
3. The customer is responsible for maintaining battery strength at a level which will assure receipt of the signals transmitted from the signalling base station.
4. Toll message charges apply for signals originated from points outside the local calling area of the exchange in which the signalling base station is located. Toll charges are billed to the calling station.
5. The Telephone Company only undertakes the transmission of the signal to activate the receiver.
6. The radio receiver used in association with personal signaling service must be provided by the customer and shall, in the judgement of the Telephone Company be of an appropriate type for the proper operation of the service.
7. The Telephone Company is not liable for damages for any accident or injury occasioned by the use of personal signaling service, when such accident or injury is not due to the negligence of the Telephone Company.
